Page 143

The second proposed settlement addresses the recovery and utility rates of certain costs associated with the Tacoma Liquefied Natural Gas Project, part of which serves as a peaking resource for Puget's natural gas customers.

2.4

This proposed settlement is joined by Puget Sound Energy, the Commission Staff, the Alliance of Western Energy Consumers, Walmart, Kroger, and Nucor Steel. It is opposed by the Office of Public Counsel, the Puyallup Tribe of Indians, and The Energy Project.

The third proposed settlement addresses all other issues in the case, including the Company's authorized return on equity, capital structure, and authorized overall rate of return. If approved, this proposed settlement would authorize a two-year rate plan with total revenue increase of \$293 million in the first year and \$56 million in the second year.

The third proposed settlement is joined by all parties except the Office of Public Counsel, which opposes the proposed return on equity, and the Coalition of Eastside Neighborhoods for Sensible Energy or CENSE, which opposes the inclusion of costs associated with PSE's Energize Eastside transmission project.

So this evening, we will take comment from members of the public who are not formal parties to this

So, Andrew?

MR. ROBERTS: All right. I'm having some bandwidth issues, so I'm going to leave my video off. CHAIR DANNER: Okay.

MR. ROBERTS: My name is Andrew Roberts. I'm a public involvement representative with the Utilities and Transportation Commission, and I would like to cover some logistics before we begin the comment hearing this evening.

Page 145

First, we ask everyone to please mute your connections unless you're called on to speak. If you're participating via Zoom, you can mute your connection by clicking the microphone. A slash will appear across the microphone indicating you have muted your connection. To unmute, click the microphone again, and the slash will disappear. After you're done speaking, please remember to mute yourself again by pressing that microphone.

The same process applies if you called in via the phone. You press star six to mute your connection. Star six, again, will unmute yourself, and after you're done speaking, please press star six to mute yourself one more time.

Please wait to be called on for comment, and do not interrupt other speakers. There are two options for

Page 144

case. Your views are important to us and provide insights on various matters to be addressed in the rate case. All of the comments we receive tonight will be recorded by the court reporter and made part of the formal record in the case.

There are some ground rules. As I said before, the Commissioners serve as judges, and for this reason, we are here to listen. We cannot engage in debate or discussion with commenters, and we cannot answer questions you have about the case.

Public Counsel represents the interests of the customers, and you should direct questions about the case to them. Shay Baumann of Public Counsel is in attendance tonight, and Public Counsel can be reached, if you have questions, by e-mailing them at utility@atg.wa.gov.

Also, be aware that before we begin, I will ask all who plan to speak to be sworn in. Your comments -- we will take them orally. We will not be taking comments in the chat. So all matters in the chat are just logistical. And so do not provide any substantive comments in the chat, please.

All right. I'm now going to turn to Andrew Roberts, the UTC's public involvement representative, who will cover some logistics.

Page 146

you to report technical difficulties. You can use the chat feature in Zoom, or you can call Ryan Smith at 360-664-1165. Once again, that's 360-664-1165.

The chat feature should only be used to report technical difficulties. We don't collect public comment from the chat feature. You can submit public comments by e-mailing comments, C-O-M-M-E-N-T-S, @utc.wa.gov or calling 888-333-9882. You can ask to speak with me, Andrew Roberts.

Next, we'll need to get to the names for those who would like to speak. I believe we have asked folks who are using Zoom to use the chat feature to input your name. If you haven't done so yet, you can do that. If you contacted us previously to provide your name for this comment hearing, we already have that on the sign-in sheet.

So for folks who are calling in and your last name begins A through E, I would like to ask you to unmute yourselves and provide us your first and last name. Please spell your last name. Once again, that's A through E.

MS. DAY: Esther Day, D-A-Y.
MR. ROBERTS: Thank you, Esther.
MS. ANTMAN: Iris Antman, A-N-T-M-A-N.
MR. ROBERTS: Thank you, Iris.

	Page 147		Page 149
1	MR. BRIGGS: Rob Briggs, B-R-I-G-G-S.	1	short answer to that is no.
2	MS. BLACKMON: Michelle Blackmon,	2	CHAIR DANNER: So
3	B-L-A-C-K-M-O-N.	3	MR. GOTTSCHALL: I presented sorry, Dave.
4	MR. CANNING: Orion Canning, C-A-N-N-I-N-G.	4	I provided a PDF. I was told that that could
5	MR. ARENT: Shawn Arent, A-R-E-N-T.	5	be presented. So I created a PDF, which was basically
6	MR. ANDERSON: And I'm Neal Anderson,	6	from a PowerPoint, and I sent it in to
7	A-N-D-E-R-S-O-N.	7	comments@utc.wa.gov as instructed. So I am presuming
8	MR. ROBERTS: Thank you, Neal.	8	that for all these people on the call, they will be able
9	We're copying these down as we go along, so I'd	9	to see that presentation. Is that going to happen?
10	like to ask folks to please slow down so we can	10	MR. ROBERTS: No. That's typically not how
11	transcribe those.	11	we do these. Typically, it's just verbal comment.
12	MR. BERNTHAL: Jim Bernthal,	12	CHAIR DANNER: So, yes. The PowerPoint that
13	B-E-R-N-T-H-A-L.	13	you sent in is a written comment that is part of the
14	MS. ARNOLD: Oneida Arnold, A-R-N-O-L-D.	14	record, but it will not be presented tonight.
15	MS. CHURCH: Barbara Church, C-H-U-R-C-H.	15	MR. RALEIGH: Dave, can you tell me what
16	MR. ROBERTS: Okay. Last call for last	16	will be presented other than people telling you some
17	names beginning A through E.	17	words and then also just simply not actually having them
18	MS. BLACKMON: I don't know if you got mine.	18	heard?
19	MS. BROWN: Was it just people on phone only	19	CHAIR DANNER: So people are going to tell
20	or people connected via computers and else who need to	20	us their views on this case. We are not making
21	sign up now? If so, Krys Brown, B-R-O-W-N.	21	presentations tonight. This is a public comment
22	MS. BLACKMON: Michelle Blackmon,	22	hearing. We are hearing your comments, and they will be
23	B-L-A-C-K-M-O-N.	23	made part of the record in the case, and they will be
24	MS. BONSIGNORE: Hi, can you get me now?	24	considered by the Commissioners when they are deciding
25	Julia. Are you guys ready?	25	this case.
23	Julia. Are you guys ready:	23	tills case.
	Page 148		Page 150
1	MR. ROBERTS: Julia, what's your last name?	1	So we are not doing a give-and-take. This is
2	MS. BONSIGNORE: Yeah. Last name is	2	not presentations to the public. This is a public
3	Bonsignore, B-O-N-S-I-G-N-O-R-E.	3	comment hearing where we are taking testimony that will
4	MR. ROBERTS: Thank you.	4	be part of the record.
5	MR. MCKEE: I guess I'll give you my name.	5	MR. GOTTSCHALL: So will the presentations
6	Patrick McKee, M-C-K-E-E.	6	that I submitted, for example, be part of the record?
7	MR. ROBERTS: Thank you, Patrick.	7	CHAIR DANNER: Yes. They will be part of
8	Okay. Any other last names beginning A through	8	the record.
9	E?	9	MR. GOTTSCHALL: Thank you.
10	MR. DAMIANO: Frank Damiano.	10	MR. IVEY: Tony Ivey. Last name, Ivey,
11	MR. ROBERTS: Thank you, Frank. I think we	11	I-V-E-Y.
12	have you on the sign-in sheet.	12	MR. ROBERTS: Thank you, Tony.
13	Okay. Moving on to F through J.	13	MS. HOLLAND: Holland, H-O-L-L-A-N-D.
	MR. GOTTSCHALL: This is Mark Gottschall. I	14	MR. ROBERTS: And the first name for our

L-A-G-E-S-T-E-E. 18 poorly-conceived project. 19 And I called in. I don't know if you have my name from 19 This project is problematic in many ways, and I 20 the call-in sheet. Thank you. 20 want to highlight a couple. The facility has known CHAIR DANNER: All right. Anyone else with 21 safety and environmental justice impacts, adding 21 pollution and risk to an already overburdened community, 22 last names K through O? 22 23 MR. OHLSON: Richie Ohlson, O-H-L-S-O-N. 23 including storage of large quantities of explosive fuels 24 CHAIR DANNER: All right. Thank you. All 24 in an urban area, release of air pollution like methane, 25 right. If there are no more with K through O, let's 25 nitrogen oxide, carbon monoxide, and particulate matter. Page 154 Page 152 move to P through T. 1 And secondly, PSE has consistently greenwashed 1 2 Anyone's last names beginning P through T who 2 this project under the guise of clean energy, and yet 3 has not put their name in the chat or previously signed 3 this project undermines our State commitment and laws 4 up? 4 around climate action by adding these large quantities 5 MS. PONZIO: Rebecca Ponzio, P-O-N-Z-I-O. 5 of methane and climate pollution to the atmosphere. 6 CHAIR DANNER: Thank you. 6 The fact that PSE has moved forward with this 7 MS. PRINTZ: Peggy Printz, P-R-I-N-T-Z. 7 project before all its permits were issued, that there 8 CHAIR DANNER: Thank you. 8 continues to be an appeal in play around the rigor of All right. Anyone whose last names begin U 9 9 its analysis of impacts, and that the Puyallup Tribe and 10 through Z? 10 the broader community have consistently opposed its MR. VOGET: Rich Voget, V-O-G-E-T. 11 development are all important issues to weigh for the 11 CHAIR DANNER: Thank you. 12 12 Commission. 13 MS. VODA: Lorelei, L-O-R-E-L-E-I. Voda, 13 This project is a good example of why utilities 14 V-O-D-A. 14 like PSE need oversight and accountability on their 15 CHAIR DANNER: Thank you. 15 investments and how those should be paid for. As our MR. VAN VOAST: Jordan Van Voast, V-A-N, 16 16 state transitions to low-carbon clean energy, 17 V-O-A-S-T. First name, Jordan, like the river. 17 Washingtonians should not be paying for projects that 18 CHAIR DANNER: Thank you. 18 bring in more gas and result in more climate pollution. 19 All right. Is there anyone who has not given 19 I urge you to deny prudence of the Tacoma LNG 20 us their name who wishes to speak tonight? Okay. 20 Project and ensure ratepayers do not pay for this 21 So -- Claire Richards? 21 harmful project that already disproportionately harms 22 MS. RICHARDS: Yes, that would be me. 22 highly-impacted and vulnerable communities that live in 23 CHAIR DANNER: All right. We've got your 23 the Port of Tacoma. Thank you. 24 name. Thank you. 24 COMMISSIONER RENDAHL: This is Commissioner 25 MS. RICHARDS: Thank you.

Rendahl. It appears that Dave Danner may have frozen,

25

Page 157 Page 155 and I'm going to see if I can find the sign-in sheet 1 format. So we are taking the people who signed up ahead 1 2 that we had. 2 of time first, and then we will go in order of the people who we took just now in line. 3 Unless, Andrew Roberts, you can call the next 3 person and identify the next three people in line. 4 4 So the next person who had signed up to 5 MR. ROBERTS: Okay. So the sign-in sheet I 5 speak -- and I will tell you the next three -- is Glenn 6 have has Becky Rhodes, Marilyn -- I apologize if I 6 Allison, Mark Kaplan, and Pam Leung. 7 pronounce this wrong -- Kimmerling. 7 So, Glenn Allison, are you on the call? And 8 MS. KIMMERLING: Kimmerling. 8 you will have about one minute to make comment, and then 9 9 MR. ROBERTS: Kimmerling. Thank you. we will need to move forward because we have 133 people 10 And Glenn Allison. 10 on this call. So, Becky Rhodes, if you're here, please go 11 So, Glenn Allison, are you available? Okay. 11 first. 12 I apologize for the siren in the background. 12 13 COMMISSIONER RENDAHL: Is Becky Rhodes 13 Mark Kaplan, are you available to make public there? 14 14 comment? 15 MS. GATELESS: Becky, you're on mute. 15 MR. KAPLAN: Thanks, Ann. Mark Kaplan. I 16 MS. RHODES: I didn't want to speak. I 16 actually am going to pass. I think what was discussed 17 thought you just wanted everybody to sign in. 17 at the beginning of the call as far as the reasons to 18 COMMISSIONER RENDAHL: Okay. If you don't 18 not do it sounds sound. So I will defer my comments. 19 wish to speak, thank you. I'm glad you're here joining 19 20 us. And we will move on to the next person. 20 COMMISSIONER RENDAHL: Okay. Thank you. MS. RHODES: And Marilyn is the same. She And, Pam Leung? Pam Leung? L-E-U-N-G? All 21 21 22 thought it was just to sign in. 22 right. MS. KIMMERLING: No, no. I'm fine with 23 23 The next three folks in line on the original 24 24 sign-up list are Frank Damiano, Edmond Lee, and Mary speaking. 25 (Simultaneous crosstalk.) 25 Kern. Page 156 Page 158 COMMISSIONER RENDAHL: Excuse me. 1 Frank Damiano, please go ahead. 1 2 2 MR. DAMIANO: Okay. My statement is 3 MS. KIMMERLING: Yeah. I want to go on 3 specifically about the return on equity. 4 record as being against the rate increase for several 4 COMMISSIONER RENDAHL: Please go ahead. 5 MR. DAMIANO: I'm autistic, and I have a 5 reasons. 6 PSE wants to pass the cost of putting this 6 brain injury, but I can get through this. 7 7 monstrosity together onto the ratepayers. I don't use COMMISSIONER RENDAHL: Yes, you can. Please 8 any natural LNG or methane. They're going to sell more 8 go ahead. 9 than 97 percent of the LNG to private entities for 9 MR. DAMIANO: Since when am I supposed to be 10 10 marine fuel. How does that benefit me or the people of providing a company with a return on investment? I am 11 Tacoma? 11 not a stock to be bought and sold. I'm not an 12 12 I'm outraged at this whole thing. More than 40 interest-bearing account. I'm a customer. 13 percent of the facility's cost is what they want to pass 13 There's no way I should be charged interest on 14 onto us when, as ratepayers, even if you do use LNG, 14 an investment that they're making profit on. I'm paying 15 they're only going to use 2 percent of the LNG produced 15 for a service, and I'm not supposed to be price-gouged 16 at the plant and only for ten years. 16 for a utility, especially when the utility is a 17 This is a boondoggle. If a company is -- a 17 necessity. 18 corporation is a for-profit corporation, then they need 18 Puget Sound Energy has on their website that 46 19 19 to make their money elsewhere than off of the backs of percent of the energy that they provide comes from their 20 20 the people who have no choice. own plants, and they say that more than one-third of 21 So that is my objection to it. I don't want to 21 that is from hydroelectrics. They state that they are 22 22 subsidize their for-profit business. And that's what I the fourth largest wind-energy producer in the United 23 have to say. 23 States. 24 COMMISSIONER RENDAHL: Thank you very much. 24 In other words, they're getting most of their 25 So someone had asked in the chat what's the 25 energy for free. Damn it. Pass the savings onto us.

Page 161 Page 159 1 There. 1 switching to Tesla vehicles. 2 COMMISSIONER RENDAHL: Thank you for your 2 For 50 years now, we have been hearing about 3 comments. 3 the world coming to an end, and each predicted date has passed. Now we are on to another one. Why are we 4 Edmond Lee? Edmond Lee had signed up to speak 4 5 5 in advance. succumbing to these things that are not common sense? 6 Okay. The next person is Mary Kern. 6 Can we please have some strong leadership step up and 7 MS. KERN: Hi. Thank you for the 7 help rein this in and do the common sense steps to 8 opportunity to speak today by all means. 8 continue our already good environmental practices that 9 9 This request for increasing our gas and don't turn the world upside down? 10 electricity is another astronomical hit to the people of 10 The bottom line is we can't afford this high Washington. People cannot afford those, especially hit on another area of our finances. I respectfully 11 11 those on fixed income or low-income folks. request that this increase be declined. Thank you. 12 12 COMMISSIONER RENDAHL: Thank you, Mary. 13 People don't buy new cars because we can't 13 14 afford them. Now the dealerships are telling us that 14 The next three folks in line are Cindy Kisska, 15 they aren't making parts for vehicles in the 2000s. 15 Mark Gottschall, and Chris Rohwer. 16 This is forcing people to buy new vehicles at these high 16 Cindy, are you available? 17 prices, paying higher fees, higher repair costs, and if 17 MS. KISSKA: Yes, I am. 18 electric, maybe paying \$22,000 when the battery needs 18 COMMISSIONER RENDAHL: Please go ahead. 19 19 MS. KISSKA: My name is Cindy Kisska. I've 20 Food prices are doubling. Property taxes. 20 been a Puget Sound Energy electric customer for over 18 Today I received my property valuation notice, and it's years. I've recently spent three years researching 21 21 Puget Sound Energy, 2019, 2020, and '21, and would like 22 up \$154,000, which shows huge increases, again, next 22 23 23 year for property taxes. My property taxes are now to share what I've uncovered. The points I'm going to 24 around \$6,800 this year, and approximately 3,600 of that 24 share are very important to all Puget Sound Energy 25 is for school taxes alone. 25 customers. Page 160 Page 162 Fixed-income folks are being taxed out of their 1 And so the first thing I want to say --1 2 2 homes. Their cut-off point for adjustment appeals is COMMISSIONER RENDAHL: So, Cindy, I'm just 3 too low for marginal folks to get help with the 3 going to ask, because we have a lot of people on the 4 reduction. 4 call, if you can keep your comments to one minute --5 Now PSE is proposing an approximate 20 percent 5 MS. KISSKA: One minute? 6 increase in gas and electric. If this is to support the 6 COMMISSIONER RENDAHL: Yes. And if you have 7 Green New Deal, then I suggest you get it from the Fed's 7 something --8 8 new \$2 trillion Inflation Reduction Act, which includes MS. KISSKA: One minute? COMMISSIONER RENDAHL: If you have 9 huge funding for the Green New Deal. The Green New Deal 9 10 10 will now need a 1,000 percent increase in mining to something -support wind and solar to meet the needs for energy 11 MS. KISSKA: One minute? 11 12 12 replacements for oil and gas. COMMISSIONER RENDAHL: Yes. 13 13 Currently, California can't even supply their MS. KISSKA: Excuse me, ma'am. We have one 14 own needs and are telling people to shut down their air 14 day that we can call in a year, even just one hour, and 15 conditioning and other items from approximately 4:00 to 15 now you're telling me I have one minute? Excuse me? 16 You people should spend a little more time listening to 16 8:00 p.m. 17 Years back, PSE was encouraging folks to 17 18 convert to gas as it was supposed to be cleaner and 18 COMMISSIONER RENDAHL: So I have a 19 cheaper, so folks invested huge dollars to make those 19 suggestion. If you have something in writing you would 20 changes. Now another change is being requested to 20 like to submit to us, we --

6 (Pages 159 to 162)

MS. KISSKA: No. I want to speak it. I

customers at Puget Sound Energy -- okay. So let me

convert to solar.

My suggestion is to follow the money on these

decisions. Well, we know that certain people are making

issues to find out who exactly is profiting from these

big investments into Tesla, as the government is now

Page 163

multiyear rate plans. Instead, they should be held to account every single year so they're forced to be completely transparent.

2.4

Right now, it is a known fact that Puget Sound Energy has not been transparent about their finances. On July 28th of this year, the Public Counsel Unit of UTC became involved in two court cases against Puget Sound Energy. The testimony at court revealed that Puget Sound Energy has lied and been dishonest many times, manipulating and misrepresenting their financial facts to try to get more money.

Shocking that this is our utility company and who you, the Commissioners, have to deal with. It's impossible to find the honest truth when dealing with Puget Sound Energy, and we, the customers, bear the cruelty of their dishonesty.

Another thing is, when we are lumped in, that the Commissioners say -- sorry -- the AGO, the Attorney General's Office, says that the shareholders' interests and the customers' interests and all the interests are supposed to be treated fair, equal, et cetera.

And shareholders' interests and customers' interests are completely different because we need -- our interests are keeping our houses warm and being able to afford Puget Sound Energy's ever-rising electric

Page 165

COMMISSIONER RENDAHL: Okay. Thank you.
We are going to move on to Mark Gottschall. Is
Mark Gottschall on the call? Mark Gottschall?
Okay. The next person who had signed up to
speak is Chris Rohwer. Is Chris Rohwer available?

MR. ROHWER: I am. Thank you very much.
COMMISSIONER RENDAHL: Thank you. Go ahead.
MR. ROHWER: Yeah. I want to tailgate on

Mary Kern's comments.

The announcement for the rate increases indicated decarbonization and State mandates. Now, we can deal with our State legislatures on the mandates. It would be interesting to know what they are. But where are we headed with this decarbonization situation?

Let's review the bidding. What's happening in Germany? Germany is shutting down -- has shut down several of their nuclear plants in an effort to decarbonize their system. They then became dependent on natural gas from Russia. That supply has been shut down, and Germany is suffering some of the greatest rate increases and cost increases for energy in their history.

The CEO from ArcelorMittal in Germany said,
"With a tenfold increase in gas and electricity prices,
which we had to accept within a few months, we are no

Page 164

bills. Shareholders' interests are just a matter of making more money. And that way, it's like Puget Sound Energy is making the wealthy even wealthier.

You know, this is really sad to me that you're, like -- I'm having to hurry. I have a lot to say, and I can't even say it properly because I feel so stressed because I have no time to say it. And you people seriously -- how can you tell us that we only have one minute to speak a year? A year.

MS. BONSIGNORE: Listen, ma'am. You're not the only one waiting to talk. So just let us talk. Take your time.

MS. KISSKA: Can I take my time? Because it has to do with everybody here. These are things everyone should know.

COMMISSIONER RENDAHL: So, Cindy, please take another minute or so. There are other people who are waiting to speak as well. And I appreciate --

MS. KISSKA: Can I let everyone speak first, and I'll speak at the end? How's that? How's that?

COMMISSIONER RENDAHL: If we have time at the end. I appreciate your comments.

MS. KISSKA: Please let me speak at the end. Please take the time to hear what I have to say. Let everyone else speak first. I don't mind. Okay?

Page 166

longer competitive in a market that is 25 percent supplied by imports. We see an urgent need for political action to get energy prices under control immediately."

One baker in our local area has seen the monthly gas bills go from 3,000 euros earlier this year to 11,000 euros. That's a huge increase. Are we headed that way with our decarbonization program?

California, who has abandoned base load, reliable, continuous energy sources is now 37 percent dependent upon imported energy with 35 percent solar and wind. So at 4:00 p.m. in the afternoon, when the sun goes down, the energy demands go up, and the energy is not there. California is suffering blackouts due to this approach to energy -- deconstructing our energy system -- our reliable energy systems.

Is Washington going to follow the footsteps of Germany, UK, California, to totally unreliable and disastrous energy policies of decarbonization? Is Washington State and Puget Sound Energy going to ignore the hundreds of scientists that condemn the so-called climate crisis claims in high-risk, low-reward green energy policies? Is Puget Sound Energy going to leave their customers like me high and dry without ready, reliable, and affordable supplies?

Page 169 Page 167 And by the way, why wasn't affordability reliable energy without this increase and that you 1 1 2 mentioned as one of the objectives of this Commission 2 discuss recovering your operating costs. How are your 3 and of Puget Sound Energy? They offer reliable and 3 customers, your clients, supposed to recover their safe, but not affordable? And I'm not even sure it's 4 4 operating costs by you passing on this increase to them? going to be reliable anymore. Look what's happening, 5 5 And I think that Frank mentioned that --6 again, in Germany and the UK and California. 6 (Interruption in the proceedings.) 7 I pay an average of about \$250 a month for 7 COMMISSIONER RENDAHL: Sorry. 8 gas --8 Marilyn Kimmerling, if you could please mute 9 MR. ROBERTS: You're well over a minute at 9 your line so Teresa Holland can finish. 10 this point. 10 Go ahead, Teresa. MR. ROHWER: I'm almost done. MS. KIMMERLING: I was talking to my dog. 11 11 So I'm asking, can you guarantee that our rate 12 12 Sorry. increases won't be eventually three times or ten 13 13 MS. HOLLAND: Thank you, Ann. 14 times -- ten times is a thousand percent -- after you 14 And I agree with Frank on the return on equity. 15 decarbonize our energy systems? 15 That is -- you know, as a finance major, I find this COMMISSIONER RENDAHL: Thank you. 16 16 ludicrous that we are paying for either your failures in 17 So the next speaker is Toni Kornec. Is Toni 17 your investments or that you want to make more money on 18 Kornec available? 18 your investments. 19 MS. KORNEC: I choose not to speak. Thank 19 I don't know anybody that is making 9.9 percent 20 20 on anything. Look at the stock market right now. I you. COMMISSIONER RENDAHL: Okay. Thank you. mean, it's crazy out there. Look at people's pension 21 21 The next person who signed up was Vicky Cully. 22 22 plans. People are suffering. The next after that is Teresa Holland, and then the last 23 23 And then -- okay. Finally, this is my closing 24 person on the original sign-up list is Julia Bonsignore. 24 statement. You are proposing a 19.62 percent increase 25 So, Vicky Cully, if you're available, please go 25 from 2023 to 2025. This is in the midst of a historic Page 168 Page 170 ahead. Again, Vicky Cully. recession, spiraling inflation, that's really going to 1 1 2 2 MS. CULLY: Yeah. I just unmuted. I was spiral out to double-digit inflation. 3 3 mainly here to get information. I think people are If any of you were alive during the late '70s 4 summing up what I had wanted to say. 4 or early '80s, you know what this means. This is not 5 In a nutshell, we can't afford this. We 5 the time to do this. I'm not saying that you don't 6 simply -- most of us cannot. And I appreciate 6 have -- you shouldn't have the ability to raise rates, 7 7 but this is not the time. Thank you for your time. everybody's comments. They're really excellent. Thank 8 8 Appreciate it. 9 COMMISSIONER RENDAHL: Thank you very much, 9 COMMISSIONER RENDAHL: Thank you. 10 And the last person who signed up on the 10 Vicky. original sign-up list is Julia Bonsignore. After this, 11 11 Teresa Holland, you're next. 12 I'm going to turn it over to Chair Danner, who is back 12 MS. HOLLAND: Hi, there. Thank you for 13 online. 13 having me. I just have a few points to make and then a 14 So, Julia, please. 14 comment to the Commission. MR. GOTTSCHALL: Sorry to interrupt. This 15 15 I agree with Chris about the decarbonization of is Mark Gottschall. I don't know if you skipped past 16 16 our energy systems. I think we should take a great 17 me, but I am on the official sign-up. 17 pause in this for right now. We have so many forces in 18 COMMISSIONER RENDAHL: Okay. I did call 18 our economy and in our country now that this is not the 19 your name, and you didn't respond. After Julia, we will 19 time to do this. I really don't think it is. 20 come back to you, Mark. Thank you for letting me know. 20 A couple things. The reason I'm here is

8 (Pages 167 to 170)

MR. GOTTSCHALL: Thank you.

My name is Julia Bonsignore. I am a renter in

COMMISSIONER RENDAHL: Julia, go ahead.

Bellingham, Washington, where things are very expensive

MS. BONSIGNORE: Yes. Thank you very much.

Page 173

Page 174

My property manager e-mailed us about a proposed large increase to electric and gas. I called UTC yesterday and asked, what is the reason for this? And all she said was that all prices are going up, to which I said, incomes are not. Myself and my partner are on fixed incomes. We can only make so much money.

and overpriced.

And we are not the only ones.

Bellingham, especially, has a very big homelessness problem, and I agree with others who think that this could cause more people to go into homelessness or other people just to live under incredible stress, stress that we do not need.

I agree with all the statements made by other people who shared, especially the first woman who spoke, and all the information that everyone else is giving is just more reason for me to agree and feel strongly. Electricity is not a luxury. It is a utility. We do not have a choice. We just need utilities. Thank you very much.

COMMISSIONER RENDAHL: Thank you, Julia. Mark, please go ahead. MR. GOTTSCHALL: Oh, is this my turn? Thank

you.COMMISSIONER RENDAHL: It is your turn.

owners of Puget Sound Energy. All of the owners do not

live in the United States. The United States is a

3 friend nation to the foreign nations of Canada, the

4 Netherlands, and Australia, who are the owners of Puget

5 Sound Energy. These owners combined manage \$1.478

trillion -- trillion with a T -- in managed assets.

This is the conglomerate, the owners, of Puget Sound Energy.

So who's asking for this? Well, Puget Sound Energy is actually owned by Puget Energy, Incorporated, because we can incorporate in the state of Delaware, which is actually owned by Puget Holdings, LLC.

Okay. Well, who is Puget Holdings? That is PGGM, otherwise known as PFZW, which is a pension investor from Zeist, Netherlands. There's Alberta Investment Management Corporation from Edmonton, Alberta. There's British Columbia Investment Management Corporation from Victoria, British Columbia. There's OMERS Pension Plan from Toronto, Ontario, actually part of the larger continent of Canada, if you want to call it a continent.

COMMISSIONER RENDAHL: Mark?
MR. GOTTSCHALL: And there's Macquarie Asset
Management, which is from Sydney, Australia.

So collectively, they sit atop of \$1.478

Page 172

MR. GOTTSCHALL: Thank you. I submitted a PDF, which I was told was okay, but apparently it's not. So I'm going to speak to what was in the PDF. And so I'll just call out slides that no one can see if I knew where to put it other than with the UTC.

So what is at stake here? It's the multiyear rate increases for both gas and electric utilities. The pace of rate increases has not stopped and will increase due to changes in legislation, and the legislation we're talking about is legislation brought about in Washington State.

Profits based on we, the ratepayers -- that's the people on this call, for the most part -- are not being invested into other forms of energy even though there are and will be hydroelectric shortfalls in coal plant closures. Profits are being used to lobby the Washington State legislature to benefit the owners of Puget Sound Energy.

Now, is there motivation for this investment? Well, there's minimal motivation for Puget Sound Energy to address climate or green-related energy solutions and investments in a foreign country. We, the United States, are a --

MR. ROBERTS: Past a minute.

MR. GOTTSCHALL: -- foreign country to the

trillion. So --

COMMISSIONER RENDAHL: Mark, thank you. You are -- I'm sorry. There are many other people waiting to speak. The PowerPoint that you have submitted to us will be available and be made a part of the record, which will be publicly available to everyone.

MR. GOTTSCHALL: So I can't complete, then?
COMMISSIONER RENDAHL: You should wrap up
your comments now so other people can speak.

MR. GOTTSCHALL: All right. So I will wrap up the comments to the last slide.

Basically, I'm opposed to the rate increase. As a business entity, Puget Holdings, LLC is doing exceptionally well, financially speaking. They have pitched forward in their own decks, which you can look at, 10 percent -- roughly 9.9 percent to their investors. They went on the road. They called it the road show to talk about the 9.9 percent investment that you could own.

The way they're getting that, the way the pension funds are being funded in Canada, is on our backs. We, the United States ratepayers, who own these resources. They are in our state, and we are being -- we are paying to use our own resources thanks to Puget Holdings, LLC.

Page 175 Page 177 1 COMMISSIONER RENDAHL: Thank you, Mark. think benefits them. 1 2 MR. GOTTSCHALL: So I'm against it. Thank 2 Puget Sound Energy should not be rewarded for 3 you. 3 the blatant disregard of their customers and the environment. They need to be more accountable for their 4 COMMISSIONER RENDAHL: Okay. Lester, I have 4 5 5 your name on the list. history of poor community engagement, accountable for 6 And, Chair Danner, how about I read off the 6 their misrepresentation of environmental concerns, 7 names on the list, if you are there, and then you can 7 accountable for their lack of transparency, and 8 8 accountable for their continued support for polluting have the folks call in. 9 9 So the next person -- and this is from the energy sources. 10 phone call -- is Lynn Fitzhugh. Then after that, 10 Thank you, Commissioners, for all your work in Barbara Church, then Iris Antman. holding Puget Sound Energy accountable and protecting 11 11 12 So, Lynn, please go ahead if you're on the ratepayers and listening to my concerns. 12 13 13 COMMISSIONER RENDAHL: Thank you. call. CHAIR DANNER: Thank you. Commissioner 14 14 And the next person on the list was Iris 15 Rendahl, just be aware that my connection is very 15 Antman. 16 unstable. So --16 Please go ahead, Iris. 17 COMMISSIONER RENDAHL: Would you like me to 17 MS. ANTMAN: Thank you. I encourage you to 18 18 deny Puget Sound Energy's proposed rate increase. keep going? 19 CHAIR DANNER: Yeah. I am listening -- I'm 19 PSE will use this money to pay for the Tacoma sorry. Someone --20 liquefied natural gas facility built on the Puyallup 20 COMMISSIONER RENDAHL: I'll keep going. 21 Tribe's tide flats, opposed by the Tribe for years, and 21 22 Okay. 22 which began operations last May, even while facing legal 23 CHAIR DANNER: All right. Just know I also 23 permitting challenges from Earthjustice lawyers have a cell phone, and I'm listening in. 24 representing the Tribe. 24 25 COMMISSIONER RENDAHL: Got it. Okay. 25 The pollution from this facility will Page 176 Page 178 So Lynn Fitzhugh, then Barbara Church, then 1 disproportionately impact already overburdened and 1 2 2 marginalized communities like the Tribe as well as Iris Antman. 3 Lynn, are you available? Okay. Lynn Fitzhugh? 3 immigrants living in the Northwest Detention Center. All right. I'm not hearing Lynn, but if you 4 4 Liquid natural gas is not a cleaner replacement 5 come back, we'll take you. 5 for maritime fuel, as PSE claims, and agreed upon by 6 Barbara Church, then Iris Antman, and then 6 both the International Maritime Organization and the 7 Jordan Van Voast. 7 World Bank, and continued investment in this energy 8 MS. CHURCH: Thank you. My name is Barbara 8 source will not only worsen the climate crisis, but 9 Church, and I'm a Northeast Tacoma resident just within 9 result in stranded assets as large energy industries are 10 a two-mile radius of the LNG plant. I'm calling to let 10 moving towards clean-energy technologies. you know I stand with the Puyallup Tribe in strongly 11 11 PSE asserts that public demand for natural gas opposing the Puget Sound Energy's rate hike. 12 12 will increase, but this ignores the reality of growing 13 What's so upsetting to me is Puget Sound 13 public demand for electric heat pumps instead of gas 14 Energy's deceptive marketing. PSE must not be rewarded for sticking with its 19 Currently, they're asking for the 19 twentieth-century business model. Please deny their 20 17-to-20-percent rate increase. Most ratepayers don't 20 requested rate increase. Thank you. 2.1 even know that it's to pay for the 43 percent of the 21 COMMISSIONER RENDAHL: Thank you very much. 22 refinery's construction cost. That amounts to \$133 22 Next is Jordan Van Voast, then Fran Korten, 23 million. \$133 million, they want, for the resident 23 then Shawn Arent. 24 ratepayers to absorb that cost. They want our community 24 Jordan, are you available? 25 to pay for a refinery that they didn't support and don't 25 MR. VAN VOAST: Yes. Can you hear me?

Page 179

COMMISSIONER RENDAHL: Yes, I can. MR. VAN VOAST: Good evening. My name is Jordan Van Voast, and I'm a former PSE ratepayer.

2.4

Because of my racial and economic privilege, I was able to place 37 solar panels on my roof, install a heat pump and an electric induction cooktop, and subsequently instruct PSE to cut their gas lines at the street in order to minimize the inherent fire danger from gas explosions.

As Hurricane Ian is tragically demonstrating right now, we are in a climate emergency. And decision-makers like the members of this Commission are the ones who will determine whether we have a sustainable future --

(Interruption in the proceedings.)

MR. VAN VOAST: Somebody's got their --CHAIR DANNER: Dave, if you can turn your line mute, that would be -- your computer on mute. Thank you.

MR. VAN VOAST: I'll start that sentence over.

As Hurricane lan is demonstrating right now, we are in a climate emergency. And decision-makers like the members of this Commission are the ones who will determine whether we have a sustainable future or allow

Page 181

live on Bainbridge Island. My energy comes from Puget Sound Energy. I'm a member of the Washington Clean Energy Coalition, where I represent Climate Action Bainbridge.

Today, I urge you not to approve PSE's request for a rate increase. PSE has consistently refused to reveal data critical to understanding their models. It is not clear why they need to build a new gas plant right when our State law demands that they get off of fossil fuels.

They are proposing various new transmission lines, even though those have been vehemently opposed by the communities they intend to serve, and they are building a liquefied natural gas plant that, as others have mentioned, will mostly export gas out of our state and country.

PSE uses these projects to justify their rate increase. PSE should reject these justifications, and they, of course, also want to increase their profit margin. But their behavior in hiding data, being unresponsive to citizen input, and their slow acquisition of renewable energy sources should not be rewarded. In fact, the UTC should reduce their profit margin in recognition of their poor performance.

Thank you for this opportunity to comment.

Page 180

business-as-usual decision-making to push our world past greenhouse gas tipping points that is already affecting the most vulnerable communities.

Rewarding PSE with permission to increase rates sends the wrong message. Huge infrastructure projects like the Tacoma LNG facility are steeped in environmental racism impacting the Puyallup Tribe and disaster capitalism that reward a few people at the top while ultimately penalizing all life for future generations. Thank you.

COMMISSIONER RENDAHL: Thank you.

I'd like to ask people to please refrain from making personal comments on the comments in the chat. This proceeding and the chat function is simply -- the proceeding is to get your comments on the record. It is being recorded, and we will be putting it in the record.

If you could please just use the chat for letting us know you want to speak and any technical issues, that would be greatly appreciated.

Fran Korten, please go ahead.

MS. KORTEN: Yes. My name is -- can you hear me?

COMMISSIONER RENDAHL: I can hear you. Please go ahead, Fran.

MS. KORTEN: My name is Fran Korten, and I

Page 182

COMMISSIONER RENDAHL: Thank you. So next is Sean Arent, and then Neal Anderson, and then Don Marsh.

So, Sean Arent, if you're on the line, please go ahead.

MR. ARENT: Good evening, folks. Let me just say what we're all feeling.

Private, for-profit utilities shouldn't exist.

Our little power in electricity belongs in the hands of the people. People are here to make their voices heard, but this Commission is not required to listen. The best way to require that is through democratization.

You, the ratepayers, have the power to stop this. If this increase goes through, I want to implore you all to organize. You literally pay PSE's bills, and all together, you don't have to do that. I think something like a ratepayers' union could be created, and people could take the power back, literally.

I think this Commission probably doesn't want that to happen. I think it's worth creating a credible threat. I think at least two of you had pretty good consumer protection backgrounds. I'm not so sure about the Verizon guy. But I think you all will make the right decision here, and I hope you do so. Thanks.

COMMISSIONER RENDAHL: Thank you.

Page 183

Neal Anderson, are you available?

MR. ANDERSON: Yes. And I'm here as a PSE ratepayer.

And I understand that building the clean-energy future will take money and that rates may go up as a result, but that's not what PSE is building. Instead, they're doubling down on more fossil fuels. They want us to pay for their LNG tank, and in their 20-year plan, they're still talking about new gas power plants.

The International Energy Agency has said that the only way to stay below 1.5 degrees is for all spending on new fossil fuel projects to stop immediately. And on the day when we're seeing a record-setting storm surge in Florida with countless homes being destroyed as we speak, do we really want to wait and see how much worse 1.5 degrees will be before starting to act?

PSE is helping push us over the edge of this climate crisis, and they're here tonight asking us to pay for it. I ask that you reject this request and tell them to come back with a plan that describes how they're going to transition away from fossil fuels. Then they can ask for a rate increase. Thank you.

COMMISSIONER RENDAHL: Thank you. Next is Don Marsh, and then after that is Jim

energy bills for decades to cover principal and interest payments.

Now these projects and others have been built, and PSE wants us pay for them. We feel we must communicate with PSE in the only language the company respects: Dollars and cents.

Page 185

If the Commission finds PSE's projects prudent and allows full recovery of the company's costs, plus a generous 10 percent return on investment, nothing will change. PSE will continue to pursue projects that pump up its revenues and boost its bottom line, regardless of the costs to ratepayers.

Please represent our interests and let PSE know, in no uncertain terms, that the company must consider the goals and aspirations of current ratepayers and all those who come after. Thank you.

COMMISSIONER RENDAHL: Thank you. Jim Bernthal?

MR. BERNTHAL: Yes. Hi. I am a PSE customer in Seattle. Fortunately, I don't have to buy your electricity, PSE. I'm sorry. I'm speaking with the UTC. I understand that.

But I am very, very strongly opposed to this rate increase for a number of reasons, and the biggest of which is -- the indications I have is that PSE

Page 184

Bernthal, Rob Briggs, and Stacy Oaks.

So go ahead, Don Marsh.

MR. MARSH: Hi. I'm Don Marsh. I lead the Washington Clean Energy Coalition. Our members are volunteers with many years of participation in PSE's integrated resource plan advisory groups and previous hearings of this Commission.

We submitted a written comment on PSE's general rate case signed by 38 organizations, and the letter was also endorsed by 450 individual ratepayers residing in most of the cities and towns PSE serves.

We strongly object to the size of PSE's proposed rate increases. Contrary to PSE's public claims, these increases are not focused on cleaner energy or significantly improving the reliability of our service. Instead, PSE seeks compensation for expensive and damaging projects of questionable benefit to customers.

We cite three examples in our letter: The Tacoma LNG plant, the Energize Eastside transmission upgrade, and the Lake Hills transmission line. Each of these projects was vehemently opposed by PSE customers, not just because they were damaging to our communities and the environment, but also because they had no obvious benefit for PSE ratepayers who must pay higher

Page 186

continues to refuse to look for clean-energy alternatives and instead is taking the ratepayers' money to, as people have pointed out before, finance very destructive projects like the LNG plant in Tacoma. So the basic bottom line is I strongly oppose this rate increase.

I also want to put into the record that the testimonies given verbatim by five people already -- and I know there are more to come -- are also exactly my testimony. Those people are Rebecca -- who was the first person to speak -- Rebecca -- I don't remember her last name -- from Washington Environmental Council, Barbara Church, Iris Antman, Fran Korten, and Neal Anderson, all of which addressed points that are incredibly much in line with my thoughts on this matter. So please take their record as part -- my record as being exactly the same as theirs.

And thank you for the chance to take this input. UTC, please stand up and do what it takes to democratize these utilities. They're a terrible threat to our planet's future. Thank you.

COMMISSIONER RENDAHL: Thank you. So next is Rob Briggs. After Rob is Stacy Oaks, and after Stacy is Todd Lagestee.

Rob, go ahead.

12 (Pages 183 to 186)

Page 187

MR. BRIGGS: Good evening. I'm Rob Briggs, a Vashon resident. I'd like to speak to the question of whether Tacoma LNG belongs in the rate base.

Tacoma LNG was not the least reasonable cost solution to meeting gas demand. The least reasonable cost solution was to stop promoting gas and to suspend new gas hookups, thereby ensuring adequate capacity. It's a no-cost solution that obviates any gas grid rationale for Tacoma LNG in the rate base.

Building Tacoma LNG without first obtaining the necessary permits was not prudent. Building Tacoma LNG without first resolving treaty rights of Native Americans was not prudent. Building that 1.7-million-gallon LNG tank containing the energy equivalent of 11 Hiroshima-sized bombs in a populated area, which could ignite due to earthquakes or malice, was not prudent.

Please don't force ratepayers to pay for PSE's mistake. Thank you.

COMMISSIONER RENDAHL: Thank you. Stacy Oaks, please go ahead.

MS. OAKS: Yes. Thank you. My name is Stacy Oaks, and I oppose all the requested rate increases by Puget Sound Energy. I stand with the Puyallup Tribe in strongly opposing the Tacoma LNG  $\label{eq:page_page} {\tt Page \ 189}$  MR. ROBERTS: We're over a minute.

COMMISSIONER RENDAHL: If you can try to wrap up, that would be great, Stacy.

MS. OAKS: Sounds good.

A few of those other things that they're invested in is advertising at children to make them interested in fracked gas and also in advertising to get social media influencers to gush over gas stoves while they know full well that children in homes with gas stoves are 42 percent more likely to have asthma, and they keep doing it anyway.

So basically, people are here, and I know that people are frustrated, and that's probably really hard for you guys as Commissioners to hear. But basically, we're here with one minute to beg you, the only people that can protect us from this monopoly, to protect us, to save us from this.

So, you know, I really hope that you guys do the right thing and deny these rate increases. Puget Sound Energy clearly doesn't need any more money. Thank you.

COMMISSIONER RENDAHL: Thank you very much. Todd Lagestee?

MR. LAGESTEE: Hi. Can you hear me? COMMISSIONER RENDAHL: I can hear you.

Page 188

facility, which is still in court proceedings and might never provide any benefit to residential customers.

People are barely getting by right now, and I think that's obvious to everyone. This increase could mean having to pick between having heat during the winter or not having another necessity like food or medicine.

We know that PSE doesn't need this money. Let's just take a moment to think about what PSE spends their money on. Puget Sound Energy spends more on lobbying and campaign contributions than Amazon and Google. So it is not an insignificant amount.

Another thing that they like to spend their money on is squashing local attempts to create public power, as been talked about. So when Thurston County tried to create a PUD instead of Puget Sound Energy, it became the most expensive election in that county's history because of all of the money that Puget Sound Energy dumped in to defeat that.

They also spend a lot of money on PR campaigns. I know that Barbara Church mentioned earlier about all of the fancy ads about how they're doing this renewable energy, even though we know, based on what they're asking for here, that's not actually what they invest in

Page 190

Please go ahead.

MR. LAGESTEE: Thank you. My name is Todd Lagestee. I'm here as a private citizen. I'm unequivocally opposed to any rate increase for Puget Sound Energy.

Currently, PSE has an authorized 9.4 percent return on equity. That is too high for a monopolistic enterprise authorized by the government. Inflation is hurting regular people, and PSE can and should accept a lower rate of return in order to help regular people, and the UTC should make that happen.

PSE has made guaranteed profits for years and now wants to externalize the costs of the Clean Energy Transformation Act onto ratepayers. This should also be opposed by the UTC.

If for some reason the UTC can't agree with the previous reasons for opposing the PSE rate increase, then I hope you will consider the Washington State Attorney General's well-researched and well-stated position opposing the PSE rate increases.

I was a nuclear operator on submarines in the Navy. I know a little bit about power generation. I've also been a professional union firefighter for over 20 years. I go into people's houses, and I see them struggle now.

Page 191

Now is not the time for a monopoly to increase its return on equity. I hope the UTC will deny this rate increase and give PSE a cut in profits just like many of us regular people are having to deal with in this difficult inflationary environment.

Arnold.

And then the last thing I'd just like to point out is that Jefferson County did municipalize their electricity supply and distribution away from PSE, and they voted on it in 2008. They authorized it in 2010, and now their rates are about equivalent to what PSE is. Their base rate is three times higher, but their per kilowatt-hour is less, and so that basically makes it even.

And so I hope everybody here is listening and they are considering, and the UTC, I hope, will listen and say, how can we assist our citizens in this state in going away from monopolistic for-profit entities providing utilities? Thank you.

COMMISSIONER RENDAHL: Thank you.

Next is Oneida Arnold, then Rich Voget, and then Krys Brown.

Oneida are you available?

Oneida, are you available?

MS. ARNOLD: I am. My name is Oneida

Ratepayers versus shareholders. I'm deeply

1 Brown, and after you is Mary Kern.

Rich, please go ahead.

MR. VOGET: Rich Voget, and I care about fairness.

In 2019, our State legislature passed the 100 Percent Clean Electricity Bill requiring utilities to stop generating any electricity from fossil fuels by 2045. At that time, PSE generated almost 60 percent of its electricity from coal and natural gas. It is fair to only allow incremental rate increases to pay for infrastructure as PSE incrementally converts to electricity.

Page 193

We seem to be at a tipping point in our democracy. Puget Sound Energy started building the LNG facility in Tacoma without building permits. Their attitude was, we're so big and powerful, we don't need no stinkin' permits. Is that the society we want to become, where the rich and powerful can do anything they want? Where is the fairness in that? To be a nation of laws, there have to be consequences for breaking laws.

I urge you to impose consequences by denying a rate increase for recovering the building expenses of the LNG facility. It is not fair to grant a rate increase to provide more return on the shareholders' investment. It is not fair to grant a rate increase to

Page 192

concerned about the use of a liquefied natural gas facility in the tide flats. This highly polluting and risky facility is located less than a mile from homes, churches, daycare facilities, and schools, one of which I retired from, McCarver Elementary on Hilltop.

We are living in unprecedented times of rapidly changing climate brought on by the continued and increased use of fossil fuels, of which LNG is one. There is general scientific policy consensus that the greenhouse gases emitted by LNG compromise State and agency climate goals and impede the transition to a low-carbon economy.

During its environmental review process, Puget Sound Energy indicated that only one or two percent of the total production at the facility would be used to benefit ratepayers. Why now are they asking for ratepayers for 43 percent of the cost to build that facility?

This is an ill-conceived, expensive, and harmful project that harms vulnerable communities living near the Port. I stand with the Puyallup Tribe in opposition to PSE's rate increase and indeed the entire LNG debacle itself. Thank you.

COMMISSIONER RENDAHL: Thank you. Rich Voget, you are next. After you is Krys

Page 194

bump up the CEO's pay package. And it certainly is not fair that ratepayers should pay for this expensive and poorly-conceived project that speeds global warming and disproportionately harms highly-impacted and vulnerable communities that live near the Port of Tacoma. Thank you.

COMMISSIONER RENDAHL: Thank you. Next is Krys Brown. After you is Mary Kern, and then Orion Canning.

Go ahead, Krys Brown.

MS. BROWN: Thank you. I want to say that I stand in solidarity with the Puyallup Nation in their opposition to the LNG facility, and I stand in solidarity with everyone that has spoken against this rate increase.

I can't speak to everything they have spoken to in one minute. What I can say is that I'm a recent committee officer for the Thurston County Democrats, PCO-207.

I represent my direct community. I live in a low-income, income-restricted property that is primarily housing low-income people, people on Disability, people on fixed incomes. I represent, in my complex alone, 160 voices. So I want you to understand that I am not one person. I am speaking for over 200 homes in my

Page 195

rage

And rate increases directly affect everyone.

Many of the elderly and disabled people in my complex lose their power and have their power shut off every winter because of the mandatory increases when we need

heating. This is disgusting. It's despicable.

2.0

neighborhood.

And I want to thank Shawn for putting that interest form out there because we need to come up with better solutions. I have learned so much in this past -- I don't know -- hour and a half that I've been on this call, things that I didn't know and am absolutely terrified and disgusted by PSE's practices.

I just came on here to say, you know, hey, we're poor, and these things mostly just affect poor people disproportionately. You know, you aren't going to see a lot of people here who can afford their bill every month complaining.

But it is a monopoly, and we need to talk about monopolies because those aren't supposed to be kind of permissible in a democracy, and yet here we are with a monopoly on power. We had these ten or something years of --

MR. ROBERTS: Over a minute.

MS. BROWN: Okay. I'm wrapping up.

-- get solar on your roof. Get solar on your

Page 197 incentivizing the building of this facility. There's

this regulatory compact that says that utility companies

have to provide energy to everyone at the lowest possible cost, but there's this loophole that if they

build a facility, they can pass that cost on to the

people who are paying for those services.

So that's why they're building this. It's a nationwide problem. And we should change those regulations. So instead of incentivizing just building new facilities that don't actually help anybody, we should be incentivizing, well, maintenance for one thing.

Just a couple years ago in Seattle, there was -- or this was in February 2021. There was an explosion, an underground explosion, because PSE didn't replace an old gas pipeline. These things are happening all over the country because our regulations don't incentivize maintenance, and that's a big thing. It should also be incentivizing clean energy, of course, especially with climate change happening.

MR. ROBERTS: We're over a minute.

MR. CANNING: So, yeah. I think it should be a publicly-owned utility, really, but since we can't have that, we should be regulating them in a way that actually serves the people and the communities that

Page 196

roof. But even getting solar on your roof or on your property or building a whole solar field on your land -- you are still forced to be on the grid and feed back into the grid, and all you're giving yourself is a discount on their monopoly. And that is not fair.

So please listen to the fact that I am 200 families, 200 homes, saying no to an increase in the rates for everyone. Not just my county, not just Pierce County, everyone. No one deserves to foot their bill. Thank you.

COMMISSIONER RENDAHL: Thank you. Next is Mary Kern, then Orion Canning, and then Esther Day.

So, Mary Kern, please go ahead.

 $\,$  MS. KERN: Thank you. I was on the list, so I've already spoken. So thank you.

COMMISSIONER RENDAHL: Thank you for reminding me.

Orion Canning, are you available?

MR. CANNING: Yeah. I just want to say that I oppose the rate increase. I stand with the Puyallup Tribe opposing the LNG facility, and I want to say thank you to the people who spoke before me.

I want to talk a little bit about the history of the regulations that are leading -- that are

Page 198

they're supposed to be serving instead of just exploiting them for profit. Thanks.

COMMISSIONER RENDAHL: Thank you. Esther Day, then Michelle Blackmon, and then Jennifer Keller.

Esther Day, are you available?
MS. DAY: Yes, I am. Can you hear me?

COMMISSIONER RENDAHL: Yes, I can.
MS. DAY: Thank you, Ann, and thank you,
erybody, for standing up for -- against the

everybody, for standing up for -- against the ratepayers' -- the increase in rates.

I'm a ratepayer in Tacoma, and I am really -- I stand with the Puyallup Tribe, and I support what the Attorney General and the Washington Clean Energy folks are saving.

I also want to say, this looks a lot like Enron. I mean, my family suffered because of Enron and all the crap that they were doing. Excuse my French. But my problem is also that that facility is on a river port. And on top of that, it is so dangerous to have it there.

Go to the Internet and look for the explosion that occurred in Beirut on the waterfront. It exploded so badly, it was like a nuclear bomb going off. We should never, ever place anything like this on our tide

Page 199

flats. Because why? It is not built for that, and it is a river port. It is not a deep sea port.

2.1

I thank you very much. I am against this rate increase, and I stand united with everyone. Thank you.

COMMISSIONER RENDAHL: Thank you.

Next is Michelle Blackmon, then Jennifer

Keller, then Pedro Valverde.

Go ahead, Michelle Blackmon.

MS. BLACKMON: Thank you. I am a ratepayer in Renton, Washington. And I'm here just as a private citizen, but I agree with what everyone has been saying. I am not familiar with all of the logistics that have been going on with Puget Sound Energy, and I am so thankful to be on this call to hear a lot of information that I didn't previously know.

But just from my own personal experience, I have found Puget Sound Energy to be very discounting of issues that I have had with my electricity, and they have not wanted to deal with me and to act in what I perceive to be a good manner in helping resolve my issues, and trying to blame it on me and saying that it was issues in my house, and I hired an electrician to come and look and see what was going on, and provided very specific information to me that it was not my problem. It was Puget Sound Energy's problem, but they

Page 201

by chat so they can give you the information. So thank
 you.
 MS. BLACKMON: Okav. I was forwarded to a

MS. BLACKMON: Okay. I was forwarded to a supervisor, who then kept putting me off and putting me off, and so --

COMMISSIONER RENDAHL: So then you come to the UTC, and our staff can help you.

MS. BLACKMON: Okay.

COMMISSIONER RENDAHL: So they will reach out to you.

MS. BLACKMON: Thank you.

COMMISSIONER RENDAHL: Thank you for your comments.

Next is Jennifer Keller, then Pedro Valverde, and then Desiree Douglass.

Jennifer Keller, are you available?

MS. KELLER: Yes. Can you hear me?

COMMISSIONER RENDAHL: I can. Thank you.

MS. KELLER: Yeah. Thank you for the opportunity to comment. Thank you for your work as Commissioners. I live in Bellevue, and I am a PSE ratepayer. I want to talk about the Tacoma LNG facility and Energize Eastside.

Please deny PSE's request to pass along to ratepayers the cost of these projects. These projects

Page 200

don't want to deal with it because my lines are underground.

I find this really pretty disgusting that they are not willing to do what needs to be done. And so now, hearing all the information of everything else that they are involved in, I understand.

So I am deeply opposed to this rate increase as a senior citizen. That is not something that I can afford, and many people in my neighborhood are seniors and cannot afford something like that. I was just appalled when I received the notification as to how much they were planning to increase it.

And now understanding -- and I will be investigating it further -- the reason and rationale behind their decision and their ask, I am just totally appalled by all of this and would really sincerely request that the UTC deny Puget Sound Energy this increase. That's all I have to say. Thank you very much.

COMMISSIONER RENDAHL: Thank you, Michelle. And I will ask you, if you don't mind, the staff -- the consumer protection staff of the UTC is available to work with you if you have continuing issues with PSE with your service. That is something we can do. And I can have one of our staff reach out to you just directly

Page 202 are unnecessary, damaging, expensive, poorly-conceived,

and they don't benefit ratepayers. PSE has gone ahead with them even without all the necessary permits or public process and has assumed they can push the

projects through and then force ratepayers to pay for them. This is unacceptable.

For brevity, I completely support comments from quite a few people, including Rebecca Ponzio, Fran Korten, Neal Anderson, Don Marsh, Stacy Oaks, and Rich Voget, and others. Please consider me to have made the same comments as they did.

For the Tacoma LNG facility, PSE has never proven the need. The facility provides almost no benefit to ratepayers, to saying to -- providing LNG to marine vessels, not ratepayers. That's unfair to charge ratepayers for that.

The project goes against our state commitments to address environmental justice. It disproportionately harms the surrounding communities, the Puyallup Tribe, and people in the Port and tide flats area. Why should ratepayers be forced to pay for breaking our commitments to environmental justice? The project goes against Washington State efforts to reduce carbon emissions. It's wrong to require ratepayers to finance actions that will destroy the future of young people alive today.

For Energize Eastside, PSE has never proven the need. Electrical demand on the Eastside isn't strong enough. PSE talks about growth out on the Eastside and then says things about having to keep up, but electricity demand data shows this is false. The demand has been growing very slowly, and thank you for telling PSE they can't repeatedly inflate projections in IRPs and then adjust them downward after the fact.

We have time to look at our many options for dealing with this slow growth in demand. Ratepayers should not be forced to pay for pushing through with Energize Eastside.

PSE has also never proven the need for this approach to addressing electric demand. PSE prepared an EIS and made a big show of inviting comment on such things as alternatives. Commenters like me told PSE that the studies they conducted on alternatives were poor. They put effective, less expensive, less destructive alternatives in a bad light. PSE essentially shrugged and put our comments in an appendix.

It is unfair to force ratepayers to pay for this project when far better alternatives are available more so every month. Solar power, demand response, battery storage, lots of things.

Page 205

fine, they moved on. Now it's built. And now they're

(Interruption in the proceedings.)

MS. DOUGLASS: Now they want everyone to pay 4 5 for it.

COMMISSIONER RENDAHL: If you are not speaking, please put yourself on mute. Thank you.

MS. DOUGLASS: I'm speaking. Is that okay? COMMISSIONER RENDAHL: Yes. Please go ahead.

MS. DOUGLASS: Yeah. So PSE -- you know, they didn't quit. Now they want everyone to pay for it because, as these years have passed, everything that was said in all the public hearings over all those years -everything the Tribe said is coming true.

It's a dangerous, dangerous thing to put on an old Superfund site. It's an abomination to put on a water body such as the Puyallup estuary. And it's existential danger. It's a true danger to the people living around it, right? It's compressed by coldness, fracked gas. And we have seen in the news enough of those explosions.

So PSE may well be left with a stranded asset, and they don't want that. So what do people do -companies do when they want out quick? They don't want

Page 204

So I urge you to deny prudence of the Tacoma LNG and Energize Eastside projects. Thank you.

COMMISSIONER RENDAHL: Thank you.

Okay. Next is Pedro Valverde, then Desiree Douglass, then Richie Ohlson.

Pedro, are you available? Pedro Valverde, are you still on the line?

> Desiree Douglass, are you available? MS. DOUGLASS: Yes, I am.

COMMISSIONER RENDAHL: Please go ahead.

MS. DOUGLASS: Okay. Good evening, everyone. It's good to see and hear everyone tonight, really. My name is Desiree Douglass. I first got involved in the fight against PSE's fracking LNG in 2016.

PSE was building their refinery without permits. And in my profession, I work with permitting, and I was outraged that such a massive international corporation could get away with failing to do the required consultation with a sovereign nation, the Puyallup Tribe, and could get away with building such a massive fracked gas refinery without permits, and simply then pay the fine and move on.

And that's exactly what they did with the Puget Sound Clean Air Agency. They built, they paid their

Page 206

to have to pay for that certain asset? They get the money up front. And I honestly think that's what's happening here. You know, I don't go looking for trouble, but if you watch something long enough, you start to see how it develops.

So here's the thing. I'm really happy to hear ratepayers here.

MR. ROBERTS: We're over a minute.

MS. DOUGLASS: Okay. You want to give me 30 seconds more?

> COMMISSIONER RENDAHL: Please just wrap up. MS. DOUGLASS: Okay. So the Puyallup Tribe

has fought this refinery from the beginning of the project, and they're still fighting it in court. And the Puyallup Tribe has what's known as treaty rights.

In our Constitution, it says that is the supreme law of the land because that was the treaty made so that

nonindigenous people could settle here without a war. So it's a constitutional thing. It's very

powerful. And I support the Tribe -- I think many of us here do -- in finishing that fight because it's going to go into higher and higher courts before it wins, right?

We do not -- we must not allow PSE to pass their expenses for this God-awful project onto the ratepayers, onto the most vulnerable, the people with

Page 207 limited incomes, you know, and make victims of everyone. I say we stand together and say no, and I ask the UTC to stand with us and say no to PSE's request for a rate Finally, every agency in the State of Washington, including the Commission, has the authority vested to them from the State and the federal government, and with that authority comes what's called a trust responsibility: The responsibility to hold up the treaty rights of the sovereign nations of our lands -- of their lands, actually. 

And I ask the UTC to do that because that is a powerful authority. It's in the Constitution. And I know you let me go way over my minute. Thank you very much. It's really good to see and hear all of you tonight. And Puyallup Tribe hasn't quit, and neither will we.

COMMISSIONER RENDAHL: Thank you for your comments.

MS. DOUGLASS: Good night.

COMMISSIONER RENDAHL: Next is Richie Ohlson, then Peggy Printz, and then Kyle Lucas.

Richie Ohlson, are you available?

MR. OHLSON: Hi. Yeah.

2.4

COMMISSIONER RENDAHL: Please go ahead.

Please do not grant PSE the rate increase to pay for this Tacoma LNG facility. We're alarmed about

the potential dangers of storing and using LNG. Then there are the greenhouse gas implications.

The most up-to-date research concludes that LNG is not a climate solution for the shipping industry.

Depending on the type of engine, LNG can create 70 to 80 percent more life-cycle greenhouse gases than marine gas oil.

We must also consider the environmental justice aspects of the LNG plant. Toxic extraction sites and refineries are often placed in black, brown, indigenous, low-income, and already overburdened communities. And the Tacoma LNG is a prime example of this unjust placement.

PSE is trying to extract money from tax ratepayers for this facility before the Puyallup Tribe's appeal of the permits has even been heard in court. Therefore, our members oppose all of the required requested rate increases for Puget Sound Energy. Thank you very much.

COMMISSIONER RENDAHL: Thank you. Next is Kyle Lucas, Patrick McKee, and Tony Ivey.

Kyle Lucas, are you available?

Page 208

MR. OHLSON: Well, I didn't know I would get the chance to speak, but I am opposed to the rate changes, the rate increases, and it would disproportionately affect marginalized people and people with low income and just people who can't generally afford, like -- you know, they're struggling to get their basic needs met every single day, and this is just another thing pressing them down. And, you know, like, you're not allowed to survive here.

It's just generally a completely unfair and dehumanizing thing. It's just horrible. Like, I don't know why you continue to oppress people like this, like PSE would. I'm just -- I would not like these rate changes to go forward. And that's about all I have to say.

COMMISSIONER RENDAHL: Thank you for your comments.

Next is Peggy Printz, and then Kyle Lucas, and then Patrick McKee.

Peggy Printz, are you on the line? MS. PRINTZ: Yes, I am. Hello.

COMMISSIONER RENDAHL: Please go ahead. MS. PRINTZ: Hello. I'm speaking on behalf

of Seattle Cruise Control. We are a grassroots organization.

Page 210

Page 209

MS. LUCAS: Yes, I am. Can you hear me?
COMMISSIONER RENDAHL: I can. Please go
ahead.

MS. LUCAS: Well, thank you. Good evening, and "teigicid." Thank you in our Coast Salish Lushootseed languages for the opportunity to comment this evening.

As a residential PSE customer, I strongly oppose its requested rate increases that subsidize its risky, polluting, and dangerous LNG project. It is unconscionable to force we ratepayers to pay for PSE's gamble on behalf of marine shipping that doesn't even benefit us.

The UTC must consider disproportionate impacts to marginalized communities in its decision-making, and the LNG facility will disproportionately impact already burdened and marginalized communities, including the Puyallup Tribe and immigrants at the Northwest Detention Center.

The Puyallup Tribe and Earthjustice have active court appeals pending on the risky LNG refinery for which PSE began construction two years prior to obtaining permits.

Industry, State, and local governments are moving away from gas. That's the reality. Worldwide

Page 211

weather events affirm that we're in a global climate emergency, yet most of two million PSE customers in Washington have no other choice of utility and should not have to support a foreknown entity seeking compensation for its fossil fuels and maritime gambles.

I ask you to protect utility customers from predatory schemes as represented in the LNG project and associated costs. Please deny the PSE's proposed rate increases. Thank you. "Teigicid."

COMMISSIONER RENDAHL: Thank you.

Next is Patrick McKee, then Tony Ivey, and then Lorelei Voda.

Patrick McKee, are you available? MR. MCKEE: Yes, I am.

COMMISSIONER RENDAHL: Thank you. Please go

ahead.

MR. MCKEE: Yeah. This is all pretty

shameful. PSE is the dirtiest utility in the state.

They jumped ahead of the permitting process and overruled the express will of the Puyallup people to put an environmentally catastrophic LNG facility intended for commercial sale of fracked gas, not for powering Washington homes, on unceded tide flat land in Tacoma,

Washington homes, on unceded tide flat land in Tacoma
 and now insists on massively increasing rates to pay out

25 their shareholders.

Richards.

have lived with this and have been very vocal about fracked gas in their backyards for many years to every council, commission, agency, and board who would listen.

I want to bring attention to a couple things.

Number one, the greed and inequity that is present here.

PSE itself has shown that during their environmental review that only one to two percent of the total gas produced in this facility will be used to benefit ratepayers, yet they want to charge ratepayers like me 43 percent of the cost to build this facility.

The facility, mind you, did not have their correct permits to be built, and even still have failed to secure contracts with shipping companies looking to transition to LNG -- to fracked gas.

Allowing PSE to recover these costs for their facility is not only going to hurt ratepayers, it's encouraging companies to promote continued growth of the use and sale of dirty, fracked gas by marine vessel customers and for transportation. Doing so exacerbates the climate harms and contributes to this climate catastrophe we are currently in.

I strongly urge you to make sure that we are not making ratepayers pay for this expensive, poorly-conceived project that harms the people who are forced to pay for it. This is adding insult to injury

Page 212

They're still pending legislation on the legality of the whole Tacoma LNG operation. The Attorney General's Office is opposed to the increase, for God's sake. The Washington Health Disparities Map makes it very clear that near Port Tacoma, residents are already paying with their lives and their health for our collective inability to move past fossil fuel, and now here comes this investor-owned utility saying, just give

Let's say no to PSE shareholder-driven rate increases, and then let's replace them with public utility districts, and the UTC can help with that. Thank you very much.

COMMISSIONER RENDAHL: Thank you. Tony Ivey, then Lorelei Voda, then Claire

Tony Ivey, are you available?

MR. IVEY: I'm right here. Thank you. My name is Tony Ivey. I'm a civic engagement manager for Washington Environmental Council, but more importantly, I'm a Tacoma resident where the LNG plant is located.

Firstly, good evening. I want to thank the UTC Commissioners for deliberating this very important issue with public comment. Turnout may have surprised some of you, but it's no surprise to the Tacoma residents who

Page 214

Page 213

to further inequity. Stand with the Puyallup Tribe,
 Commissioners, and please deny prudence of the Tacoma
 LNG project. Deny these rate hikes. Thank you.

COMMISSIONER RENDAHL: Thank you for your comments.

Lorelei Voda, then Claire Richards, then Lester Poque.

Lorelei Voda, are you available.

MS. VODA: Hi. Yes, I am. This is Lorelei. I am really grateful for this hearing tonight. I had no idea about a lot of what's going on.

I was simply going to call as a single senior citizen who is very energy-careful, and yet my bill is now up to \$160 a month. And I'm looking at this, telling me that they're going to ask for a 15.80 percent increase in one year, and then continue that. And I'm quite sure that my Social Security is not going to go up 15.80 percent next year to cover this.

So if by any chance any of this is approved, I think that's a very unreasonable amount to ask for the first year, and they should definitely come down. But listening to the other folks, it's sounding like, really, it's not necessary or a benefit to us as ratepayers. Thank you.

COMMISSIONER RENDAHL: Thank you.

1.0

Page 215

Claire Richards, then Lester Pogue, and then Amy Faith.

Claire, are you available?

MS. RICHARDS: Yes. Thank you for having us and taking our comment. I live on Bainbridge Island, and I am a customer of Puget Sound Energy, and I'm also a member of the Washington Physicians for Social Responsibility.

I agree with previous comments that rate increases, especially electricity increases, have a disproportionate impact on customers that are trying to stay cool during heat waves, which we know are on the rise because of climate change.

And according to data from the Energy Information Administration, Puget Sound Energy electricity costs in 2020 were about \$2.50 more per kilowatt-hour than Pacific Power and almost \$1 per kilowatt more than Avista, the other two investor-owned utilities.

They also have the second highest SAIDI values or sustained average interruption duration index in the state, and that's with the major events and obviously depends on which reliability metric you take. But generally, they tend to be the highest -- on the higher end of all other reliability entities, which means that,

customers' energy consumption in order to pay for their irresponsible promises to provide LNG to the maritime industry, foreign investors, and ratepayers through its development of their processing and production facility down on Puyallup ancestral territory in the white supremacist, colonized Port of Tacoma.

I second the commenters that have demanded and provided plenty of information for the UTC Commissioners to go on, and please don't continue to support the white supremacist values of this capitalist system that are devastating folks' lives right now. We do not need this right now.

And, please, if you're in your white savior complex, please do not continue. PSE, AAs, all the other industries that are supposed to be helping the folks here? Do not do that. Weigh on your heart, and do the right thing. This is ridiculous.

This PSE LNG facility down on the Port, they just had a fire on the deck of one of the maritime ships that has an 827,000-gallon freakin' tank on it right next to the LNG facility, which is right next to US Oil. Come on. You all got to do better.

Stop the white supremacist, capitalist investment of all this crap, and respect indigenous sovereignty and intergovernmental relationships. Please

Page 216

on average, their customers have a higher burden of power outages, and they perform poorly in terms of their reliability.

But, also, they are continuing to create stranded assets like the LNG plant in Tacoma, which I vigorously opposed and protested. And the irony of this is that them spending our money in creating more fossil fuel projects means that climate change gets worse, resulting in more power outages that have already been increasing because of climate change.

And, also, I pay every month to offset my electricity for solar, but how is it fair that I should also pay PSE to continue to expand fossil fuels at the same time that I am trying to use clean energy to have a safer climate for my child and the next generation? So thank you.

COMMISSIONER RENDAHL: Thank you. Lester Pogue, then Amy Faith, then Tara Villalba.

Lester, are you available?

MR. POGUE: Yes, I am. Thank you. My name is Lester Clarence Pogue, Junior, and I'm a resident of the Hilltop neighborhood of the city of Tacoma.

And I demand that the UTC deny the ability of Puget Sound Energy to increase the rates of their Page 218

Page 217

do better and try to make up for your ancestors who have just devastated this earth. Stop.

COMMISSIONER RENDAHL: Thank you.

Next is Amy Faith, then Tara Villalba, and then
Beverly Naidus.

Amy Faith, please go ahead.

I'm sorry. Naidus.

Please go ahead, Amy Faith.

MS. FAITH: Okay. So you're able to hear me now?

COMMISSIONER RENDAHL: Yes, I can hear you. MS. FAITH: Okay. Great. All right. Thank

you. I'm Amy Faith, and I live in Bellevue. And I'm here to oppose the rate increase along with everyone else.

I wanted to say that PSE cut down 300 mature trees on 148th Street and Northeast 8th Street for the Phantom Lake transmission line, and it destroyed the most beautiful tree-lined street here in Bellevue. And it's planning to cut down 4,000 trees to build Energize Eastside, which they have been building without permits, similar to the LNG plant, and without proof of need.

And now PSE is pushing for the 20-percent rate increase to pay for these projects, and this is during a time when we have record unemployment and 40 percent

2

I do not support the rate increase and have fought to stop the LNG refinery since we moved to the area. Many people in our community have come together to reimagine the Port free of fossil fuels. This is something that we can do if we organize.

MS. VILLALBA: Yes, I'm here. COMMISSIONER RENDAHL: Please go ahead. MS. VILLALBA: My name is Tara. I am one of over 40,000 renters in Bellingham and a member of the Bellingham Tenants Union.

We need to make sure that PSE does not get this rate increase. We need to dismantle the LNG refinery. The Port can be cleaned up by a bioremediation and become a model of healing the trauma of many generations. Thank you.

I'm here to urge you to reject PSE's filing for a rate increase. Tenants, like everyone else surviving on stagnant wages, are paying higher portions of our income for utilities. PSE has made a profit for decades and should be obligated to transition to clean energy without passing the costs on to their customers for providing a public necessity. It's unacceptable that they are proposing we finance -- we finance their continued profits while they continue to destroy my children's future and planet.

COMMISSIONER RENDAHL: Thank you very much. Okay. So is there anyone else who wishes to make comments tonight? I can go back to Cindy Kisska, but I do wish to know if there's anybody else who would

What would the rate increase mean for my family? Well, I'm a renter. Renting a home that is poorly insulated. I can't control the level of insulation of my home. That means I pay hundreds of

dollars a month, especially in the winter, to pay for

18 like to make public comment tonight. 19 MR. GULLATO: I would.

> COMMISSIONER RENDAHL: And if you could identify yourself for the record, please.

MR. GULLATO: Yeah. My name is Adam Gullato. I live in Olympia.

COMMISSIONER RENDAHL: Can you spell your last name, please.

Page 220

heat. Last year, we had to limit heating to the common rooms to control our heating costs. I can assure you our wages are not rising by nine percent.

The fossil fuel economy is most harmful to the poorest people in our communities and most extractive in tribal territories and public lands. PSE is no exception.

As the government agency tasked to protect consumers, I expect you to rein in increased profiteering by corporations like PSE. I ask you to ease the burden on tenants and make sure that all our young people have a planet they can live good lives on. Thank you.

COMMISSIONER RENDAHL: Thank you.

So the last person signed up right now is Beverly Naidus. Let me hear from Beverly, and then we will go see if there are others who wish to speak.

Beverly, please go ahead. Beverly Naidus? You might need to unmute your phone if you are calling in.

MS. NAIDUS: Let me see. Can you hear me now?

COMMISSIONER RENDAHL: I can hear you now. Thank you. Please go ahead.

MS. NAIDUS: Thanks for this opportunity to speak to this crucial issue. I am an artist, a citizen

Page 222

1 MR. GULLATO: Sure. G-U-L-L-A-T-O. 2 COMMISSIONER RENDAHL: Thank you. Go ahead, 3 please.

MR. GULLATO: Now, I agree with pretty much everything everybody has said so far. So I thank all of them because this will make this short.

Puget Sound Energy wants to raise their rates, and there's many people who live on a fixed income and are barely scraping by as is. And looking at the proposed rates for the people who have natural gas and electric, they're asking us to pay basically 50 bucks more within the next three years per month.

Okay. So just as a little homework assignment for myself, I looked up, at random, six executives for PSE. Their total salary is about \$10.7 million. So if they're looking for some money to grab, grab it from them because there's people out there who are struggling just to get by. There's people who are struggling just to pay rent or their mortgage. Forget about the bills -- the electricity bills and everything else added on top of it.

So I'm just saying, like, the rate increase is a horrible idea other than for the people who are going to get money from it. And that will do it. Thank you very much.

Page 223

COMMISSIONER RENDAHL: Thank you. Is there anyone else who wishes to comment tonight?

1 2

MS. THOMAS: Yes. My name is Susan Thomas. I would like to.

COMMISSIONER RENDAHL: Please go ahead.
MS. THOMAS: T-H-O-M-A-S. Yeah. I'm
sitting here at work. I knew I would concur with the
majority of everyone who has already spoken, and I do.
I unfortunately have to plop my disabled -- mentally
disabled client in front of the TV instead of engaging
with her, as I usually do, so I could listen in on this
public hearing.

I really am shocked and horrified that the LNG plant is still in process and operation. I thought that had been shut down by now. I am a green power customer of PSE because of both the environmental reasons. I very much want to do what I can with the ways that I can.

I pay a somewhat marginal increase for that green power, and I am okay with that. But the fact that it is now more cost-efficient to have green energy than carbon power -- it's shocking that we have to pay an increase on that, and the fact that the information that everybody has presented -- that most of this is enabling

I might not agree with everyone, but I'm telling you, I am unified with everyone tonight.

Page 225

Page 226

I am amazed that PSE has gotten so far as they have. And I really -- I'm definitely against. Put my name in the ring. I'm against this increase. And, yeah, this has got -- I mean, I call on UTC to start investigations. I mean, some of this stuff that's been mentioned, how does the UTC not see this? I mean, it's just mind-boggling to me that it's gotten this far, I guess. So I am definitely against it.

COMMISSIONER RENDAHL: Thank you.

Is there anyone else who wishes to make comment tonight?

MR. MARTIN: Yes, I would. Roger Martin.
COMMISSIONER RENDAHL: Could you please give us your last name, please, and spell it.
MR. MARTIN: Last name is Martin,

18 M-A-R-T-I-N.

I'd like the UTC to take a look at a couple different reports that are out there. There's a report, a scientific report, published in the San Jose Mercury News in 1989 and also again a year later that was put out by UC Berkeley and with Arizona State University, the geologists there.

And they have pointed out that anything built

Page 224

the LNG plant, is horrifying to me.

I also would like to point out that I wonder what people's legacies will be, whether it's people on this phone or whether it's the corporate holders. What kind of legacy do they think that they are going to produce by having a corporation that does such acts like this? Someday we will all, you know, have to face consequences in various different ways, and I hope that they can face up to what their actions are. I hope I can face my actions.

At this point, generally in the wintertime, I set my thermostat to 64 during the day. Generally 58 at night for environmental reasons as well as cost efficiency. I do not make much money. I understand people need to make some money, but the amount of increase is shocking as well as the reason for it. And I thank everybody for all of their comments.

COMMISSIONER RENDAHL: Thank you.
Is there anyone else who is calling in or has
come in by the Zoom call who wishes to speak tonight?
MR. SHUTTER: Yeah. This is Ron.
COMMISSIONER RENDAHL: Please go ahead. And
if you could give us your last name.

MR. SHUTTER: Shutter. I'm an engineer over in Renton and a ratepayer. And, you know, politically,

on shoreline landfill sinks, and rising sea levels cause it to sink faster. So that means as the sea levels go

up, the LNG facility goes down.

It also pointed out what happens when earthquakes occur in the presence of shoreline landfill. They demonstrated that by looking at what happened with the Loma Prieta earthquake in the Mission District in San Francisco that was built on landfill that came out of the 1906 earthquake. And that landfill collapsed, gas lines broke, fires broke out, and people got killed.

And then -- but that's basically sat on and pretty close to a solid substrate. The substrate under the landfill that was going to liquefy in a large earthquake, as proven by Loma Prieta, sits on 1,500, 2,000 feet of basically muck before it gets to bedrock.

If you take a look at the most likely places put up by, I believe, the Department of Natural Resources and one of the federal environmental things that looks at such things -- it might be -- yes, it's USGS. You'll see that the highest -- the most likely place for substrates to liquefy, meaning the sort of muck that's there in the river plain on which the tide flats sit -- it's rated as most likely to liquefy in an earthquake.

So you have construction that's most likely to

COMMISSIONER RENDAHL: Thank you. Is there anybody else who wishes to make public comment tonight?

MS. STEVENS: I would like to comment. COMMISSIONER RENDAHL: Please go ahead. And, Heidi, if you could give us your last name, please. MS. STEVENS: Heidi Stevens. Just following

That area where the LNG plant is is also in a lahar flow. So if Mount Rainier blows again, that volcanic flow will go right through there, which is what kind of made that tidal outwash to begin with.

up on Roger's comments.

So PSE is making just very poor choices, not based on good scientific fact, and it's been very frustrating that all the information that citizens have done to produce scientific information is being dismissed for their private company profit. And this rate increase should absolutely not go through. And thank you for listening to all of our comments tonight.

COMMISSIONER RENDAHL: Thank you. Is there anyone else who wishes to comment tonight?

short, that service electric and gas customers across the state of Washington. And I quote, they are monopoly franchises, and they exist to make a profit for their shareholders. That's the problem. They exist to make a profit for their shareholders, and they don't care about

The profits Puget Sound Energy makes should be funneled down to its customers first to lower our electric rates, not funneled upwards first to pay their already wealthy shareholders.

I know for a fact the Puget Sound Energy, the UTC, and the OAG should not rest easy thinking they have the poor people's backs covered when there are thousands and thousands of families, including children and the elderly in the state of Washington, who do not and cannot qualify for such programs as LIHEAP and the HELP program. This is because their income is slightly above, even by just a few dollars, over the income level

This means there are thousands of people still shivering day and night in their cold houses and apartments in the winter because they cannot afford to turn their thermostats up any more than they already

Tell this to Puget Sound Energy's already

Page 228

Okay. I'm going to ask if Pedro Valverde is still on the call. If you are, I can barely hear you. And did Becky Rhodes speak already?

MS. RHODES: I didn't want to speak.

COMMISSIONER RENDAHL: Okay. Well, thank you for that.

I'm just going over my list and double-checking.

And so if nobody else wishes to speak, Cindy, I will give you another minute or two, and then we will close out the hearing, if you are still on the line.

MS. KISSKA: Yes, I am. Can you hear me? COMMISSIONER RENDAHL: I can. And if you could just, you know, very succinctly give your comments, that would be helpful, and you can submit the rest in writing.

MS. KISSKA: Okay. So my name is Cindy Kisska. I'm in Birch Bay. I'm been a Puget Sound Energy electric customer for 18 years. I want to say --I'm sorry. I have trouble concentrating.

PSE is one company, not two, but the UTC treats it as if it is two different companies, one for shareholders and one for its customers.

PSE belongs to a group of five utility companies called investor-owned utilities, IOUs for Page 230

Page 229

wealthy CEOs and shareholders. What sense does it make? None. And Puget Sound Energy should never be allowed to use the fact that we use less and less electricity as one of the reasons to raise our rates. We turn down our thermostats more and more to avoid having to pay higher and higher electric bills.

How is it that Puget Sound Energy's millions and billions of dollars in wealth at the top has never trickled town to the bottom to translate into savings for customers' rates? Yet the UTC allows Puget Sound Energy to generate billions of dollars and give away millions in dividends and still raise our rates every single year.

We are told by the Attorney General's Office that, in the end, the Commissioners must ensure that rates are fair, just, and reasonable for all interests involved. The word "interests" should not be used in the same sentence when referring to shareholders and customers because the meaning is completely opposite for each one.

The shareholders' interests are vastly different from the customers' interests and needs. Customers' interests actually refers to customers' needs. They need to stay warm in the winter and still be able to afford their PSE bills, while shareholders'

Page 231

interests means how much money, profits, they can make. In other words, the already wealthy becoming wealthier.

Hold on one sec. Hold on, dear. I got to find the right page. I'm sorry.

2.0

COMMISSIONER RENDAHL: And if you have written comments, you really should submit them in writing.

MS. KISSKA: I will, dear. I have. I have some of it, but not all. Let me just finish. I want to say -- hold on. One second. Okay. Hold on, dear. Let me find my place. Hold on. Okay. The last page I'm on here

Under this context, Puget Sound Energy being allowed to raise customers' rates every year is neither fair, just, nor reasonable. The wealthy don't need protection, but the poor and vulnerable do. The OAG's statement should be changed to read, the Commissioners must ensure that rates are fair, just, and reasonable for the utility customers first. Then the needs of the other groups involved can be addressed.

Another fact. Why is Puget Sound Energy allowed to ignore the UTC's direct order to Puget Sound Energy to profit-share with its customers? In 2013, the UTC ordered Puget Sound Energy to share its profits 50-50 with its customers. I know that at least two

with so many financial loopholes, that profits to shareholders come first instead of savings to customers, then this deranged arrangement needs to be taken up by the Attorney General's Office and these loopholes closed.

Page 233

The AG needs to step up and stop Puget Sound in their tracks and make them toe the line by ensuring that UTC's orders are followed, and that Puget Sound Energy shares their profits with their customers first to ensure they lower our rates, and that Puget Sound Energy use their millions and billions of dollars in profits to lower our rates.

Puget Sound Energy's moral obligations and financial obligations should be one and the same. Right now, there's a huge cavern between them. And as I mentioned, there's two court cases that the Public Counsel Unit with the UTC has filed against Puget Sound Energy, and they've revealed that Puget Sound Energy has lied and been dishonest many times in manipulating and misrepresenting their financial facts to try and get more money.

And as I said, this is shocking that this is our utility company and who you, the Commissioners, have to deal with. It's impossible to find honest truth when dealing with Puget Sound Energy, and we the customers

Page 232

other times UTC ordered them to profit-share with us, but somehow Puget Sound Energy has found ways to get around this. They have never shared their profits with us to lower our rates. They refuse to follow these orders.

According to Puget Sound Energy, they didn't have enough profits to share with us. And I want to say, but not before profits were turned over by Puget Sound Energy to their shareholders. How is it that Puget Sound Energy seems to become more powerful than the UTC itself? Puget Sound Energy blatantly ignores and gets away with it over and over again, the UTC's direct orders to share their profits with their customers.

Puget Sound Energy has financially restructured itself over the years to the point where the OAG and the UTC stand by and watch all the structures and safety nets that used to be in place to protect Puget Sound Energy customers be burnt to the ground.

It seems Puget Sound Energy has built itself a house of cards built on a foundation of sand and an ever-increasing mountain of loophole after loophole to want to protect anything and everything it wants to do, and no one has the courage to stand up to them.

If Puget Sound Energy has restructured itself

Page 234

bear the cruelty of their dishonesty.

So the question remains. This is how I want to end this. How is it that, legally, Puget Sound Energy can generate billions of dollars in revenue and give away hundreds and hundreds of millions of dollars in profits, but none of these profits trickle down to become savings to lower our customer rates? This is the question of the utmost importance that needs to be addressed and clearly answered, and at this moment, it still has not been answered. Thank you.

COMMISSIONER RENDAHL: Thank you.

MS. KISSKA: I'm sorry to get so upset, but I'm passionate about it. I've been researching them for four years. I have typed up three single-spaced papers to read to you, and I could go on for a half an hour about Puget Sound Energy.

And I just want to say, if you guys allow Puget Sound Energy to raise their rates again after everything you've heard tonight, then something is wrong with your hearing. And I've been told you guys have hearts for the customers. So I hope you use your heart and do not allow Puget Sound Energy -- they sound like crooks -- to raise our rates. Thank you.

COMMISSIONER RENDAHL: Thank you very much. Thank you very much.

Page 237 Page 235 1 MS. KISSKA: Okay. You're welcome, dear. feels like it's just a wall of stone-cold silence, and 1 2 COMMISSIONER RENDAHL: I want to say thank 2 it's so unnatural, and it's a missed opportunity for us 3 you to everyone who has provided comments this evening. 3 to hear from your valuable input. We never get any 4 I appreciate everyone who has stayed with us for the clarification. You're the ones representing us, and you 4 5 entire time. 5 never speak, and that's not right. 6 And I'm going to ask if our Chair, Dave Danner, 6 CHAIR DANNER: Thank you. I understand what 7 wishes to close out the hearing, or if you'd like me to 7 you're saying. We are bound by the Administrative 8 do so, Chair Danner. 8 Procedure Act that governs the proceedings that we do. 9 9 MR.
