Olympia, Washington 98504

**Subject: VERIZON REQUEST FOR TWO (1,000) NUMBER BLOCKS**

Dear Ms. Washburn:

Verizon Northwest Inc. (Verizon) requests the Washington Utilities and Transportation Commission to direct the Pooling Administrator (PA) to provide Verizon with two, one thousand number blocks to satisfy the requirement for additional numbers for Pacific Northwest National Laboratory.

The customer is expanding their facility and will need additional numbers that are in sequential order. The customer has asked for specific number groups. Three customer locations must allocate certain numbers to a PBX for directory purposes and the numbers should not repeat the last four digits. This request is made because the serving central office does not meet the "months to exhaust" requirement of the PA. The central office utilization is at 75.302% which is acceptable because it's over 75%, but the months to exhaust for block 1 is 181.978 and for block 2 it's 192.848. The PA will only accept 6 months or less to exhaust without a waiver request from the Commission.

The Washington Commission has the authority to review the PA's criteria and request a waiver when appropriate, in this case a waiver request for the months to exhaust criteria. Verizon

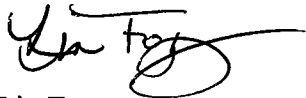

Ms. Carole J. Washburn  
November 1, 2004  
Page 2

requests the Commission instruct the PA to release the numbering resources necessary to meet the needs of this Verizon customer.

Verizon requests approval of this request with an effective date of December 1, 2004. The Commission's waiver request must be submitted with the company's application to PA for the numbering resources needed for deployment of service to this customer. Please find attached a copy of the company's Block Application Form to the PA and a copy of the letter from the customer requesting the number blocks.

Please call me if you have any questions.

Very truly yours,

A handwritten signature in black ink, appearing to read "Lin Fogg", with a stylized flourish extending to the right.

## Pacific Northwest National Laboratory

Operated by Battelle for the  
U.S. Department of Energy

October 21, 2004

Dear Verizon,

Battelle Pacific Northwest National Laboratory would like to order 1500 DID numbers to augment our current voice services that we have with Verizon. We are in the process of expanding our facility and will need additional numbers that are in sequential order.

We need these numbers to be sequential and would prefer the number group 509-371-6000 through 7999 to be available. Battelle maintains three locations and must allocate certain numbers to the PBX for directory purposes and the numbers should not repeat the last four digits. Verizon has been a valued partner for our voice communication needs and it is important that they are enabled to offer these DID numbers to us.

Thanks,

Michael Robertson  
Telecom Services Manager  
Pacific Northwest National Laboratory  
Operated by Battelle for the U. S. Department of Energy

**Notes:**

- 1) The requesting Block Applicant shall complete this form except for Block Range and Block Effective Date, when submitting PART 1 of the INC Thousands Block Applicant form to the Pool Administrator. A separate Part 1B form is to be completed for each 1K Block Range requested.
- 2) The Pool Administrator will insert Block Range and Block Effective Date information, then submit this form to the regional NPAC at the same time PART 3 of the INC Thousands-Block Applicant form is returned to the requesting Block Applicant.
- 3) Pre- Block Activation:
  - a) If the Block Holder is requesting a modification, the Block Holder needs to complete Sections A and any applicable data in Section B of this form and send it to the Pooling

**Thousands- Block Application Form  
Part 1B**

Administrator (PA). The PA will review the form to insure correctness and forward it to the NPAC for processing.

- b) If the Pooling Administrator (PA) is requesting the modification or intra SP block porting to the Block Range and/or Effective Date, the PA will review the change with the Block Holder. After receiving concurrence from the Block Holder, the PA will update the Block Range and/or Block Effective Date information on Section A and forward it to the NPAC for processing.
- 4) Post- Block Activation: If Block Holder requests NPAC to perform the Block Modification, then Sections A & B of this form should be completed and send to the Pooling Administrator. The Pooling Administrator will send the information on to the NPAC. Upon completion of this request, NPAC sends a copy of the completed form to the Pooling Administrator and Block Holder.

**Thousands- Block Application Form  
Part 1B****Foot Notes:**

- 
- <sup>1</sup> The Service Provider ID of the block holder. The SPID must be a valid SPID in the NPAC system. If your company does not have a SPID, please call the NPAC at 1-888-NPAC-HEL(P) for assistance.
- <sup>2</sup> A Location Routing Number is a 10-digit number, in the format NPA-NXX-XXXX, that uniquely identifies a switch or point of interconnection (POI). The NPA-NXX portion of the LRN is used to route calls to numbers that have been ported.
- <sup>3</sup> The Pooling Administrator will insert Block information. The Block will consist of NPA-NXX and the first digit of the 1K block.
- <sup>4</sup> The Pooling Administrator will insert Block Effective Date. See section 9.2.4 of the Thousands-Block (NXX-X) Number Pooling Administration Guidelines for specifics on effective date. This is the earliest date that the NPAC will broadcast the Block information to all Local SMS's.
- <sup>5</sup> If "YES" is marked the NPAC will activate the block range. If "NO" is marked it will be the responsibility of the SP to activate the block range.
- <sup>6</sup> Customer Local Area Signaling Services Destination Point Code for 10-digit GTT for CLASS features for the 1K block. The CLASS DPC must be three sets of numbers where the value for each set ranges from 0 to 255
- <sup>7</sup> Customer Local Area Signaling Services Subsystem Number for the 1K block. The CLASS SSN must be a number between 0 and 255.
- <sup>8</sup> Line Information Database Destination Point Code for 10-digit GTT for LIDB features for the 1K block. The LIDB DPC must be three sets of numbers where the value for each set ranges from 0 through 255.
- <sup>9</sup> Line information Database Subsystem Number for the 1K block. The LIDB DPC must be three sets of numbers where the value for each set ranges from 0 through 255.
- <sup>10</sup> Calling Name Delivery Destination Point Code for 10-digit GTT for CNAM features for the 1K block. The CNAM DPC must be three sets of numbers where the value for each set ranges from 0 through 255.
- <sup>11</sup> Calling Name Delivery Subsystem Number for the 1K block. The CNAM SSN must be a number between 0 and 255.
- <sup>12</sup> Inter-Switch Voice Mail Destination Point Code for 10-digit GTT for ISVM features for the 1K Block. The ISVM DPC must be three sets of numbers where the value for each set ranges from 0 through 255.
- <sup>13</sup> Inter-Switch Voice Mail Services Subsystem Number for the 1K block. The ISVM SSN must be a number between 0 and 255.
- <sup>14</sup> Wireless Short Message Service Center Destination Point Code for 10-digit GTT for WSMSC features. This field is only required if the service provider supports WSMSC data. The WSMSC must be three sets of numbers where the value for each set ranges from 0 through 255.
- <sup>15</sup> Wireless Short Message Service Center Subsystem Number for the 1K block. This field is only required if the service provider supports WSMSC data. The WSMSC must be a number between 0 and 255.
