COMMISSION

July 18, 2006

Vicki Elliott, Rail Manager
Washington Utilities & Transportation Commission
Olympia, WA

Dear Ms. Elliott:

In 2003, Sound Transit executed a purchase and sale agreement with the BNSF Railway for the Lakeview Subdivision railroad right of way between Nisqually and Tacoma.

Sound Transit plans to extend Sounder commuter rail service along the Tacoma-to-Lakewood rail corridor. Construction to upgrade the track & signal from the Tacoma Avenue Overpass to Bridgeport Way is to begin in early 2007. The railroad tracks will be upgraded to Class 4 track standards and trains will operate to Class 3 track standards.

Sound Transit is filing petitions to the Washington Utilities & Transportation Commission (WUTC) for modification of detection circuitry at the following grade crossings in the City of Lakewood:

<u>HIGHWAY-RAIL CROSSING</u>	<u>DOT Number</u>	<u>WUTC Number</u>
Steilacoom Boulevard	085400D	IJ 7.88
100 th Street	085402S	IJ 8.40
108 th Street	085404F	IJ 9.09
Bridgeport Way	085821P	IJ .60

Attached in each petition package is a project description and justification for each highway-rail grade crossing change.

Thank you for review and consideration of our WUTC highway-rail crossing petitions. If you have any questions, please contact Eric Beckman, Program Manager, at 206.398.5251.

Sincerely,

Jim Edwards, Deputy Director
Capital Projects Department

- c: Don Wickstrom, City of Lakewood Public Works Director
- Eric Beckman, Sound Transit
- Jamie O'Day, Sound Transit

CITY OF LAKEWOOD)	WUTC No. <u>1J 7.88</u>
)	DOT No. <u>085400D</u>
Respondent.)	
.....)	

Petitioner requests the Washington Utilities and Transportation Commission to enter an order authorizing the modification of detection circuitry for a grade crossing signal system as follows:

1. Identifying information for the crossing:

Existing highway, street or road: Steilacoom Boulevard SW

Existing railway: Sound Transit Lakeview Subdivision line.

WUTC Crossing Number: 1J 7.88

DOT Number: 085400D

3. Description of current signals and/or gates at the crossing:

Current crossing warning devices consist of crossing gates, bells, flashing lights in the shoulder at both sides of the roadway, and flashing lights mounted on cantilever structures mounted on both sides of the roadway.

2. Type of current crossing circuitry:

Current crossing circuitry consist of motion sensors. There is currently an intertie with the roadway signals at the nearby intersection of Steilacoom Blvd and Lakeview Blvd.

 STATE OF WASH.
 UTIL. AND TRANSP.
 COMMISSION

3. Project description and justification:

(a) Proposed changes:

Crossing circuitry will be upgraded to HXP constant warning time systems. An intertie with the roadway signals at the intersection of Steilacoom Blvd. and Lakeview Blvd. will be maintained.

(b) Justification for changes:

The railroad is being upgraded by Sound Transit for more frequent train operation at higher speeds.

(c) Effects of proposed changes on warning devices and warning times for drivers:

The warning devices are in good condition and will remain unchanged. Warning times for motorists will be more consistent as a result of the upgrade from motion sensor circuitry to constant warning time circuitry.

4. Drawings. Sketches drawn to scale are attached accurately showing the current and proposed layout of the highway (including shoulders, sidewalks, lanes of travel, bike lanes and crossing warning devices), of the crossing surface and of the railway in the vicinity of the crossing.

I certify under penalty of perjury that the foregoing is true and correct.

Dated at Seattle, Washington this 19th day of July, 2006.

WAIVER OF HEARING BY RESPONDENT

The respondent has investigated the conditions existing at and in the vicinity of the grade crossing described herein and is satisfied that such conditions are substantially as described in the petition. Respondent consents to the modification of the signal system circuitry as described in the petition. Hearing in this proceeding is hereby waived.

Dated at Lakewood, Washington, on the 12 day of July, 2006.

City of Lakewood

INSTRUCTIONS

Petitioner can be the railroad, the road authority or the Washington Utilities and Transportation Commission. If the railroad is the petitioner, the road authority will be the respondent. If the road authority is the petitioner, the railroad will be the respondent.

The original and two copies of the petition must be filed with the Washington Utilities and Transportation Commission.

If the waiver of hearing is executed, the petition will be investigated and a decision made within approximately two weeks from receipt of the documents.

If the waiver of hearing is not executed on the petition filed, a copy of the petition will be served upon the respondent by the Commission for answer within 20 days. Upon receipt of respondent's answer or after the 20 day period has elapsed, the application will be processed. Time for making a decision will depend on whether an answer is filed and the content of the answer.

CONSTRUCTION NOTES:

- 4 CONCRETE CROSSING PANELS WITH ELASTOMERIC FLANGE FILLER.
- 6 CEMENT CONCRETE MEDIAN, SEE SHEET RDDET03.
- 13 CEMENT CONCRETE BLOCK TRAFFIC CURB TYPE C BLOCK PER WSDOT STD PLAN F-20.
- 17 CONSTRUCT CHAINLINK FENCE TYPE 1 PER WSDOT STD. PLAN L-2.
- 25 CONSTRUCT A 3' WIDE DETECTABLE WARNING STRIP WITH TRUNCATED DOMES PER SECTION 4.29.5 OF THE ADA ACCESSIBILITY GUIDELINES.
- 27 CEMENT CONCRETE TRAFFIC CURB PER WSDOT STD. PLAN F-1.
- 28 CEMENT CONCRETE SIDEWALK PER WSDOT STD. PLAN F-3.
- 29 CEMENT CONCRETE DRIVEWAY TYPE 2A PER CITY OF LAKEWOOD STD. PLAN S-1D.

GENERAL NOTES:

1. SEE UTILITY RELOCATION AND PROTECTION PLANS FOR STORM DRAINAGE, MISC. CONDUIT, AND CASING INSTALLATION.
2. SEE SHEET RDDET01 - RDDET03 FOR ROADWAY ISLAND DETAILS.
3. EXISTING FLASHING LIGHT SIGNALS WITH GATES AND CANTILEVERS TO REMAIN.
4. SEE TYPICAL ROADWAY SECTIONS FOR PAVEMENT SECTIONS.
