Jimmy Jordan  
Corporate HSE Manager  
Eka Chemicals Inc.  
1775 West Oak Commons Court  
Marietta, GA 30062

Dear Mr. Jordan:

**Subject: Pipeline Safety Technical Assistance Visit, Moses Lake, Washington Facility**

This letter is to follow-up with the technical assistance visit we conducted at the Eka Chemical, Moses Lake, Washington, facility on October 20, 2008. The visit included a review of applicable pipeline safety requirements for gas pipeline facilities, operations and maintenance plans and procedures, record keeping, drug and alcohol, operator qualifications, integrity management and public awareness programs. We understand that many of these requirements are currently being met, although some program updates and modifications will be required.

Please respond in writing by November 28, 2008, telling us the date you plan to bring your facility into full compliance with the pipeline safety requirements.

We appreciate your efforts and willingness to work with us in a cooperative manner. Please contact Joe Subsits at (360) 664-1322 if you have questions or comments.

Sincerely,

David W. Danner  
Executive Director and Secretary

cc: Anne Soiza, Pipeline Safety Director  
Calvin Greene, Eka Chemical Inc.  
Lind Bingham, Eka Chemical Inc.
