Dear Ms. Washburn:

Attached please find the electronic submittal of the revised tariff pages and Important Notice to Customers referenced above. The purpose of this filing is a General Rate case filing seeking to increase annual revenue by \$225,839; to recognize and reward conservation through a reduction in the first tier tariff pricing, and increasing the second tier pricing to promote further conservation and lastly to allow customers to select the company to provide annual back flow assembly testing to be paid on a monthly basis.

Supporting material is being provided to staff under separate cover.

Sincerely,

Stephen L. Harrington
