_____)	
Respondent)	
)	

The Petitioner asks the Washington Utilities and Transportation Commission to approve construction or reconstruction of a highway-rail grade crossing.

Construction Reconstruction

Section 1 – Petitioner’s Information

2009 MAY 26 PM 2:56

City of Walla Walla

Petitioner PO Box 478

Street Address Walla Walla, WA 99362

City, State and Zip Code Same as above

Mailing Address, if different than the street address Neal Chavre, PE

Contact Person Name 509-524-4511, 509-200-9107 (cell) nchavre@ci.walla-walla.wa.us

Contact Phone Number and E-mail Address

Section 2a – Respondent's Information

Union Pacific Railroad
Respondent 9451 Atkinson St.
Street Address Roseville, CA 95747
City, State and Zip Code
Mailing Address, if different than the street address Terrel Anderson, Manager, Industry and Public Projects
Contact Person Name 916-789-5134 taanders@up.com
Contact Phone Number and E-mail Address

Section 2b – Respondent's Information

Watco Transportation Services
Respondent 325 Mill Rd.
Street Address Lewiston, ID 83501
City, State and Zip Code
PO Box 1166 Mailing Address, if different than the street address Scott Adams
Contact Person Name 208-734-4644 ext. 1106 sadams@watcocompanies.com
Contact Phone Number and E-mail Address

Section 3 – Proposed Crossing Location

1. Existing highway/roadway SR125 (N. 13th Ave.)

2. Existing railroad DOT # 808523R

3. Location of proposed crossing:

Located in the SW 1/4 of the NE 1/4 of Sec. 19, Twp. 7N, Range 36E W.M.

4. GPS location, if known Lat. 46.0772, Long. -118.36083

5. Railroad mile post (nearest tenth) _____

6. City: Walla Walla

County: Walla Walla

Section 4 – Proposed Crossing Information

1. Railroad company No operations at this time – Union Pacific owns and will maintain the crossing.

2. Type of railroad at crossing Common Carrier Logging Industrial
 Passenger Excursion

3. Type of tracks at crossing Main Line Siding or Spur

4. Number of tracks at crossing 2

5. Average daily train traffic, freight 0

 Authorized freight train speed 10 Operated freight train speed < 10

6. Average daily train traffic, passenger NA

 Authorized passenger train speed Operated passenger train speed

7. Will the proposed crossing eliminate the need for one or more existing crossings?

 Yes No x

8. If so, state the distance and direction from the proposed crossing.

9. Does the petitioner propose to close any existing crossings?

 Yes No x

Section 5 – Temporary Crossing

1. Is the crossing proposed to be temporary? Yes No

2. If so, describe the purpose of the crossing and the estimated time it will be needed

3. Will the petitioner remove the crossing at completion of the activity requiring the temporary crossing? Yes No

Approximate date of removal _____

Section 6 – Current Highway Traffic Information

1. Name of roadway/highway SR125 (N. 13th Street)

2. Roadway classification Minor arterial

3. Road authority WSDOT

4. Average annual daily traffic (AADT) 3600 (2029 projection) Actual ADT: 2660

5. Number of lanes 2

6. Roadway speed 30

7. Is the crossing part of an established truck route? Yes No

8. If so, trucks are what percent of total daily traffic? 5.7

9. Is the crossing part of an established school bus route? Yes No

10. If so, how many school buses travel over the crossing each day? _____

11. Describe any changes to the information in 1 through 7, above, expected within ten years:
The proposed project will create a 3 lane section with pedestrian crossings

Section 7 – Alternatives to the Proposal

1. Does a safer location for a crossing exist within a reasonable distance of the proposed location?

Yes _____ No x

2. If a safer location exists, explain why the crossing should not be located at that site.

3. Are there any hillsides, embankments, buildings, trees, railroad loading platforms or other barriers in the vicinity which may obstruct a motorist's view of the crossing?

Yes x No _____

4. If a barrier exists, describe:

◆ Whether petitioner can relocate the crossing to avoid the obstruction and if not, why not.

◆ How the barrier can be removed.

◆ How the petitioner or another party can mitigate the hazard caused by the barrier.

The current crossing is in an urban area so visibility is not totally unobstructed. But,

At the slow speeds run by any trains at this location, there should be adequate stopping

sight distance for motorists using the roadway.

5. Is it feasible to construct an over-crossing or under-crossing at the proposed location as an alternative to an at-grade crossing?

Yes _____ No x

6. If an over-crossing or under-crossing is not feasible, explain why.

A bridge at this location would make it impossible for either the rails to service the intended

facilities, or for vehicle traffic to enter the adjacent commercial properties.

7. Does the railway line, at any point in the vicinity of the proposed crossing, pass over a fill area or trestle or through a cut where it is feasible to construct an over-crossing or an under-crossing, even though it may be necessary to relocate a portion of the roadway to reach that point?

Yes No

8. If such a location exists, state:

- ◆ The distance and direction from the proposed crossing.
- ◆ The approximate cost of construction.
- ◆ Any reasons that exist to prevent locating the crossing at this site.

9. Is there an existing public or private crossing in the vicinity of the proposed crossing?

Yes No

10. If a crossing exists, state:

- ◆ The distance and direction from the proposed crossing.
- ◆ Whether it is feasible to divert traffic from the proposed to the existing crossing.

Section 8 – Sight Distance

1. Complete the following table, describing the sight distance for motorists when approaching the tracks from either direction.

a. Approaching the crossing from North, the current approach provides an unobstructed view as follows: (North, South, East, West)

Direction of sight (left or right)	Number of feet from proposed crossing	Provides an unobstructed view for how many feet
Right	300	90
Right	200	135
Right	100	260
Right	50	425
Right	25	>450
Left	300	65
Left	200	65
Left	100	75
Left	50	90
Left	25	>350

b. Approaching the crossing from South, the current approach provides an unobstructed view as follows: (Opposite direction-North, South, East, West)

Direction of sight (left or right)	Number of feet from proposed crossing	Provides an unobstructed view for how many feet
Right	300	60
Right	200	90
Right	100	90
Right	50	145
Right	25	200
Left	300	400
Left	200	600
Left	100	>600
Left	50	>600
Left	25	>600

2. Will the new crossing provide a level approach measuring 25 feet from the center of the railway on both approaches to the crossing?

Yes x No _____

3. If not, state in feet the length of level grade from the center of the railway on both approaches to the crossing. _____

4. Will the new crossing provide an approach grade of not more than five percent prior to the level grade?

Yes x No _____

3. If not, state the percentage of grade prior to the level grade and explain why the grade exceeds five percent.

Section 9 – Illustration of Proposed Crossing Configuration

Attach a detailed diagram, drawing, map or other illustration showing the following:

- ◆ The vicinity of the proposed crossing.
- ◆ Layout of the railway and highway 500 feet adjacent to the crossing in all directions.
- ◆ Percent of grade.
- ◆ Obstructions of view as described in Section 7 or identified in Section 8.
- ◆ Traffic control layout showing the location of the existing and proposed signage.

Section 10 – Proposed Warning Signals or Devices

1. Explain in detail the number and type of automatic signals or other warning devices planned at the proposed crossing, including a cost estimate for each.

- 1) Install six-inch raised median curb in the turn lane on both sides of both crossings (other nearby crossing 808522J) as depicted in the preliminary design drawings.
- 2) Replace the existing crossbuck signs and posts with new MUTCD-compliant signs and posts.
- 3) Install standard “Yield” signs that comply with MUTCD standards on the same post as the crossbuck signs at both crossings.
- 4) Install emergency notification signs (either I-13 Or I-13a) at both crossings.
- 5) Replace the crossing surfaces with concrete panels and install flange fillers on panels corresponding to the bicycle lane and sidewalk.
- 6) Install advance warning signs that are in compliance with the MUTCD.

2. Provide an estimate for maintaining the signals for 12 months. n/a
3. Is the petitioner prepared to pay to the respondent railroad company its share of installing the warning devices as provided by law?
Yes x No

Section 11 – Additional Information

Provide any additional information supporting the proposal, including information such as the public benefits that would be derived from constructing a new crossing as proposed.

Reconstructing the existing crossing as proposed would provide a smoother roadway surface to cross the tracks, would provide for safe bicycle and pedestrian access across the tracks, and significantly decrease long term maintenance costs for both the agency and the railroad.

Section 13 – Waiver of Hearing by Respondent #2
USDOT #808523R

WATCO
Waiver of Hearing

The undersigned represents the Respondent in the petition to construct or reconstruct a highway-railroad grade crossing.

We have investigated the conditions at the proposed or existing crossing site. We are satisfied the conditions are the same as described by the Petitioner in this docket. We agree that a crossing be installed or reconstructed and consent to a decision by the commission without a hearing.

Dated at _____, Washington, on the _____ day of _____, 20____.
