Warrenville, IL 60555

Dear Mr. Lamanna:

Subject: 2010 Hazardous Liquid Pipelines Standard Inspection – BP Cherry Point

We conducted a hazardous liquid inspection from March 15 - 17, 2010 of BP's Cherry Point pipeline facilities. The inspection included a review of records, Operations & Maintenance and Emergency Response manuals. This inspection also included a field inspection of the pipeline facilities.

I am pleased to report that our inspection noted no violations of state or federal pipeline safety codes.

We would like to thank BP's pipeline personnel for their professionalism and cooperation during this inspection. Docket PL-100013 will be closed as of April 7, 2010.

If you have any questions or need any further assistance, please contact Kuang Chu at (360) 664-1182.

Sincerely,

David D. Lykken
Pipeline Safety Director

cc. Steve Maulding, District Operations Manager, BP Pipelines (North America), Inc.
