The purpose of this filing is to add Dedicated Ethernet Service to the tariff. Dedicated Ethernet Service provides a packet-switched point-to-point arrangement for customers requiring high-band width data applications between their locations. The service is offered based on speeds ranging from 1.5 to 10 Mbps, and on terms ranging from 12 months to 60 months. The arrangement requires a minimum of 2 customer premise locations, but allows multi-location arrangements within the company's local exchanges.

The proposed effective date is February 14, 2011.

If you have any questions, please feel free to contact me.

Sincerely,
