Utilities and Transportation Commission
1300 S. Evergreen Park Dr. SW,
Olympia, WA 98504-7250

Gentlemen:

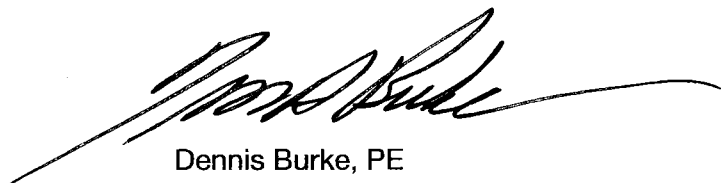

Parkland Water Company again requests removal from UTC regulation pursuant to RCW 80.04.010 (30)(e) effective September 9, 2012.

Parkland Water Company serves 8 customers and currently charges an average annual fee of \$492 which is below the \$557 rate that becomes effective September 9, 2012. Parkland Water Company does not intend to charge an annual fee exceeding the WAC 480-110-255 (1)(b) rate.

Parkland Water Company has operated in Thurston County for over 20 years without complaint. Parkland water Company is a licensed water company that meets, and has met for over 20 years, all licensing and statutory requirements.

Parkland water Company's request is made in order to assure its survival and its ability to provide water to it's customers. UTC's accounting and reporting requirements are an economic, time consuming and disruptive burden to the utility. Furthermore, Parkland Water can not guarantee to its customers that at some time in the future it may inadvertently, for whatever reason, file a late report to the UTC and thereby be subject to arrogant, draconian, bankrupting, threats, and fines (exceeding 50% of its total annual revenue) from the UTC, an agency that provides, and has provided no benefits to Parkland Water over the past 20 years.

Sincerely yours,

Dennis Burke, PE
