RE: Rabanco Ltd. / Lynnwood Disposal Tariff Filing

Dear Mr. King,

Enclosed please find an adjusted page 25a from the subject tariff (4). It was recently discovered that there was an error made in last year's filing during the commodity credit adjustment (TG-141293). There were certain service levels (35 yard Roll Off containers and above extra mileage) that were inadvertently adjusted down to the rates that were effective prior to the General Rate Case finalized shortly before the commodity credit adjustment (TG-140594). These rates have been posted on the Commission's website for almost a year now but since these service levels are very uncommon we have not had any customers request or pay for these items during this time period. Multi-family Roll Off customers typically opt for compactor service rather than using such a large open top industrial container. Given the fact that there have been no charges on these services, and, working with WUTC staff, we are all in agreement that the rate adjustments were made in error, we are asking for the attached rates to be adjusted back to those settled on during the GRC noted above.

Please let me know if you have any questions.

Sincerely,

Connor Vander Zalm
