

WASHINGTON WATER SERVICE COMPANY

May 17th, 2018

Steven V. King, Executive Director & Secretary Washington Utilities and Transportation Commission PO Box 47250 Olympia, WA 98504-7250

Dear Mr. King;

Enclosed is a copy of the contract between Mike Diaz and Washington Water Service Company (WWSC) to extent the current water main line to provide water utility service to the 7115 78th Avenue NW parcel. This site is on parcel # 0121114005 in Pierce County, which is serviced by Cedar Crest Water System, DOH ID #11887T. This agreement has been signed by Michael Diaz and countersigned by Scott Bailey, the General Manager of WWSC.

Estimated costs identified on attachment A are \$73,400.00 plus Washington State Sales Tax. Washington Water will be responsible for the main extension by providing all engineering, construction and other items noted in Attachment A, for a projected cost of \$68,112.40 with the Owner of the property to contribute \$5,000 toward the project cost. To this extent, a payment of \$5,115.04 has been received, as attached.

Upon completion and certification of the extension, Michael Diaz will provide to WWSC a Bill of Sale which will transfer ownership of the facilities to the company.

A vicinity map showing the location of the lot is included with this filing. Please do not hesitate to call me at 253-851-4060 ext. 1105, if you have any questions.

Sincerely,

Kanosi Chakweva Accounting Manager

Re: Cedar Crest Water System, DOH ID#11887T, Pierce County Water Main Extension Agreement for 7115-78th Avenue NW Parcer No. 0121114005 / 1 Service Connection

Dear Mr.Diaz:

This Water Main Extension Agreement (the "Agreement") is between Washington Water Service Company (the "Washington Water") and Mike Diaz (the "Owner") to extend the current water main line to provide water utility service to parcel(s) referenced above. This Agreement sets forth the terms and conditions as well as our engineers projected costs to complete the distribution system extension and install 1 service connection to the Cedar Crest Water System. The final cost for completing this project is based on actual costs of engineering, materials, labor and other variables needed to complete the project.

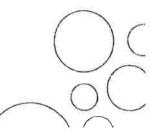

Our engineering department has projected the cost, including taxes, to extend the water main to the parcel(s) listed above to be \$73,400. For your records, a detailed breakdown of the projected costs for this project is enclosed as "Attachment A". Washington Water will be responsible for the main extension by providing all engineering, construction and other items noted in Attachment A, for a projected cost of \$68,112.40 with the Owner of the property to contribute \$5,000 toward the project cost.

Terms & Conditions

The projected costs are for engineering, construction materials and labor only, unless otherwise specified in Attachment A. Upon execution of this Agreement and prior to commencement of construction, Washington Water requires a full payment of the Owner's contribution to the total projected costs to complete the distribution system extension and installing service connection(s). The service installation does not include hook up fee(s) of \$543.60 (per service connection), nor the issuance of Certificates of Water Availability; these fees are billed separately from this Agreement. All past due accounts will be charged 1.5% per month (18% per annum). The estimate costs as set forth in this Agreement are subject to change after (30) days of the above written date.

Terms and conditions of this Agreement are subject to the review and approval of the Washington State Utilities and Transportation Commission (the "Commission"). Upon execution of this Agreement, Washington Water will submit the Agreement to the Commission for their approval. Upon the Commission's approval, plans will be prepared, and if required, submitted to the Washington State Department of Health for their approval. Once all necessary approvals have been obtained and the required deposit received, Washington Water w³ schedule and cause construction to commence.

Quality. Service. Value. wawater.com

Washington Water will not issue any Certificate(s) of Water Availability until all mains have been installed, pressure tested and certified complete by a licensed engineer; and the final payment for the work completed as outlined in this Agreement has been received. Prior to commencement of domestic water service, Washington Water requires all remaining amounts and hookup fees be paid in full. Hookup fees for each dwelling unit as listed in Washington Water's approved tariff are billed separately from this Agreement and must be paid prior to installation of individual meters.

Neither this Agreement nor any of the rights, interests or obligations under this Agreement may be assigned or delegated, in whole or in part, by operation of law, or otherwise, by Owner without the prior written consent of Washington Water, and any such assignment without such prior written consent shall be invalid. Nothing expressed or referred to in this Agreement will be construed to give any person other than the parties to this Agreement any legat or equitable right, remedy, or claim under or with respect to this Agreement or any provision of this Agreement. This Agreement and all of its provisions and conditions are for the sole and exclusive benefit of the parties to this Agreement and their successors and assigns.

Upon execution of this Agreement, the Owner has 180 days to coordinate with Washington Water for the engineering and construction to complete this project. This Agreement shall automatically become invalid unless the work authorized in the agreement has commenced within 180 days after execution. Once this Agreement has become invalid, the project will be closed and all project work will cease; a refund check will be issued to the Owner for any deposit paid minus any bilable work and non-refundable fees.

l agree to have, Washington Water to complete this installation under the conditions listed below:

- Remit payment in full of \$5,000 (Plus W.S.S.T. of \$115.04) for a total due of \$5,115.04 by Owner for the Owner's contribution toward the project.
 - Washington Water will be responsible for the remaining projected engineering, construction costs for labor and materials and any outside contract services. Per Attachment A, the total projected is \$62,542.46 (plus a Contingency fee of \$4,053.22 and W.S.S.T. of \$1,516.72) for a total projected construction cost of \$68,122.40.
 - Total projected cost for construction, engineering and outside contracted costs is \$73,227.44.

BEFORE CONSTRUCTION BEGINS:

- The signed Agreement and the required payment of \$5,115.04 must be received by Washington Water before any work will be scheduled, including purchasing materials.
- Schedule a pre-con meeting, this meeting *will not be scheduled* until all required paperwork and payment has been received.
- Review detailed plans and specifications with Washington Water's Construction Superintendent or Construction Foreman.
- · Provide names of any contractor(s) that may be working on-site
- If required, Washington Water will be responsible for obtaining all necessary regulatory agency approvals, and permits to tap the existing water main and schedule with outside contractors.

DURING CONSTRUCTION:

Review status of project with Washington Waters Engineering Department.

2 | Page Quality. Service. Value, wawater.com

Initial

DURING CONSTRUCTION:

- Review status of project with Washington Waters Engineering Department.
- Time required to complete this project may vary due to size of the project, projects already scheduled and emergencies that may require construction crew to leave project site.

BEFORE TIE-IN/ACTIVATION OF NEW FACILITIES:

- Schedule a final inspection meeting with Washington Water to review installed facilities and that they have been installed in accordance with the specifications provided in the engineering plans.
- Before service will be activated, a Reduced Pressure Backflow Assembly (RPBA) maybe required to be installed on the customer side of the meter. If required, Washington Water can install the RPBA at a time and materials cost. The annual testing and repairs of the RPBA is the
- responsibility of the parcel owner

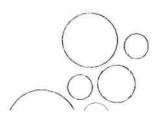

If the terms and conditions are acceptable, please sign the signature line below and return this Agreement and the required deposit back to our office. The projected costs submitted in this Agreement is provided as preliminary information only and the figures and information contained herein are subject to the execution of this Agreement within (30) days of this date. If you have any questions, please give me a call directly in Gig Harbor at (253) 851-4060 or toll free at (877) 408-4060.

W:\FORMS\Customer Service Department\Applications for Water Service\APPLICATION FOR WATER SERVICE (New Customers)_2016.docx

TERMS & CONDITIONS OF WATER SERVICE

Please initial in the space provided indicating you have read and understand the service requirements below:

 A. Unless otherwise agreed upon in writing, only one single-family unit may use a water service. Any outbuilding, trailer or mobile unit housing a separate family or tenant shall be considered a single-family unit.

B. Unless otherwise agreed upon in writing, the owner of the property being served shall be and remain responsible for all proper charges. This shall apply even in the event Washington Water Service Company bills a tenant direct. Per Tariff Schedule 2, the basic charge for this service is not subject to cancellation or reduction for seasonal or temporary periods of time unless seasonal rates apply per our tariff. If customer elects to discontinue service the meter will be removed from the property and a new meter hook up fee will be required to reinstate service if a connection is available at the time of the request. Landord Reversion Agreements are available to maintain service to the owner between tenants if requested.

2. Owner will provide Washington Water Service Company a copy of any irrigation system planned, which must show maximum instantaneous demand of system and hours per day and number of days per week system will be used. Washington Water reserves the right to control or regulate irrigation or other uses of water, which affects the performance of the water system.

3. Owners who have residential irrigation systems are required to install an approved backflow prevention device and have it inspected by a certified Backflow Assembly Tester at their expense on an annual basis per WAC 246.290.490. Washington Water must be provided a copy of the inspection report on an annual basis. Service is subject to disconnection if a device is not installed and tested annually. At the time the system is installed, owners are also required to provide an as-built of the irrigation system for their file and to design their system to use no more than 15 GPM (gallons per minute) per zone.

4. Washington Water is responsible for services to, and including, the meter and any check valve where a check valve is installed by the utility. It is the customer's responsibility to check for excess pressure and if needed, install and maintain a pressure reducer. Customers are responsible for the installation, maintenance and repairs of their private service line (downstream of the utility's meter) on their property.

5. Washington Water will not be responsible for connecting a customer's service line to the meter.

6. Washington Water is not responsible for pressure loss beyond the meter, and recommends nothing smaller than a 1" water line with 160 psi rating. Lines should be buried at least 18" deep for freeze protection.

7. These rules and regulations set forth the duties and obligation of both customer and Washington Water Service Company. A copy of the rules and regulations are available on our web site at <u>www.wawater.com</u> or in our office for review. A copy is also provided to the customer at the time the application is completed and service is activated.

8. Monthly water charges will be assessed according to our approved Tariff. These charges begin the day the meter is installed for new services. For existing services the charges will begin the day of legal possession or the taking of water from the meter. Any hook-up fees applicable must be paid prior to the meter installation.
