Re: Meters and Meter Testing Procedures Tariff Revisions

Dear Mr. Johnson:

Cascade Natural Gas Corporation (“Cascade”) hereby encloses for filing the following proposed tariff sheets containing a requested effective date of May 10, 2019:

Sixth Revision of Sheet No. 11
Second Revision of Sheet No. 11-A
Original Sheet No. 11-B

The purpose of this filing is to update the Meters and Meter Testing Procedures tariff. The reason the Company is doing this is that it would like to eliminate the need to update both the metering tariff and the Statistical Sample Program (“Program”) which is referenced within the tariff itself. Both the tariff and the Program contain a lot of the same language which results in the Company having to update both the tariff and the Program whenever a change is made in either the tariff or the Program.

Also, we are changing the software used to run the Program over to what our Utility Group (Montana-Dakota Utilities, Cascade, and Intermountain Gas) currently uses. While the program philosophy is not changing, there will be some subtle changes such as the installation date vs. test date within a family of meters. However, with the randomness of results being produced, the overall testing should not change.

If you have any questions about these proposed changes, feel free to call Brett Hudson at 509-734-4573.

Sincerely,

/s/ Michael Parvinen
