**Subject:** Network Collapse and Transfer of existing NPANXXs State of Washington

Beth

This email is to serve notification that we are going to be collapsing our Broadwing/Focal, ICG and our Adelphia/Telcove networks; All existing NPA NXX's that we have will be fully audited and we will transfer all contaminated Codes and blocks to our end state network Level 3 Communications. Where we find fully ported out thousands blocks to a single carrier we will work directly with them and relinquish to their OCN. After the network collapse is completed and all customers have been accounted for any blocks that are under 10% contaminated and does not contain our active LRN and we do not need resources will be disconnected back to the Pool.

We had already sent notification back in August 2019 in regards to states we were aware required this to be sent now we are adding the State of Washington to this notification as they also require a plan and notification to NANPA for these types of activities.

If you have any questions and or concerns feel free to reach out.

Thank you

Kathy
