

**SCHEDULE 300
RESIDENTIAL CONSERVATION INCENTIVE PROGRAM**

AVAILABILITY

This program is available throughout Cascade’s Washington service territory to qualifying residential customers served on rate schedule 503 upon meeting the requirements contained in the following eligibility section.

PROGRAM DESCRIPTION

This program is designed to increase energy efficiency in residential households within Cascade’s service territory by providing rebates for the installation of certain energy efficiency measures in qualifying residential dwellings.

ELIGIBILITY

To qualify for incentives, customers must meet the end-use qualifications identified in the Measures and Incentive Table below. Additionally, as applicable to the project, baseline insulation levels in existing structures must not exceed the following baseline specifications in order to qualify for an incentive.

	Existing Insulation Level
Ceiling/Attic	R-19 or less
Floor	R-11 or less
Wall	R-4 or less

Rebates are intended to incentivize high efficiency choices and where existing equipment meets the high efficiency standard, replacement with a high efficiency upgrade is disallowed.

4 Bundles are subject to change in consultation with the Cascade Conservation Advisory Group (CAG).

5 Use of tankless water heater is acceptable for combined space and water heating with a Uniform Energy Factor of 0.95 or higher. Combined use of indirect, non-fired tank is acceptable for use with approved 95% AFUE Boiler where required.

6 Specifically per CSA P.4-15 Testing Standard referenced to downloadable Natural Resources Canada EnerGuide database of December 3, 2018 and later. Eligibility for older models not referenced in the December 2018 or later downloadable database, based per CSA P.4 Testing Standard referenced to downloadable Natural Resources Canada EnerGuide database of February 14, 2017.

7 Requires that a minimum of 30% of applicable ductwork is outside of conditioned space.

8 Leakage reduction required to be verified and documented through pre and post blower door testing.

9 Pre-existing window type must be single pane window.

PROGRAM COST RECOVERY

The administrative and program delivery costs associated with this program will be accounted for and recovered through an annual deferral amortization.

PROGRAM SPECIFICATIONS

1. All installations of weatherization and equipment must comply with all codes and permit requirements applicable in the state of Washington and must be properly inspected, if required, by appropriate agencies.
