BNSF Northwest Division, Scenic Subdivision milepost 1776.5. The X marks the location of the fatality. This is a tangent section of track however sight distance to the west from the direction of the on-coming train would have been limited by the arch of the bridge deck over the river. Sight distance to the east is more than 1500'.

Snohomish River Bridge spans more than a half mile over the Snohomish River, Old Snohomish Monroe Road and the Pilchuck River.

DA Farm Service Agency, Map data ©2021 500 ft

BNSF Northwest Division, Scenic Subdivision Milepost 1776.5.

Sight distance to the east is limited due to the arch of the bridge deck. This is the direction the train was headed. Incident location is marked with an X.

This is the bridge structure. The incident location marked with an X is on the east side of the Snohomish River.

Sight distance to the west. From the point of impact this sight distance would have been limited from the arch of the bridge deck. This is the direction that the train was approaching from.

Cause of Death

Cause of Death is a term used to indicate the medical cause of death, listing the disease(s) or injuries that caused death. Specific cause of death information is recorded on the death certificate and is entered into the Vital Statistics System of the State of Washington.

Manner of Death

Manner of Death is the way to categorize death as required by the Washington State Department of Health. The classifications are Natural, Accident, Suicide, Homicide, Undetermined, and Pending. Only medical examiners and coroners may certify non-natural deaths.

Natural is defined for Medical Examiner death certification purposes as a death due solely to an illness or medical issue not influenced by external factors.

Accident is defined for Medical Examiner death certification purposes as an unnatural death resulting from an inadvertent chance happening.

Suicide is defined for Medical Examiner death certification purposes as a death from self-inflicted injury with evidence of intent to die.

Homicide is defined as the action of one person directly causing the death of another. All murders are homicides, not all homicides are murder. An example may be an unintentional firearms-related hunting death.

Undetermined is for cases that have very little available information about the circumstances surrounding death (e.g., partial skeletal remains) or where known information equally supports, or conflicts with, more than one manner of death.

Pending is a temporary designation for cause and/or manner when additional investigation, information and/or test results are required for certification. Pending is generally amended as soon as additional information becomes available.

*A full explanation of Cause and Manner can be found in our [Annual Report](#).

The postmortem report is confidential in the state of Washington ([RCW 68.50.105](#)). Visit the [Records Request](#) page for information on obtaining postmortem reports.

OfficerID: so1673, Narrative

On May 13th, 2021, I was assigned to work uniformed patrol in a fully-marked Snohomish County Sheriff's Office patrol vehicle as 3C4. At approximately 0617 hours, I was dispatched to a priority collision at 10325 Airport Way Snohomish, WA 98296. Prior to my arrival, dispatch informed responding units that the reported collision was a train versus pedestrian.

I parked my patrol vehicle at the 9700 blk of Airport Way, where the train was stopped across all lanes of traffic. I then followed the train east by approximately half a mile with fire personnel to search for the victim. As we made our way east towards the Snohomish River, we made contact with the train engineer, Aaron Anthony. Aaron informed us that he saw the incident. Aaron then led us to the victim, who was located on the north side of the train tracks, just east of the Snohomish River.

It was readily apparent that the victim was deceased; the victim was lying face-down and his jacket was lifted up above his head. When the victim's jacket was lifted to check for signs of life, it appeared as though one half of the victim's head was missing. Located approximately thirty to forty feet west of the body was a large amount of brain matter, blood, and skull fragments of various sizes. There was no chest movement indicating breathing of any sort, and his skin appeared pale.

Located in the back pocket of the subject's pants was a wallet which contained his ID. Using his Washington State ID, the victim was identified as Curtis Russel. CIU was consulted and they declined to respond. The Medical Examiner was also contacted, and I was informed that he would be responding to our location for his investigation.

While waiting for the medical examiner, I spoke with Aaron. He identified himself as the train engineer and when asked if he would like to provide a statement, he stated he needed to speak with his "rep" before making any statements. Aaron was cooperative and he provided me with a phone number for future contact.

Medical Examiner Daniel Garcia responded to our location and after he conducted his investigation, I assisted him with placing Curtis on a stretcher for transport. Medical Examiner Garcia then informed me that he located a small plastic bag of meth among the brain matter. I collected it and later booked it into evidence for destruction.

Curtis was transported from the incident location and I cleared the scene without further incident. Photographs taken with my department-issued phone were booked into evidence via DigitalOnQ.

CASE DISPOSITION: At this time, it is unclear whether Curtis intended to commit suicide, or not. Attempts to contact Aaron for his statement have been unsuccessful. Aaron has called my department-issued phone; however, I was unavailable for contact at that time. Follow-up is required to gather Aaron's verbal or written statement regarding the incident. Should he provide a statement; a supplemental case will be submitted detailing the contact.

RE: Public Records Request Tracking Number: K054141-070621

Please note that there are black boxes (redactions) on various pages of the responsive documents. The black box may be small or large depending on the amount of information that is redacted. There may also be multiple redactions on one page. Within the redaction is a code – for example, 1A, 1B, etc. That code designates the statutory exemption applicable to the redacted information. If there is only one code on the page, but there are numerous redactions, that one statutory exemption applies to all of the redactions on that page. Otherwise, the code printed within the redaction designates the exemption for that redaction.

Also provided with these records is a key to the codes. This key identifies the statutory basis for the exemption as well as a brief explanation for why the exemption applies to the redacted information. As you review these responsive documents, you can refer to the key to identify the exemption and its applicability.

We have attempted to apply consistent redactions on document that contain the same information. In the event you locate documents that contain redactions that are not applied consistently, please let us know.

Finally, the disclosure of information in the records being produced does not in any way constitute a waiver of attorney-client and/or work product privileges. If you have any questions, please contact our office at 425-388-3769.
