### Section 3 – Crossing Location

1. Existing highway/roadway: Wallula Ave.
2. Existing railroad: CWW
3. USDOT Crossing No.: 810015B
4. GPS location: 46.056328, -118.377513
5. Railroad mile post (nearest tenth): 29.5
6. City: College Place County: Walla Walla

# Section 4 – Highway Information

1. Name of highway: Wallula Ave.
2. Road authority: City Of College Place
3. Average annual daily traffic (AADT): 3302
4. Number of lanes: 2
5. Roadway speed: 30
6. Is the crossing part of an established truck route?  Yes  No
7. If so, trucks are what percent of total daily traffic?
8. Is the crossing part of an established school bus route?  Yes  No
9. If so, how many school buses travel over the crossing each day? 2
10. Describe any changes to the information in 1 through 9, above, expected within ten years:  None
11. What is the available sight distance from the stop bar (or 25 feet from the tracks if no stop bar) on both approaches to the crossing?
East approach +400'ft. West approach 300'ft.
12. If the sight distance is less than 400 feet, describe the structures, roadway or track curvature, visual obstacles or other characteristics that limit sight distance.
There is a building reducing visiablity to 300'ft on west approach.

# Section 5 - Railroad Information

<ol> <li>Railroad company: CWW LLC</li> <li>Type of railroad at crossing: ✓ Common Carrier Logging Industrial</li> </ol>			
2. Type of railroad at crossing:			
Passenger Excursion			
3. Type of tracks at crossing: Main Line Siding or Spur			
4. Number of tracks at crossing: 1			
5. Average daily train traffic, freight: 1-2			
Authorized freight train speed: 10 Operated freight train speed: 5-10			
6. Average daily train traffic, passenger: 0			
Authorized passenger train speed: Operated passenger train speed:			
7. Describe any changes to the information in 1 through 6 above, expected within ten years:			
gu-mennethidinintenannyingan-manakathinintenanna-manakathinintenan			
None			

#### Section 6 - Current Warning Devices

Provide a complete description of the warning devices currently located at the crossing (vehicle and pedestrian), including signs, gates, lights, train detection circuitry, and any other warning devices.

Logic Unit - PMD2
One mechanical Bell
12 - 12" LED Roundels
Two gates with LED lights
13 nickle cadmium water batteries
Two older style cragg chargers
Two Crossbucks
Four railroad crossing symbol signs

### Section 7 – Description of Proposed Changes

Describe in detail the number and type of proposed automatic signals (vehicle and pedestrian), gates, other warning devices, and/or changes to train detection circuitry. (RCW 81.53.271) Please describe any other proposed changes at the crossing, including changes to the crossing surface, signage, pavement markings, etc. If sidewalks are being installed, please provide information on who will maintain them. Attach additional information sheets, if needed.

Would like to replace both sets of nickle cadmium water batteries with non-water, maintenance free batteries. The nickle cadmium batteries are old, from the 1970's.

Would like to replace both CRAGG chargers. Chargers are old, from 1970's.

Main reasons why I'd like to replace all this is because I am starting to see failures and the water batteries are toxic/corrosive.

## Section 8 – Illustration of Crossing

Attach a detailed diagram, design drawing, map, or other illustration showing the current and proposed layout of the road, crossing surface, and railway in the vicinity of the crossing, including shoulders, sidewalks, lanes of travel, bike lanes, warning devices, pavement markings and any other applicable crossing conditions.

### Section 9 - Traffic Signal Preemption

Section 9 – Traffic Signal Freemphon		
Are the railroad signals currently interconnected with a traffic signal(s)?  Yes  No  Will this project interconnect railroad signals with a traffic signal(s) or modify the existing traffic signal preemption timing?  Yes  No  If yes, attach documentation supporting the proposed traffic signal preemption timing calculations (e.g., TXDOT Guide for Determining Time Requirements for Traffic Signal Preemption at Highway Rail Grade Crossings or similar preemption worksheet/plan), which must be certified by a professional engineer.		
Section 10 – Description of Public Safety Need		
Describe and support the public safety need for the proposed changes. (RCW 81.53.261)		
If commercial power goes out, the lead acid batteries or chargers could fail before commercial power comes back. This would result in a dead crossing, no lights or gates activating.		
Section 11 – Approximate Cost of Installation and Related Work		
1. Provide the approximate cost of installation and related work for the proposed changes to		
signals and/or warning devices: \$11,231		
2. Provide an itemized breakdown of materials, names of the parties contributing to the project, including labor, and the amount each is contributing:		
3. Provide the amount requested from the GCPF grant program (RCW 81.53.271): \$11,231		

# Section 12 – Approximate Cost of Annual Maintenance

Provide the approximate cost of annual maintenance for the signals and/or warning devices (RCW 81.53.271):
\$1000/year for maintenance
Section 13 – Cost Apportionment
If the commission directs the installation of or changes to the warning devices requested in this petition, it will apportion installation and maintenance costs in accordance with the applicable statutes. (RCW 81.53.261-295)
Interested parties may instead enter into an agreement providing for the installation of signals or other warning devices or for the apportionment of the cost of installation and maintenance. (RCW 81.53.261) If the parties to this petition have reached an agreement related to apportionment of costs, please sign here to confirm:
Petitioner Signature: Respondent Signature:
Section 14 – Project Completion Date
Project completion date: 6/31/22

# Section 15 - Waiver of Hearing by Respondent

Waiver of Hearing				
The undersigned represents twarning devices at the follow		tion to mo	dify highway-	rail grade crossing
USDOT Crossing No. 810	015B			
We have investigated the coas described by the Petitione proposed traffic signal preenthe warning devices should hearing.	er in this docket. We have inption timing calculations	reviewed as submi	and have no ob tted with this p	ojection to the etition. We agree

#### Checklist prior to submitting petition:

- ✓ Ensure all petition fields are completed.
- ✓ Ensure parties sign Section 13 regarding any Cost Apportionment agreement, if applicable.
- ✓ Obtain signature on Waiver of Hearing (Section 15). *If respondent fails to sign Waiver, advise UTC staff upon submission.*
- ✓ Attach copies of:
  - o Illustration of crossing (described in Section 8).
  - o Proposed traffic signal preemption timing calculations, if applicable (described in Section 9), and identification or documentation that the calculations are certified by a professional engineer.
  - Any other relevant documents to support the petition, including but not limited to support of public need, project information, etc.

Submitting the petition: To officially file the petition, send the petition form and supporting documents to records@utc.wa.gov.
