New resources must sign contracts through the end of 2035. Existing resources must execute 10-year contracts. Resources not
RCW 80.80.40 compliant must execute 5-year contracts. All new resource contracts must begin delivery within 3 years of execution;
renewal QF contract terms must begin at time of existing contract expiration.
 HLH (heavy load-hours) are defined as 6:00 am until 10:00 pm all days. LLH (light load-hours) are defined as all other hours.

QF may cease deliveries during periods where prices are negative

- Capacity payments are based on an annual capacity value multiplied by the standardized on-peak capacity contribution divided by a standardized capacity factor. Once QF output exceeds that of the assumed capacity factor level, capacity payments will cease until the next contract year.
- 2. Existing resources with 3 years of operating history will receive a \$/MWh payment derived using the \$/kW-mo rate. To convert the \$/kW-mo rate to a per-MWh rate, multiply the \$/kW-mo rate by 12 months and multiply it again by the capacity contribution factor defined in tariff and then divide that figure by the average capacity factor over the same number of years used to define the capacity contribution factor.
- On-Peak Capacity Contribution Assumptions <3 Years Operating History:
 On-System Wind: 5% Montana Wind: 30% Solar: 2% Solar + 4Hr Battery: 15%
 Hydro: 61% Other: 100%
- 4. Standardized Capacity Factor Assumptions <3 Years Operating History: On-System Wind: 31% Montana Wind: 49% Solar: 24% Solar + 4Hr Battery: 23% Hydro: 37% Wood Biomass: 77% Geothermal (off-sys): 92%
- Fixed rate is for contracts ending in 2035. Shorter terms will receive capacity payment based on value provided over the term of the contract.
- 6. Capacity contribution payment with batteries is based on the size of the resource itself, not the summation of the battery and resource. Battery size is assumed to be equal to a multiple of the underlying resource capacity (e.g., 2 MW solar + 4 hr battery = 8 MWh battery).

1. HLH (heavy load-hours) are defined as 6:00 am until 10:00 pm all days. LLH (light load-hours) are defined as all other hours. After 15 years rates are escalated using growth rate between year 14 and year 15.
 Rate does not include adjustments for variable energy resource integration charges.
