COMMISSION

AMENDMENT 8  
TO THE  
TELECOMMUNICATIONS SERVICES AGREEMENT  
BETWEEN  
VERIZON GLOBAL NETWORKS INC.  
AND  
MCI WORLDCOM NETWORK SERVICES, INC.

This Amendment 8 to the Telecommunications Services Agreement (Contract No. TSA010302-1) (Agreement) by and between MCI WORLDCOM Network Services, Inc., a Delaware corporation, with offices at 6929 N. Lakewood Avenue, Tulsa, Oklahoma 74117 ("Provider"), and Verizon Global Networks Inc., a Delaware corporation, with offices at 6665 N. MacArthur Boulevard, Irving, Texas 75039 ("Customer") shall be effective on the date set forth below.

1. EFFECTIVE DATE

This Amendment 8 shall be effective January 1, 2003.

2. AGREEMENT MODIFICATION

- 2.1 ADD a new Section 13 to Exhibit B beginning on page B-22B. (See Attachment 1 to this Amendment) ✓
- 2.2 ADD a new Section 36 to Exhibit C beginning on page C-41L. (See Attachment 2 to this Amendment)
- 2.3 ADD a new Attachment C-17 to Exhibit C as set forth in Attachment 3.

3. OTHER TERMS AND CONDITIONS

Except as specifically amended herein, the terms and conditions of the Agreement, including any Amendments thereto, shall remain in full force and effect during the term of the Agreement.

IN WITNESS WHEREOF the parties have entered into this Amendment 8 as of the date set forth above.

MCI WORLDCOM NETWORK SERVICES, INC.

VERIZON GLOBAL NETWORKS INC.

ATTACHMENT 1 REDACTED

Outage (i.e. opens a "Trouble Ticket") and ending on the date and time that service on that circuit is restored.

To determine whether the SLG has been satisfied, a monthly "MTTR circuit average" will be determined by dividing the cumulative length of Service Outages for a circuit by the total number of Trouble Tickets opened during a monthly billing period for the circuit.

13.2.2 Service Availability: Service Availability is the total number of minutes in a monthly billing period during which service on that circuit is available for use by Customer, divided by the total number of minutes in that monthly billing period. For the purposes of this Section 13, Service Availability will be calculated by taking into account the time between the initiation of a Trouble Ticket for a Service Outage and reductions in time for factors or conditions that are not Provider's service responsibility.

13.2.3 Service Outage: An unscheduled period of time when service is unavailable for use by Customer. A Service Outage is defined as 60 or more seconds of service unavailability within a 15-minute period measured by Provider. A Service Outage may occur as a result of Provider's failure to meet its performance obligations or for factors or conditions that are not Provider's service responsibility, including those specified in the "Exclusions" section below. The SLGs described herein only apply to Service Outages; degradation of service (e.g., slow data transmission) is not covered.

13.2.4 Trouble Ticket: The method of reporting by Customer to Provider of a perceived Service Outage.

13.3 Qualifications: To be eligible to receive an SLG credit for a Service Outage, Customer must:

13.3.1 open a Trouble Ticket within four hours of first learning of a Service Outage; and,

13.3.2 make a written request for SLG credit to Provider within five days of opening the Trouble Ticket. When making an SLG credit request, Customer must provide Provider with the following information: (i) the Trouble Ticket number; (ii) the date and time the Trouble Ticket was opened; and (iii) the circuit ID number for each circuit that experienced the Service Outage.

13.4 Service Level Guarantees:

13.4.1 Service Availability = 100 percent

13.4.2 Mean Time to Repair (MTTR) = 2 hours

13.5 Credits: During any monthly billing period in which Provider fails to meet an SLG for a circuit, Customer will receive credit for that circuit, as set forth below, provided, however, that Customer may not receive a credit for a circuit for more than 6 months in any twelve (12) consecutive month period. Subject to Subsection 13.5.2 below (if applicable), the credits described herein shall apply

in lieu of any and all other service outage guarantees or credits including guarantees or credits set forth in any applicable Provider tariff or contract for which Customer may have otherwise been eligible.

13.5.1 For any billing month in which Provider fails to meet one of the SLGs described in this Section 13, Provider will provide a credit equal to 25 percent of the monthly recurring circuit charges, after application of all discounts. If Provider fails to meet one of the SLGs described in this Section 13 in any two consecutive billing months, Provider will provide a credit equal to 50 percent of the monthly recurring circuit charges, after application of all discounts, for the second month.

13.5.2 If Provider fails to meet one of the SLGs described in this Section 13 in any three consecutive billing months, either: (i) Provider will provide a credit equal to 100 percent of the monthly recurring circuit charges, after application of all discounts, for the third month and each consecutive month thereafter that Customer remains subscribed to the circuit and Provider fails to satisfy the SLG; or (ii) Customer may terminate service for that circuit without incurring termination liability, except for charges incurred prior to service termination, provided that Customer notifies Provider in writing of its intent to terminate the circuit no later than 30 days after the conclusion of the third month or any consecutive month thereafter. For a failure in three consecutive months or more, Provider, upon written notice to Customer, may terminate this Section 13, in which case Customer's future Service Outage credit(s), if any, will be described in Subsection 2.6.1.3 of MFS Telecom, Inc. Tariff FCC No. 2.

13.5.3 As Service Availability and MTTR are different ways of measuring potentially the same interruption, Customer will only receive non-compliance credits for the missed SLG resulting in the greater credit.

13.6 Exclusions: Service Availability and MTTR SLG calculations will not include time during which a Service Outage results from any one or more of the following:

13.6.1 Scheduled service maintenance.

13.6.2 Labor strikes affecting service.

13.6.3 *Force majeure* events beyond the reasonable control of Provider (including, but not limited to, acts of God, government regulation, and national emergency).

13.6.4 Service Outages attributable to the installation of a new circuit.

13.6.5 Service Outages attributable to: customer premises equipment (CPE); any third party equipment; or any Customer application on a covered circuit.

- 13.6.6 Service Outages caused by a local exchange carrier where the local access service was not provided by Provider.
- 13.6.7 Any act or omission on the part of Customer, its contractors, agents or vendors, including any refusal to release the circuit to Provider for maintenance, testing or repair.
- 13.6.8 Provider or its agents not being afforded access to the premises where the access lines associated with Customer's service originate or terminate.
- 13.6.9 Customer's use of services in an unauthorized or unlawful manner.
- 13.6.10 Provider disconnects or suspends Service based on Customer's nonpayment.
- 13.6.11 Customer submits an incorrect Service Order.

ATTACHMENT 2

(ADD THE NEW PAGES C-41LAND C-41M FOR A NEW SECTION 36 METRO PRIVATE LINE SERVICE)

36. METRO PRIVATE LINE SERVICE (TYPE 1 – ON NET)

36.1 Metro Private Line (MPL) is an intraLATA dedicated circuit with the following characteristics:

36.1.1 Connecting two (2) or more locations on Provider's Option 1 network platform.

36.1.2 Available in bandwidth options from DS0 to OC192.

36.1.3 Provisioned utilizing Provider's local network.

36.2 MPL provides Customer the benefit of ring restoration because of the SONET ring architecture of provider's local network.

36.3 MPL features aggressive installation intervals, minimal Mean-Time-to-Repair (MTTR) and aggressive Service Level Guarantees (SLGs) as set forth in **Exhibit B, Section 13**.

36.4 MPL features "Corridor Zones", which are pre-determined city pairs where Customer can order interLATA circuits at intraLATA prices.

36.4.1 The interLATA (or interstate) areas are provisioned on Provider's local network instead of Provider's long distance network.

36.4.2 Corridor Zone circuits are priced end to end – there are no additional IXC private line and access loop charges.

36.4.3 The city pairs where Corridor Zones currently exist are set forth in **Attachment C-17A**. Corridor Zone pricing is valid only in the cities and LATAs listed in the Attachment. In the event Provider makes available additional Corridor Zones, the parties agree to update Attachment C-17A.

36.4.4 Customer locations may be lit or un-lit buildings (Except (i) Washington, DC to Ashburn, VA – the Ashburn end of the circuit must be in a lit building; and (ii) Ashburn, VA to Philadelphia, PA – both ends of the circuit must be in lit buildings).

36.4.5 When pricing Corridor Zone service, the higher rate of the two regions will apply.

36.5 Rates, terms and commitments for Service above OC48 will be determined on an Individual Case Basis (ICB).

37. METRO PRIVATE LINE (TYPE 2 – OFF NET)

37.1 Type 2 service is defined as one connection on a circuit provided by Provider or Provider affiliate while the other connection on the circuit is not provided by Provider or Provider affiliate.

- 37.2 Provider will coordinate the Type 2 non-Provider provided connection on Customer's behalf. Provider charges are equal to or less than the effective Local Exchange Carrier (LEC) tariff or Competitive Access Provider (CAP) for similar services.
- 37.3 Type 2 service is eligible for a three (3) year discount on a one (1) year circuit term and a five (5) year discount on a three (3) year circuit term.

ATTACHMENT 3

(ADD THE FOLLOWING AS A NEW ATTACHMENT C-17 TO EXHIBIT C)

ATTACHMENT C-17

METRO PRIVATE LINE (TYPE 1 – ON NET)

1. INSTALL NON-RECURRING CHARGES (NRC)

Please refer to MFS Telecom, Inc. Tariff FCC No. 2 or any successor tariff for any ancillary charges not specifically mentioned in this Attachment.

Month-to-Month	DS1
POP to POP	\$125
POP to End User	\$250

1-year term	DS0	DS1	DS3	OC3	OC12	OC48
POP to POP	\$0	\$0	\$0	\$1,000	\$1,000	\$1,000
POP to End User	\$125	\$250	\$250	\$1,000	\$1,000	\$1,000
Hub	n/a	\$250	\$250	\$1,000	\$1,000	\$1,000
Endlink	\$125	\$250	\$250	\$1,000	\$1,000	\$1,000

3-year term	DS0	DS1	DS3	OC3	OC12	OC48
POP to POP	\$0	\$0	\$0	\$1,000	\$1,000	\$1,000
POP to End User	\$75	\$125	\$250	\$1,000	\$1,000	\$1,000
Hub	n/a	\$125	\$250	\$1,000	\$1,000	\$1,000
Endlink	\$75	\$125	\$250	\$1,000	\$1,000	\$1,000

There is no Install NRC for a 5-year term commitment.

2. TYPE 1 MONTH TO MONTH CIRCUIT TERM (MONTHLY RECURRING CHARGES)

Month-to-Month circuit term is only available for DS1 Point to Point Service.

DS1 Service	Point to Point		
	0 Mile	1 Mile	Add Mile
Region 1 (IL, IN, MI, OH, WI)	\$ 180.00	\$ 247.00	\$ 12.00
Region 2 (DE, MD, NJ, PA, VA, WV)	\$ 255.85	\$ 306.85	\$ 11.00
Region 3 (AL, GA, FL, KY, LA, MS, NC, SC, TN)	\$ 175.00	\$ 236.25	\$ 9.00
Region 4 (CT, ME, MA, NH, NY, RI, VT)	\$ 210.00	\$ 274.63	\$ 14.63
Region 5 (CA, NV)	\$ 185.00	\$ 232.00	\$ 7.00
Region 6 (AR, KS, MO, OK, TX)	\$ 165.00	\$ 200.53	\$ 9.41
Region 7 (AZ, CO, IA, ID, MN, MT, ND, NE, NM, OR, SD, UT, WA, WY)	\$ 160.00	\$ 224.00	\$ 9.00

3. MULTIPLEXING (MONTHLY RECURRING & NON-RECURRING CHARGES)

The following Multiplexing charges apply to services when Services are not ordered in connection with a Sonet hub.

Multiplex Type	MRC	NRC
1/0 Mux		
Channelizes a DS1 into DS0s.	\$75	\$350
3/1 Mux		
Channelizes a DS3 into DS1s.	\$300	\$350
DS3 Optical Mux		
Channelizes an OC3 into DS3s.	\$225	\$350
OC3 Optical Mux		
Channelizes an OC12 into OC3s.	\$1,000	\$350
OC12 Optical Mux		
Channelizes an OC48 into OC12s.	\$2,000	\$350

Note: A DS-3 hub is necessary for DS-1 handoffs onto an OC-N hub. To accommodate for this, the customer would order a DS-3 hub on one of the DS-3 channels of the OC-N hub. The DS-3 hub would be priced as a 3:1 mux located in the Provider node since the DS-3 channel would already be paid for in the monthly recurring rate for the OC-N hub circuit.

4. TYPE I – 1 YEAR CIRCUIT TERM (MONTHLY RECURRING CHARGES)

## 7. GENERAL TERMS AND CONDITIONS

- Point-to-Point is defined as the standard type of service provided between two Customer locations within a LATA, and may be configured as either full bandwidth or channelized.
- Endlink is defined as a circuit originating at a Hub that has multiplexed a higher level circuit down a lower level circuit and terminating at a Customer premise.
- Hub or Hubbed Service is defined as providing a single transport facility from the Customer primary location to a multiplexing hub on Provider's local network where individual lower-level circuit connections are provided to multiple secondary locations within the LATA.

ATTACHMENT C-17A  
METRO PRIVATE LINE (MPL) – CORRIDOR ZONES  
(EFFECTIVE OCTOBER 1, 2002)

There are six (6) city pairs where Corridor Zones currently exist:

- 1) New York City (LATA 132) to New Jersey (LATA 222)
- 2) New York City (LATA 132) to New Jersey (LATA 224)
- 3) New Jersey (LATA 222) to New Jersey (LATA 224)
- 4) Camden, NJ (LATA 856) to Philadelphia, PA (LATA 215)
- 5) Ashburn VA (LATAs 301,703) to Washington DC (LATA 202). The Ashburn end of the circuit must be in a lit building.
- 6) Ashburn, VA (LATAs 301,703) to Philadelphia, PA (LATA 215). Both ends of the circuit must be lit buildings.

**See section 36.4.5 for special pricing condition related to Corridor Zones**
