

Chapter 5: Avoided Costs

I. Overview 5.1
II. Costs Included in Avoided Cost 5.3
III. Results..... 5.8

Chapter 6: Demand-Side Management

I. Overview 6.1
II. Energy Trust Resource Assessment Economic Modeling Tool 6.1
III. Methodology for Determining Cost-Effective DSM Potential 6.2
IV. Program Funding and Delivery: Oregon 6.17
V. Program Funding and Delivery: Washington..... 6.19
VI. Load Management and Demand Response..... 6.21
VII. Distribution System Planning and Demand-side Management 6.21
VIII. Geographically Targeted and Enhanced/Accelerated DSM Pilot 6.26

Chapter 7: Distribution System Planning

I. Overview 7.1
II. Background and Existing Distribution System 7.1
III. Distribution System Planning Methodology 7.3
IV. Significant Potential High Pressure Transmission and Distribution System
Planning Projects 7.9
V. Other Distribution System Projects: Clark County, Washington 7.13
VI. Key Findings 7.15

Chapter 8: Linear Programming and the Company's Resource Choices

I. System Planning Overview 8.1
II. Resource Planning Model Results 8.4
III. South Salem Feeder 8.12
IV. Planning Conclusions 8.16
V. Key Findings 8.17

Chapter 9: Stochastic Portfolio Risk Analysis

I. Background 9.1
II. Stochastic Simulation Overview 9.1
III. Stochastic Risk Analysis Results 9.6
IV. Key Findings 9.11

Chapter 10: Public Participation

I. Technical Working Group 10.1
II. Public Participation 10.1
