I forgot to copy UTC on my comment for the PSE IRP TAG meeting:
In these next 20 years (and really as soon as possible), PSE (and all utilities) needs to get to 100% Clean Energy. We have the cost-effective technologies to move us in that direction now. We should prioritize renewable energy technologies over both natural gas and coal. Much more can be done to get more renewables, especially solar, on the grid. This must be a priority in PSE's 20 year plan.

Thanks!

Subject: Comment for IRP TAG meeting

Hi Michele,

I could not be at today's IRP TAG meeting, but wanted to pass along a comment:

In these next 20 years (and really as soon as possible), PSE (and all utilities) needs to get to 100% Clean Energy. We have the cost-effective technologies to move us in that direction now. We should prioritize renewable energy technologies over both natural gas and coal. Much more can be done to get more renewables, especially solar, on the grid. This must be a priority in PSE's 20 year plan.

If you are not the person fielding questions and comment, please forward this to the correct person.

Thank you!

Hoa Pantastico
