RCW 19.285 Compliance Surplus / (Deficit)		0	1	(0)	0	(0)	(0)	1	0	(0)	0

Note 1: Any surplus or deficit in row 43 (RCW 19.285 Compliance Surplus / (Deficit)) is a result of rounding in the Facility Detail tab. The correct target amount of RECs have been/will be retired for all compliance years

PACIFICORP Notes and Assumptions

Retail Sales:

2010 - 2019 actual retail sales. 2020 load forecast based on 2019 IRP progress report.

Reporting Entity:

Reporting Date:

2011 - 2019 is based on actual generation or REC purchase data. Generation forecast begins February 2020.

The Company uses one of three patterning methods to model wind resources. First, and if the appropriate data is available, historical monthly/seasonal patterns are developed using hourly data available over the life of the plant. This is the Company's preferred method. Second, if historical information is unavailable, but hourly data from wind site studies is, on/off peak engineering estimate patterns are developed. Third, if neither of the first two types of data is available, Energy Information Agency (EIA) wind patterning is used.

The forecasts for wind resources include generation attributed to the Company's planned repowering efforts.

Allocation Factors:

2011 - 2019 actual System Generation (SG) and Control Area Generation West (CAGW) allocation factors. Forecast factors (2020 onward).

PacifiCorp

June 1, 2020

The company does not plan to sell any excess RECs and will hold any excess RECs and apply to a future year target
