The funds received by the Company from the universal communications services program in calendar year 2021 contributed to defrayal of the ongoing operation and maintenance expenses of the Company. These funds are also contributing to the Company's ongoing provision of high-quality basic telecommunications services and the expansion of faster broadband service available to customers residing in the area the Company serves.

In December 2021, the Company received \$73,080 from the universal communications services program for the fiscal year ending June 30, 2022.

There is also \$68,000 dedicated to copper bonding. In addition, the Company has opened \$65,000 of projects to deal with routine capex including drops, cards and mandatory facility moves. The funds received from the universal communications services program can be viewed as contributing to the Company's ability to perform these projects plus cover normal operating expenses. In

the second half of 2022 the Company plans to continue the deployment of the projects mentioned earlier in this paragraph. Details for 2021 expenditures are included in Report 1 of the annual ETC filing submitted on or around July 1.
