To Whom it may concern,
I am a senior citizen that lives on a single income each month. The increase you are proposing for 2023 of almost 17% is appalling. I understand that there is a need for improvements. But the increase of my electric bill of that amount is hurtful. Why are you increasing it that much in one year. Why are you not spreading it out over years.

I live on Social Security my husband has passed away. I do not own a computer or have data on my phone. I try to keep my bills at a ~~minimum~~ ^{minimum}. As always it seems that senior citizens get hit the hardest. Couldn't you atleast spread out the pain a bit better.

A concerned senior citizen
