I.IDENTIFICATION OF WITNESS

1

2	Q.	PLEASE STATE YOUR NAME, BUSINESS ADDRESS AND POSITION
3		WITH QWEST CORPORATION.
4	A.	My name is Perry W. Hooks, Jr. I am employed by Qwest Corporation ("Qwest"),
5		(f/k/a U S WEST Communications, Inc.), as Director, Legal and Regulatory Affairs
6		Interconnection Operations. My business address is 1801 California Street, Suite
7		2410, Denver, CO, 80202. My principal business responsibility is to testify in
8		regulatory and legal proceedings concerning Qwest's wholesale local services and
9		products.
10	Q.	PLEASE BRIEFLY REVIEW YOUR TELECOMMUNICATIONS
11		INDUSTRY WORK EXPERIENCE.
12	A.	I began working for U S WEST in 1984 in various legal and management positions.
13		I worked as an attorney in the U S WEST Law Department, for the first ten years of
14		my career, including seven years as the Chief Counsel to the Technical Operations
15		and Network organizations of the company. Since moving into management for
16		U S WEST, in 1995, I have served in various positions within the Strategy
17		Development, Markets-Regulatory Strategy, Network, Carrier and the Wholesale
18		Markets organizations. While in the Strategy Development organization, my
19		responsibilities included oversight and conduct of competitive analysis. While in

Docket No. UT-003013
Part B
Direct Testimony of Perry W. Hooks
August 4, 2000
Page 2
PWH-T1

1 the Marketing – Regulatory Strategy organization, my responsibilities included 2 supervision of company and external expert witnesses who testified concerning 3 U S WEST retail products and services, competition, and product costs. While in 4 the Network organization, I served as Director of Program Management for 5 Interconnection Operations and was responsible for the coordination of wholesale 6 local services program and project management for installation and repair processes 7 of resold finished services, interconnection services, and unbundled network 8 elements. 9 Q. PLEASE GENERALLY DESCRIBE YOUR RESPONSIBILITIES IN YOUR 10 **CURRENT POSITION.** 11 A. In this position within both the Carrier and the Wholesale Markets organizations of 12 Qwest, I have developed Qwest's advocacy for service performance-related matters, 13 wholesale processes and wholesale products. In this position, I have testified on 14 behalf of Qwest concerning wholesale products and services before federal and state 15 regulatory bodies in arbitration cases, rulemakings and complaint proceedings, and 16 in courts concerning Qwest's conformance with state and federal 17 telecommunications laws and regulations. I have been in my current position since 18 January 1997.

Docket No. UT-003013 Part B Direct Testimony of Perry W. Hooks August 4, 2000 Page 3 PWH-T1

1	Q.	PLEASE BRIEFLY REVIEW YOUR FORMAL HIGHER EDUCATION
2		BACKROUND.
3	A.	I hold a Juris Doctorate degree from the University of Michigan Law School in Ann
4		Arbor, Michigan, and two bachelors degrees (Three Majors: Economics;
5		Management; and Political Science) from Washburn University in Topeka, Kansas.
6		II.PURPOSE OF DIRECT TESTIMONY
7	Q.	WHAT IS THE PURPOSE OF YOUR DIRECT TESTIMONY?
8	A.	This Direct Testimony describes Qwest's UNEs and related products and services.
9		Qwest seeks to establish recurring and nonrecurring charges for these UNEs and
10		related products and services. UNE costs and the costs of the related products and
11		services are described in the testimony of Qwest witness Teresa K. Million filed in
12		this docket.
13		The products and services that I will address in this testimony include:
14		A. High Capacity Loops (DS1 and DS3)
15		B. Unbundled Sub-Loop (DS0 Distribution/Feeder, DS1 Capable Feeder)
16		Field Connection Point (FCP)

Unbundled Dedicated Interoffice Transport (UDIT) and Extended Unbundled Dedicated Interoffice

17

1		Transport (EUDIT)
2		Poles, Ducts, and Right of Way
3		Unbundled Dark Fiber (UDF)
4		DSO Low Side Channelization
5		Enhanced Extended Link (EEL)
6		J. UNE Platform Combinations
7	II	I.LEGAL AND REGULATORY DECISIONS CONCERNING UNES AND UNE
8		COMBINATIONS.
9	Q.	PLEASE REVIEW THE RELEVANT FCC DECISIONS CONCERNING UNES
10		AND UNE COMBINATIONS.
11	A.	The Telecommunications Act of 1996 ("Act") gave the Federal Communications
12		Commission ("FCC") the authority to promulgate rules which, among other things,
13		defined UNEs. In August 1996, the FCC released its first set of rules that defined
14		UNEs. On November 5, 1999, following appeals of those rules to both the United
15		States Court of Appeals for the Eighth Circuit and the United States Supreme Court,
16		the FCC released another set of rules as part of what is referred to as the FCC's "UNE
17		Remand Order." On June 2, 2000, the FCC released a <u>Supplemental Order</u>
18		Clarification in which it acted to extend a temporary constraint which ILECs may
19		place on the use of UNEs and to clarify certain ILEC requirements which the FCC
20		had adopted in its earlier Supplemental Order

	() .	**************************************	とてしし ろしれけたい	AND RECTUI	ALIUNSAFF	CALCD IVI I OC

- 2 COURTS?
- 3 A. Yes, they were. Those orders and regulations were the subject of many appeals to the
- 4 federal courts. Those appeals were consolidated into one appeal heard by the U.S.
- 5 Court of Appeals for the Eighth Circuit ("Eighth Circuit").

6 Q. WERE APPEALS MADE SPECIFICALLY CONCERNING THE SUBJECT OF

- 7 "UNBUNDLED NETWORK ELEMENTS"?
- **8** A. Yes. Several of those appeals centered on the FCC's definitions of UNEs, the terms
- 9 and conditions to be applied when ILECs were to provide access to UNEs, and the
- pricing of the UNEs.

11 Q. ARE THE SUBJECTS OF THOSE APPEALS STILL RELEVANT TO THIS

- 12 COST PROCEEDING?
- 13 A. Yes. The definitions of UNEs, the terms and conditions to be applied when Qwest
- provides access to its network elements, and the pricing of the UNEs are relevant to
- this cost proceeding.

16 Q. DID THE EIGHTH CIRCUIT RULE ON MATTERS RELEVANT TO THIS

- 17 COST PROCEEDING?
- 18 A. Yes, it did. Several subjects contained in the Eighth Circuit's opinion are relevant to

Docket No. UT-003013
Part B
Direct Testimony of Perry W. Hooks
August 4, 2000
Page 6
PWH-T1

2 The FCC's list of Unbundled Network Elements (47 C.F.R. § 51.319); 3 UNE Pricing (47 C.F.R. § 51.313, § 51.503 and § 51.505). WAS THE EIGHTH CIRCUIT'S OPINION APPEALED TO THE UNITED 4 Q. STATES SUPREME COURT? 5 Yes, it was. The Eighth Circuit's opinion, captioned Iowa Utilities Board v. FCC, 6 A. 7 120 F. 3d 753 (1997), was appealed to the U.S. Supreme Court. Last year, in AT&T 8 Corp. v. Iowa Utilities Bd., 119 S.Ct. 721 (1999), the Supreme Court reversed in part, 9 affirmed in part and remanded the case to the Eighth Circuit Court for further review.

this cost proceeding. Those subjects are:

12 Q. DID THE SUPREME COURT RULE ON THE TWO SUBJECTS THAT YOU

Recently, on July 18, 2000, the Eighth Circuit issued an opinion on remand which is

- 13 EARLIER LISTED FROM THE EIGHTH CIRCUIT'S OPINION?
- 14 A. Yes, it did.

discussed below.1

1

10

11

15 Q. WHAT DID THE TWO COURTS RULE WITH RESPECT TO THE FCC'S

¹ <u>Iowa Utils. Bd. v. FCC at al.</u>, Case No. 96-3321. On petition for review of an Order of the FCC. (8th Cir., July 18, 2000).

Docket No. UT-003013
Part B
Direct Testimony of Perry W. Hooks
August 4, 2000
Page 7
PWH-T1

1 LIST OF UNBUNDLED NETWORK ELEMENTS?

2 A. The Eighth Circuit received a number of ILEC challenges to the effect that the FCC's 3 list of UNEs was too inclusive. In the ILECs' view, the FCC did not follow the Act's definition of "network element" nor did the FCC properly apply the Act's "necessary 4 and impair" standard.³ The Eighth Circuit held that the FCC's interpretations of the 5 6 Act's "network elements" definition and the Act's "necessary and impair" provisions were reasonable and hence lawful.⁴ The Supreme Court, however, reversed the 7 8 Eighth Circuit Court's opinion concerning the FCC's application of the Act's 9 "necessary" and "impair" standard and invalidated the FCC's list of unbundled 10 network elements.⁵

11 Q. WHY IS THAT RELEVANT IN THIS PROCEEDING?

A. It is relevant because following the Supreme Court's decision to vacate 47 C.F.R. §

319, the FCC was forced to issue a new list of unbundled network elements. That

new list was published in the FCC's "UNE Remand Order." ⁶ Cost and pricing for the

UNEs on that new list is the topic of this proceeding.

^{1 2 47} U.S.C. § 153(r)(45)

Page 9
PWH-T1

- 1 Several of these unbundled network elements will be discussed later in this testimony.
- 2 O. WHEN DID THE NEW LIST OF UNES GO INTO EFFECT?
- 3 A. Several rules identifying part of the new list of UNEs went into effect on February 17,
- 4 2000. The remainder of the UNEs went into effect on May 17, 2000.
- 5 Q. PLEASE BRIEFLY REVIEW THE RELEVANT HISTORY OF FCC AND
- 6 COURT DECISIONS REGARDING UNE COMBINATIONS.
- 7 A. In its <u>Iowa Utilities Board</u> decision, the United States Court of Appeals for the Eighth
- 8 Circuit vacated, among other rules at 47 C.F.R. § 51.315, the rules articulated at § 51.315
- 9 (c) and (d).¹⁵ Indeed, in the FCC's Third Report and Order and Fourth Notice of
- Proposed Rulemaking, released November 5, 1999, ¹⁶ the FCC itself did not reinstate
- rules 315(c)-(f). In its July 18, 2000 ruling, the Eighth Circuit affirmed its decision to
- vacate rules 315(c)-(f).¹⁷

13 Q. WHAT ARE THE RULES AT SECTION 315 (c) AND (d) THAT WERE

14 VACATED BY THE EIGHTH CIRCUIT COURT?

_{1 15} Iowa Utils. Bd. v. FCC, 120 F.3d 753, 813 & n. 39 (8th Cir. 1997), aff'd in part, rev'd in

² part sub nom, AT&T Corp. v. Iowa Utils. Bd., 525 U.S. 366 (1999) ("Iowa Utilities

воагд").

^{1 16} In the Matter of Implementation of the Local Competition Provisions of the

² Telecommunications Act of 1996, CC Docket No 96-98, Third Report and Order and

³ Fourth Further Notice of Proposed Rulemaking (Rel. Nov. 5, 1999).

^{1 17 &}lt;u>Iowa Utils. Bd. v. FCC et al.</u>, Case No. 96-3321 (8th Cir., 2000.)

Docket No. UT-003013
Part B
Direct Testimony of Perry W. Hooks
August 4, 2000
Page 10
PWH-T1

1 A. The rule at 47 C.F.R. Section 51.315 (c) that was vacated stated, in relevant part: 2 Upon request, an incumbent LEC shall perform the functions 3 necessary to combine unbundled network elements in any 4 manner, even if those elements are not ordinarily combined in 5 the incumbent LEC's network 6 7 The vacated rule in 47 C.F.R. Section 51.315 (d) stated, in relevant part: 8 Upon request, an incumbent LEC shall perform the functions 9 necessary to combine unbundled network elements with elements possessed by the requesting telecommunications 10 carrier in any technical feasible 11 12 manner 13 HAS THE NINTH CIRCUIT COURT OF APPEALS ADDRESSED THESE 14 **RULES?** 15 16 Yes. The Ninth Circuit addressed the issue of the requirement to combine unbundled A. elements on appeal in U S WEST v. MFS¹⁸. The Court affirmed the district court's 17 18 decision to sustain a contract provision requiring U S WEST to combine unbundled 19 network elements at the request of MFS. In reaching this decision the Court further 20 determined that, because FCC regulation prohibits incumbent carriers from separating 21 already-combined network elements, it "necessarily follows . . .that requiring U S 22 WEST to combine unbundled network elements is not inconsistent with the Act." 19

 $[\]underline{_1}$ 18 <u>U.S. West Communications v. MFS Intelenet</u>, Inc., 193 F.3d 1112 (9th Cir. 1999).

Page 11
PWH-T1

1 Q. WHAT IS QWEST'S POSITION IN LIGHT OF THESE CONFLICTING

2 HOLDINGS?

3 A. Owest strongly believes that the 9th Circuit ruling is incorrect, and that
--

- 4 not require Qwest to combine elements for CLECs. The 9th Circuit decision was
- 5 premised on an incorrect interpretation of the Supreme Court decision and the 8th
- 6 Circuit's prior ruling on the "additional combinations" rule. The 8th Circuit, in its
- 7 July 18, 2000 decision, stated:

Direct Testimony of Perry W. Hooks
August 4, 2000
Page 32
PWH-T1

1	IV.DI	ESCRIPTION OF UNBUNDLED NETWORK ELEMENT (UNE) PRODUCTS
2		AND OTHER SERVICES
3		A.High Capacity Loops (DS1 and DS3)
3		Miligh Capacity Loops (DST and DSS)
4	<u>Q.</u> P	LEASE DESCRIBE QWEST'S DS1 AND DS3 UNBUNDLED LOOPS.
5	<u>A.</u> Q	Owest's Unbundled DS1 and DS3 Loops are transmission paths capable of carrying
6	<u>S</u>]	pecifically formatted and line coded digital signals. These digital signals may be
7	<u>19</u>	SDN, DS1, DS3, ADSL or xDSL-I types. DS1 and DS3 unbundled loops may be
8	<u>p</u>	rovided using a variety of transmission technologies including but not limited to
9	<u>m</u>	netallic wire, metallic wire based digital loop carrier and fiber optic fed digital carrier
10	<u>sy</u>	ystems.
11	<u>Q. P</u>	LEASE DESCRIBE THE RECURRING CHARGES APPLICABLE TO
12	<u>C</u>	WEST'S DS1 AND DS3 UNBUNDLED LOOP OFFERINGS?
13	<u>A.</u> A	a recurring charge applies for the first DS1 and DS3 unbundled loop ordered by the
14	<u>C</u>	CLEC. A separate recurring charge applies for each additional DS1 or DS3
15	<u>u</u>	nbundled loop ordered by the CLEC. The proposed recurring charges for DS1 and
16	<u>D</u>	OS3 Unbundled Loops are included in Exhibit PWH-2 of this testimony.

Q. PLEASE DESCRIBE QWEST'S NONRECURRING CHARGES.

17

Docket No. UT-003013
Part B
Direct Testimony of Perry W. Hooks
August 4, 2000
Page 33
PWH-T1

1	<u>A.</u>	The following types of Installation Charges apply to Qwest's DS1 and DS3 loops.
2		The charges are based upon the nature of the installation that the CLEC requests, i.e.
3		Basic Installation (existing service); Basic Installation with Performance Testing (new
4		service); Coordinated Installation With Cooperative Testing; and Coordinated
5		Installation Without Testing (existing service).
6	<u>Q.</u>	PLEASE DESCRIBE BASIC INSTALLATION.
7	<u>A.</u>	Basic Installation may be ordered for existing DS1 and DS3 service only. With the
8		Basic Installation, Qwest disconnects the loop from its current termination and
9		delivers it via the Interconnection Tie Pairs (ITP) to the point of demarcation. Qwest
10		will notify the CLEC when the work activity is complete. A Basic Installation charge
11		applies for the first loop and each additional loop that the CLEC wishes to order.
12		Nonrecurring charges are included in Exhibit PWH-2 of this testimony.
13	<u>PLI</u>	EASE DESCRIBE BASIC INSTALLATION WITH PERFORMANCE TESTING.
14	<u>A.</u>	Basic Installation with Performance Testing is the minimum level of installation
15		required for new DS1 and DS3 service. QWEST will complete the circuit wiring and
16		perform the required performance tests as described in Qwest's Technical Publication
17		77384 to ensure that the new circuit meets the required parameter limits. The test
18		results will be forwarded to the CLEC by Qwest. Basic Installation with Performance
19		Testing charges apply to the first and each additional loop so installed. The

	nonrecurring charges are included in Exhibit PWH-2 of this testimony.
Q.	PLEASE DESCRIBE COORDINATED INSTALLATION WITH
	COOPERATIVE TESTING.
<u>A.</u>	Coordinated Installation with Cooperative Testing may be ordered for new or existing
	DS1 and DS3 service. Coordinated Installation includes cooperative testing and
	applies when an existing Qwest end user or a CLEC end user changes to another
	CLEC. At the appointed time, Qwest will disconnect the loop from its current
	termination and deliver it to the point of demarcation in coordination with the CLEC.
	Qwest will complete the required performance tests and any other testing requested
	by the CLEC. If the CLEC requests testing that exceeds the testing requirements
	contained in Qwest's Technical Publication 77384, additional nonrecurring charges to
	cover such testing will be billed to the CLEC. Coordinated Installation with
	Cooperative Testing charges apply to the first loop and each additional loop so
	installed. The nonrecurring charges are contained in Exhibit PWH-2 of this testimony.
Q.	PLEASE DESCRIBE COORDINATED INSTALLATION WITHOUT
	TESTING.
<u>A.</u>	Coordinated Installation Without Testing may be ordered for 2-wire analog loop start
	Q.

or ground start Unbundled Loops. When an existing Qwest end user or a CLEC end

19

Docket No. UT-003013
Part B
Direct Testimony of Perry W. Hooks
August 4, 2000
Page 35
PWH-T1

1 user changes to another CLEC, Qwest will disconnect the loop and deliver it to the 2 requesting CLEC via an ITP to the demarcation point. This option offers the CLEC 3 the ability to coordinate the conversion activity, thus allowing the CLEC's end user 4 the ability to limit any service interruption. At the appointed time, Owest will 5 disconnect the loop from its current termination and delivers it via an ITP to the point 6 of demarcation. Coordinated Installation Without Cooperative Testing charges apply 7 to the first and each additional loop so installed. Nonrecurring charges are included 8 in Exhibit PWH-2 of this testimony. 9 B.Unbundled Sub-Loop (DS0 Distribution Feeder, DS1 Capable Feeder) Q. WHAT IS A SUB-LOOP? **10** 11 A. A Sub-Loop is any portion of a loop at which it is technically feasible to access Owest's terminals in outside plant, i.e. an accessible terminal, pole, pedestal, Feeder **12** 13 Distribution Interface (FDI) or Minimum Point Of Entry (MPOE) including inside 14 wire. An accessible terminal is any point on the loop where technicians can access 15 the wire or fiber within the cable without removing a splice case and/or digging up or **16** trenching underground to reach the wire within. **17** O. PLEASE DESCRIBE OWEST'S DS0 DISTRIBUTION AND FEEDER SUB-

18

LOOP OFFERINGS?

Docket No. UT-003013
Part B
Direct Testimony of Perry W. Hooks
August 4, 2000
Page 36
PWH-T1

1	<u>A.</u>	Qwest's proposed rates for DS0 feeder and distribution sub-loops are based on the
2		relationships of unbundled loop distribution and feeder investment to total
3		investment. Because Qwest has deaveraged the sub-loops in the same manner as
4		unbundled loops, these percentage relationships are established for each deaveraging
5		zone to arrive at deaveraged DS0 distribution and feeder sub-loop recurring rates.
6		Both recurring and nonrecurring averages are included in Exhibit PWH-2 of this
7		testimony.
8	<u>Q.</u>	PLEASE DESCRIBE QWEST'S DS1 CAPABLE FEEDER SUB-LOOP
9		OFFERING.
10	<u>A.</u>	The DS1 Capable Feeder Loop is a digital transmission path that is provisioned from
11		a Qwest central office network interface to a Field Connection Point (FCP). The DS1
12		Capable Feeder Loop transports bi-directional DS1 signals with a transmission rate of
13		1.544 Mbps.
14	<u>Q.</u>	DOES QWEST SEEK TO APPLY RECURRING AND NONRECURRING
15		CHARGES TO THE DS1 CAPABLE FEEDER LOOP?
16	<u>A.</u>	Yes. A recurring and nonrecurring charge applies for the first and each additional
17		DS1 capable feeder loop ordered by the CLEC. Recurring rates and nonrecurring
18		charges are included in Exhibit PWH-2 of this testimony.

Docket No. UT-003013
Part B
Direct Testimony of Perry W. Hooks
August 4, 2000
Page 37
PWH-T1

1	C.Field Connection Point (FCP)
2	Q. PLEASE DESCRIBE QWEST'S FIELD CONNECTION POINT (FCP)
3	OFFERING.
4	A. Qwest's FCP offering allows a CLEC to interconnect with Qwest outside of the
5	central office location where technically feasible. FCP allows a CLEC to access
6	Unbundled Sub-Loops. The FCP must be in place before Sub-Loop orders are
7	processed. The only use of the FCP is to provide access to U S WEST Sub-Loops.
8	Q. WHICH NONRECURRING CHARGE ASSOCIATED WITH THE FCP DOES
9	QWEST WISH TO INTRODUCE?
10	A. Qwest wishes to introduce the Field Connection Point Quotation Preparation Fee
11	which applies to the FCP. Qwest will develop a quote for the work to be performed
12	based on the information provided by the CLEC. The Field Connection Point
13	Quotation Preparation Fee is included in Exhibit PWH-2 of this testimony.
14	D.Unbundled Dedicated Interoffice Transport (UDIT) and Extended Unbundled
15	Dedicated Interoffice Transport (EUDIT)
16	Q. PLEASE DESCRIBE QWEST'S UDIT PRODUCT.
17	A. Qwest's Unbundled Dedicated Interoffice Transport (UDIT) product provides the

Docket No. UT-003013
Part B
Direct Testimony of Perry W. Hooks
August 4, 2000
Page 38
PWH-T1

1		CLEC with a single transmission path between two Qwest wire centers in the same
2		LATA and state. A UDIT can also provide the CLEC with a path between one CLEC
3		collocated in one Qwest wire center and another CLEC collocated in a different
4		Qwest wire center. UDITS are available in a variety of bandwidths where facilities
5		are available. The CLEC can assign channels within the UDIT facilities and transport
6		voice or data over those facilities.
7	<u>Q.</u>	WHICH UDITS ARE INCLUDED IN THIS COST PROCEEDING?
8	<u>A.</u>	UDITS which are included in this cost proceeding are those available in OC-3
9		(Optical Carrier, level 3) and OC-12 bandwidths.
10	Q.	WHAT RECURRING CHARGES DOES QWEST PROPOSE FOR THE OC-3
11		AND OC-12 UDIT?
12	<u>A.</u>	Qwest proposes recurring charges that are based on both the distance-sensitive and
13		flat-rated bandwidth-specific interoffice transmission path designed to a frame or
14		equivalent in each connecting Qwest Wire Center. There is both a recurring fixed rate
15		and a mileage sensitive element based on the V&H coordinates of the UDIT. The
16		mileage is calculated between the originating and terminating central offices.
17		Following are descriptions of the rate elements included in Exhibit PWH-2 of this
18		testimony.

Docket No. UT-003013
Part B
Direct Testimony of Perry W. Hooks
August 4, 2000
Page 39
PWH-T1

1	Q.	PLEASE DESCRIBE THE E-UDIT.
2	<u>A.</u>	Extended Unbundled Dedicated Interoffice Transport (EUDIT) provides the CLEC
3		with a bandwidth specific transmission path between the Qwest serving wire center
4		and the CLEC's wire center or an IXC's point of presence located within the same
5		Qwest serving wire center area. EUDIT is made available in a variety of bandwidths
6		where facilities are available. The CLEC can assign channels and transport its choice
7		of voice or data.
8	Q.	WHAT RECURRING CHARGES DOES QWEST PROPOSE FOR THE E-
9		<u>UDIT?</u>
10	<u>EUD</u>	DIT is a flat-rated, bandwidth-specific interoffice transmission path. Therefore, there
11		are no proposed distance sensitive charges as there are with UDITs. The proposed
12		OC-3 E-UDIT and OC-12 E-UDIT rates are included in Exhibit PWH-2 of this
13		testimony.
14		Poles, Ducts and Right of Way
15	7	WHICH ELEMENTS WITHIN THE CATEGORY OF POLES, DUCTS AND
16		RIGHT OF WAY DOES QWEST SEEK TO INTRODUCE CHARGES FOR
17		IN THIS COST DOCKET?
18	(Qwest seeks to introduce the following nonrecurring charge elements. Pole Inquiry

Docket No. UT-003013
Part B
Direct Testimony of Perry W. Hooks
August 4, 2000
Page 40
PWH-T1

1	<u>ree- Per Mile, innerduct inquiry ree – Per Mile, rield Verification ree –Poles Per</u>
2	Pole, and Field Verification Fee – Manhole Per Manhole.
3	PLEASE DESCRIBE THE ACTIVITIES ASSOCIATED WITH THE POLE AND
4	INNERDUCT INQUIRY FEES.
5	The Inquiry Fee is a non-refundable pre-paid charge used to recover the costs associated
6	with performing an internal record review to determine if a requested route and/or
7	facility is available for lease. Separate Inquiry Fees apply for poles and for
8	innerduct. These Fees are included in Exhibit PWH-2 of this testimony.
9	Q. PLEASE DESCRIBE THE ACTIVITIES ASSOCIATED WITH THE FIELD
10	<u>VERIFICATION FEES.</u>
11	A. Field Verification Fee is a non-refundable pre-paid charge which recovers the
12	estimated actual costs for a field survey verification required for a route and to
13	determine scope of any required Make-Ready work. The estimated pre-paid fees
14	are billed in advance. Separate Field Verification Fees apply for poles and for
15	manholes. These Fees are included in Exhibit PWH-2 of this testimony.
16	F.Unbundled Dark Fiber (UDF)
17	Q. WHAT IS UNBUNDLED DARK FIBER (UDF).

Docket No. UT-003013
Part B
Direct Testimony of Perry W. Hooks
August 4, 2000
Page 41
PWH-T1

1	<u>A.</u>	Unbundled Dark Fiber (UDF) is a deployed, unlit pair of fiber optic cable or strands
2		that connects two points within Qwest's network.
3		UDF exists in two distinct forms:
4		UDF Interoffice Facility (UDF-IOF), which constitutes an existing route between two
5		Qwest wire centers; and
6		(II) UDF-Loop, which constitutes an existing loop between a Qwest wire center and
7		either a fiber distribution panel located at an appropriate outside plant structure
8		or an end-user customer premises.
9 10	Q. A.	WHAT RECURRING CHARGES APPLY TO UDF? The following describes the recurring charges that apply to UDF:
9		WHAT RECURRING CHARGES APPLY TO UDF?
9 10		WHAT RECURRING CHARGES APPLY TO UDF? The following describes the recurring charges that apply to UDF:
9 10 11		WHAT RECURRING CHARGES APPLY TO UDF? The following describes the recurring charges that apply to UDF: Unbundled Dark Fiber - IOF Recurring Rate Elements
9 10 11 12		WHAT RECURRING CHARGES APPLY TO UDF? The following describes the recurring charges that apply to UDF: Unbundled Dark Fiber - IOF Recurring Rate Elements a) UDF-IOF Fiber Interoffice, (Per Route Mile) Rate Element. This recurring rate
9 10 11 12 13		WHAT RECURRING CHARGES APPLY TO UDF? The following describes the recurring charges that apply to UDF: Unbundled Dark Fiber - IOF Recurring Rate Elements a) UDF-IOF Fiber Interoffice, (Per Route Mile) Rate Element. This recurring rate element applies to the transmission path between the two Qwest wire centers.

Docket No. UT-003013
Part B
Direct Testimony of Perry W. Hooks
August 4, 2000
Page 42
PWH-T1

UDF-IOF Fiber Pair Termination Rate Element. This rate element has both a recurring and non-recurring component and provides a termination at the interoffice Fiber Distribution Panel within the Qwest Wire Center. Because the UDF-IOF terminates in at least two Qwest central offices, at least two UDF-IOF terminations would be applied. The applicable recurring rates are included in Exhibit PWH-2 of this testimony.

c) UDF-IOF Two Fiber Cross-Connection Rate Element. This rate element has both a recurring and nonrecurring component and is used to extend the optical connection from the Interoffice Fiber Distribution Panel to the CLEC's optical demarcation point located at the Interconnection Distribution Frame being used by the CLEC. Because there are two ends of the fiber requiring two cross-connections, at least two UDF-IOF fiber cross-connection charges would be applied. The applicable recurring rates are included in Exhibit PWH-2 of this testimony.

Unbundled Dark Fiber – Loop Recurring Rate Elements.

a) UDF-Loop Fiber Transport (Per Route) Rate Element: This rate element applies to the transmission path between the Qwest wire center and the end-user premise or structure. The applicable recurring rate is included in Exhibit PWH-2 of this testimony.

Docket No. UT-003013
Part B
Direct Testimony of Perry W. Hooks
August 4, 2000
Page 43
PWH-T1

- b) UDF-Loop Termination (wire center) Rate Element: this rate element applies to
 the termination of the UDF-Loop at the Qwest wire center. The applicable
 recurring rate is included in Exhibit PWH-2 of this testimony.
- UDF-Loop Termination (Premise) Rate Element: This rate element applies to the
 termination of the UDF-Loop at the end-user premise or structure. The
 applicable recurring rate is included in Exhibit PWH-2 of this testimony.
 - d) UDF-Loop Cross-Connection Rate Element: This rate element applies to the cross-connections of the dark fiber that is required at both the Qwest wire center and the customers premise. The applicable recurring rate is included in Exhibit PWH-2 of this testimony.

G. DSO Low Side Channelization

12 Q. WHAT IS DSO LOW SIDE CHANNELIZATION?

7

8

9

10

11

13 A. Low Side Channelization is the element for equipment "plug-ins" placed in the DSO
 14 side of a DS1/DSO multiplexer. Low Side Channelization provides transmission
 15 facilities between the customer designated premises and the serving wire center, the
 16 wire center where the CLEC is collocated, or multiplexing equipment. Exhibit PWH-2
 17 of this testimony includes the recurring rates for Low Side Channelization and the non-

Docket No. UT-003013

August 4, 2000
Page 44
PWH-T1

2 H. Enhanced Extended Link (EEL) 3 GENERALLY DESCRIBE ENHANCED EXTENDED LINKS (EELS) 4 Enhanced Extended Links (EELs) provide the CLEC with the ability to serve an end user 5 by "extending" the end user's loop from the end office which serves that end user to a 6 different end office in which the CLEC is located. EELs allow the CLEC to aggregate 7 loops at fewer of its locations, and thereby increase its efficiency by allowing the 8 CLEC to transport the aggregated loops over high capacity facilities to the CLEC's 9 central switching location.

recovering rate for high side and low side multiplexing.

the specific activities related to establishing an EEl link. Nonrecurring charges for EELS that utilize DSO, DS1 and DS3 bandwidths and DS1 and DS3 EELs Transport Multiplexing are addressed.

WHICH ASPECT OF EELS DOES QWEST SEEK TO INTRODUCE IN THIS COST

Qwest seeks to introduce nonrecurring charges that will recover the costs associated with

16 Q. WHY ISN'T QWEST FILING RECURRING RATES FOR EELS IN THIS

17 DOCKET?

PROCEEDING?

1

10

11

12

Docket No. UT-003013
Part B
Direct Testimony of Perry W. Hooks
August 4, 2000
Page 45
PWH-T1

1 A. As described in Ms. Million's testimony, the recurring rates for EELs come from the 2 combination of the recurring rates for UNEs that comprise the service. The EEL is a 3 combination of loops, multiplexing equipment and dedicated interoffice transport for 4 which Qwest has either previously filed costs and rates or is doing so in this 5 proceeding. Because CLECs have a variety of bandwidth options from which to 6 choose to construct EELs, the ultimate recurring rates will depend on the particular 7 combination of elements selected for each specific EEL configuration. 8 PLEASE DESCRIBE DSO, DS1 AND DS3 EELS. 9 A. EEL consists of a combination of loop and interoffice facilities and may also include 10 multiplexing or concentration capabilities. EEL transport and loop facilities may 11 utilize DS0, DS1 or DS3 equivalent bandwidths. 12 PLEASE GENERALLY DESCRIBE DS1 AND DS3 EELS TRANSPORT 13 MULTIPLEXING. 14 The Multiplexed DS1 EEL is a Qwest facility that provides a transmission path from a 15 CLEC's demarcation point in a Qwest wire center to the DS1 Multiplexer in the 16 Qwest serving wire center within the same LATA. The Multiplexed DS1 EEL 17 includes the interoffice facility and multiplexing equipment. It transports bi-18 directional DS1 signals with a nominal transmission rate of 1.544Mbps and will meet

the design requirements specified in Technical Publication 77403.

19

1	The	Multiplexed DS3 EEL is a Qwest facility that provides a transmission path from a
2		CLEC's demarcation point in a Qwest wire center to the DS3 Multiplexer or
3		equivalent in the Qwest serving wire center within the same LATA. The Multiplexed
4		DS3 EEL includes the interoffice facilities and multiplexing equipment. It transports
5		bi-directional DS3 signals with a nominal transmission rate of 44.736 Mbit/s and will
6		meet the design requirements specified in Technical Publication 77403.
7	WHAT DSO, DS1 AND DS3 EEL CHARGES DOES QWEST SEEK APPROVAL	
8		FOR IN THIS COST PROCEEDING?
9	A.	Qwest seeks approval for nonrecurring charges applicable to the first and each
10		additional DSO, DS1 and DS3 EEL. The nonrecurring charges are included in
11		Exhibit PWH-2 of this testimony.
12	Q.	WHAT OTHER EELS CHARGES DOES QWEST SEEK APPROVAL FOR IN
13		THIS COST PROCEEDING?
14 15	A.	Qwest seeks approval for DS1 and DS3 EEL Transport Multiplexing. The applicable
16		nonrecurring charges are included in Exhibit PWH-2 of this testimony.

Docket No. UT-003013
Part B
Direct Testimony of Perry W. Hooks
August 4, 2000
Page 47
PWH-T1

1		I.UNE Platform Combinations
2	Q.	WHICH UNE PLATFORM COMBINATIONS DOES QWEST OFFER?
3	A.	Qwest offers five standard UNE Combinations that consist of pre-existing UNEs
4		which are combined to serve existing customers. Qwest will also offer combinations
5		of UNEs not previously combined to serve new customers.
6	Q.	PLEASE IDENTIFY THE FIVE STANDARD UNE COMBINATIONS THAT
7		QWEST OFFERS.
8	A.	The five standard UNE Combinations include: (i) 1FR/1FB Plain Old Telephone
9		Service (POTS), (ii) Local Exchange Private Line (subject to the limitations set forth
10		below) (iii) ISDN – either Basic Rate or Primary Rate, (iv) Digital Switched Service
11		(DSS) and (v) PBX Trunks.
12	Q.	PLEASE DESCRIBE QWEST'S UNE COMBINATION FOR 1FR/1FB LINES.
13	A.	Qwest offers 1FR/1FB UNE Combinations in a pre-existing combined state to CLECs
14		that request such service. The UNE Combination of 1FR/1FB lines consists of the
15		following UNEs: Analog - 2 wire voice grade loop, Analog Line Side Port, Shared
16		Transport and, if desired, Vertical Features. The price for the 1 FR/1FB UNE
17		Combination is located in Exhibit PWH-2 of this testimony.

Docket No. UT-003013
Part B
Direct Testimony of Perry W. Hooks
August 4, 2000
Page 48
PWH-T1

Q. 1 PLEASE DESCRIBE QWEST'S LOCAL EXCHANGE PRIVATE LINE UNE 2 COMBINATION AND THE LIMITATION FOR THE PROVISION OF THIS 3 SERVICE. 4 Qwest offers Local Exchange Private line circuits in their pre-existing combined state A. 5 to a CLEC as UNE Combinations only when the CLEC establishes that such circuits 6 will carry a significant amount of local exchange traffic to a particular end user 7 customer. 8 WHAT IS THE BASIS FOR THE LIMITATION OF USE OF THE PRIVATE Q. 9 LINE UNE COMBINATION BY THE CLEC? 10 Qwest will not permit the use of local exchange private lines to create a UNE A. 11 Combination unless the CLEC establishes that it is using the UNE Combination to 12 provide a "significant amount of local exchange traffic to a particular end-user" as 13 recognized by the FCC in its November 24, 1999 Supplemental Order²⁰ and later on 14 June 2, 2000 in the FCC's Supplemental Order Clarification²¹. 15 The phrase "significant amount of local exchange traffic" was used in the FCC's

² Telecommunications Act of 1996, CC Docket No. 96-98. (November 24, 1999)

^{3 (&}quot;Supplemental Order").

^{1 21} In the Matter of Implementation of the Local Competition Provisions of the

Telecommunications Act of 1996, FCC Docket No.: CC-96-98, Supplemental Order

³ Clarification, Adopted: May 19, 2000, Releaseed; June 2, 2000.

Docket No. UT-003013
Part B
Direct Testimony of Perry W. Hooks
August 4, 2000
Page 49
PWH-T1

1 November 24, 1999 Supplemental Order in CC Docket 96-98. The FCC recognized 2 the need to address the impact of unbundling rules on incumbent LECs' special 3 access revenues. In a Fourth Further Notice of Proposed Rulemaking contained in the 4 November 24, 1999 Supplemental Order, the FCC concluded that "[IXCs] may not 5 convert special access services to combinations of unbundled loops and transport 6 network elements" The FCC allowed, however, that the "constraint does not 7 apply if an IXC uses combinations of unbundled network elements to provide a 8 significant amount of local exchange traffic, in addition to exchange access service, to 9 a particular customer." 10 Q. WHAT MUST A CLEC DEMONSTRATE IN ORDER TO CONVERT 11 FACILITIES USED IN THE PROVISION OF SPECIAL ACCESS SERVICES TO A UNE COMBINATION? 12 **13** In order to be consistent with the FCC's Supplemental Order, a CLEC must demonstrate that 14 it is using the UNE combination to provide "a significant amount of local exchange traffic . . . to a particular customer." Special access service may be converted to an 15 16 unbundled loop/transport combination used to provide local exchange service when: 17 For the conversion of services to combinations of unbundled network elements, at least 18 50% of the activated channels are used to provide originating and terminating local dial tone service and at least 50 % of the traffic on each of these local dial tone 19 **20** channels is local voice traffic (measured based on the incumbent's local exchange 21 area); and 22

Docket No. UT-003013

Page 50
PWH-T1

1 2		the entire loop facility has at least 33% local voice traffic; and
3 4 5 6 7 8		if a loop/transport combination includes multiplexing, each of the multiplexed facilities must meet the above criteria for this option. For example, if DS1 loops are multiplexed on to DS3 transport, each of the individual DS1 facilities must meet the criteria for this option in order for the DS1/DS3 loop/transport combination to qualify for UNE treatment; and
9 10 11 12		this option does not allow loop/transport combinations to be connected to ILEC services.
13	Q.	PLEASE DESCRIBE QWEST'S UNE COMBINATION FOR PBX TRUNK
14		SERVICE.
15	A.	PBX Trunks that are already in their pre-existing combined state are available to a
16		requesting CLEC as a UNE Combination. UNE-P-PBX includes the following pre-
17		existing combination of UNEs: DS1 capable loop, DS-1 PRI ISDN Trunk Port and
18		Shared Transport.
	_	
19	Q.	PLEASE DESCRIBE QWEST'S PROPOSAL FOR OFFERING THE UNE
20		COMBINATION FOR DIGITAL SWITCHED SERVICE (DSS)
21	A.	DSS UNE Combinations that are already in their pre-existing combined state are
22		available to the CLEC as a UNE Combination.
23	Q.	PLEASE DESCRIBE QWEST'S PROPOSAL FOR OFFERING THE
24		INTEGRATED SWITCHED DIGITAL NETWORK (ISDN) UNE
25		COMBINATION.

1	A.	ISDN lines that are already in their pre-existing combined state are available to CLEC
2		as a UNE Combination. There are two types of UNE-P-ISDN: basic rate (UNE-P-
3		ISDN-BRI) and primary rate (UNE-P-ISDN-PRI). UNE-P-ISDN-BRI is comprised
4		of the following unbundled network elements: Basic ISDN Capable Loop, Digital
5		Line Side Port and Shared Transport.
6	Q.	WHAT CHARGES DOES QWEST PROPOSE FOR UNE PLATFORM
7		COMBINATIONS?
8	A.	Qwest proposes that nonrecurring charges apply for the one-time activities associated
9		with the conversion of an existing UNE Platform and the connection of a new UNE
10		Platform requested by the CLEC. UNE Platform nonrecurring charges are included in
11		Exhibit PWH-2 of this testimony.
12	Q.	WILL QWEST OFFER LINE SHARING AS PART OF THE UNE
13		COMBINATIONS TO CLECS WHO MAY WISH TO ORDER SUCH
14		SERVICE?
15	A.	No, it will not. Qwest does not believe that it is obligated to offer line sharing as part
16		of the pre-existing UNE Combinations that it makes available to requesting CLECs.
15	0	
17	Q.	ON WHAT AUTHORITY DOES QWEST BASE ITS DECISION TO NOT
18		OFFER LINE SHARING AS PART OF THE UNE-P COMBINATIONS?

Docket No. UT-003013
Part B
Direct Testimony of Perry W. Hooks
August 4, 2000
Page 52
PWH-T1

- A. Qwest bases its decision on the FCC's opinion articulated in the Deployment of
 Wireline Services Offering order issued in December, 1999.²² In this Order, the FCC
 stated that "incumbent carriers are not required to provide line sharing to requesting
 carriers that are purchasing a combination of network elements known as the
 platform.²³
 - VI.CONCLUSION
- 7 Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?
- **8** A. Yes it does. Thank you.

6
