Subject: Proposed Rate Increases

[EXTERNAL]

The letter informing us that PSE is raising our rates effective 2023 by 15.8% is beyond criminal, in both myself and my wife's opinion. We are approaching 80 years of age and have lived at our current address since 1989. We have raised 6 children who all attended public schools and local colleges. But it seems PSE is bound and determined to force us into poverty by what we think is unrealistic increases in rates. We can only hope the politicians who regulate PSE will act on behalf of the thousands of customers who could be financially ruined.
