**BACKGROUND**

- 1 On October 11, 2007, Puget Sound Energy, Inc. (“PSE or Company”), filed a draft Request for Proposals for All Generation Sources (“All Sources RFP”) and a draft Request for Proposals for Electric and Gas Demand-Side Resources (“Energy Efficiency RFP”) with the Washington Utilities and Transportation Commission (“Commission”), pursuant to WAC 480-107. WAC 480-107-015(3)(b) provides that a utility must submit a draft request for proposals (“RFP”) and accompanying documentation describing its solicitation of bids for delivering electric capacity, energy, or electric capacity and energy, or conservation no later than one hundred thirty-five days after the utility's integrated resource plan is due to be filed with the Commission. Interested persons are then provided a sixty-day opportunity within which to provide comments on the draft RFP. After the close of the sixty-day comment period the Commission has thirty days to determine that issuance of the RFP is in the public interest or to suspend the filing for hearing.
  
- 2 The Commission issued a Notice for Comment to all interested persons on October 23, 2007. The sixty-day comment period for PSE’s draft RFP closed on December 10, 2007. During the sixty-day comment period, the Commission received no comments on either the All Sources RFP or the Energy Efficiency RFP.
  
- 3 WAC 480-107-015(3)(c) provides that a utility must solicit bids for electric power and electrical savings within thirty days of a commission order approving an RFP.
