---

Dear People who Care:

I am writing in support of Washington's Clean Energy Transformation Act (CETA).

Please use your authority to turn CETA into rules that utilities must follow to clean up their electricity.

The social cost of carbon must be included in utility power plans and the UTC must explicitly tell utilities how to include it. Please include rules that tell utilities how to include the social cost of carbon in their analysis.

Public participation is important, and public input must be recorded. Please make sure CETA rules require utilities to communicate clearly a summary of comments, and to indicate why their inputs have or have not been incorporated, for both the Integrated Resource Plan and the Clean Energy Implementation Plan.

Thanks for your time and consideration.
