Importance: High

Hello there,

I am the studio manager at Alive & Shine Center in Bellevue, WA. This is a yoga, meditation and lifestyle studio. We were recently informed that our meters will be switched out for upgraded 'smart' meters. This is of big concern to us. We teach children, pregnant women and have many clients with EMF sensitivity. For those of us who work here, we are here just as long if not longer than we are at home. I strongly feel that commercial customers should also have an individual choice to opt out of getting these upgraded meters.

These meters have not been UL tested and have been measured at levels much higher than safety levels in other industrialized countries. For the same ethical reasons that PSE has chosen to allow customers an opt out on the individual level, I strongly urge you to allow this on the commercial level.

Please confirm that you have received this and let me know if there is another person I need to speak to in order to voice these concerns

Thank you for your consideration and time.

Sincerely,

Nitika Kohli
Bellevue, WA
