RE: TR-121883 – Petition to Construct a Highway Rail Grade Crossing at A Street Northwest  
Final Engineering Plans

Dear Mr. Gross and Mr. Para:

On October 14, 2013, the City of Auburn filed signalization plans for the A Street Northwest crossing in Auburn. The US DOT number assigned is 945561A. Order 01 in docket TR-121883 requires that the Petitioner must file sixty days prior to the effective date of the order, December 13, 2012, final engineering plans of the crossing including the active warning devices.

Utilities and Transportation Commission (Commission) staff reviewed the final engineering/signalization plans and have no objections. Upon completion of the installation of the active warning devices, the City of Auburn must notify the Commission. The crossing is subject to inspection by Commission staff to verify full compliance with laws, regulations and this order.

Sincerely,

Kathy Hunter  
Rail Safety Manager
