Comments on UG-210729  
Oct. 25, 2021

CODE RED FOR HUMANITY. The world should have know long ago that we needed to stop burning fossil fuels. We have wasted time and opportunities to solve this problem slowly or easily. We are in a crisis. We need to stop acting as though everything is fine and normal. Difficult decisions need to be made by those in a position to do so and everyone else.

Methane leaks from all pipelines, not just the big ones. We need to be reducing the network of gas pipelines, not granting extensions.

What additional evidence are we waiting for before doing what we all know needs to be done?

Please, Commissioners, do everything in your power to stop this madness.

Thank-you for your attention to this matter,

Virginia Lohr  
Vashon, WA
