Dear Mr. McClellan:

The Washington Citizens for Recycling would like to request that the UTC provide a greater incentive for waste reduction when considering the tariff request of Eastside Disposal (TG-931585). State law provided the direction for local governments to move toward variable rate structures in 1989. Since then, many garbage companies have applied for greater differentials and received approval from the UTC. These jurisdictions have seen significant reductions in residential garbage as a result, providing a rationale for a greater differential between mini, one, two and three can service in the case of Eastside Disposal.

ADVISORY BOARD:

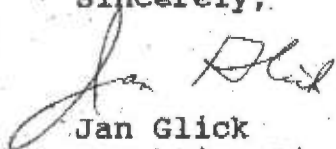

DIANA GALE
DAVID HARRISON
MARTHA KONGSGAARD
DYAN OLDENBURG
BILL ROSS

Thank you for your consideration.
