Subject: Smart meters in commercial buildings
Date: Wednesday, July 10, 2019 1:10:32 AM

To whom it may concern,

My name is Zofia and I am an independent contractor that regularly sees clients in a commercial yoga space in Bellevue, WA. I was recently informed that 'smart' radio frequency meters will be switched out for older analog models, and that commercial spaces cannot opt out. I strongly feel that commercial customers should also have an individual choice to opt out of getting these upgraded meters.

I want to continue to see clients in an electromagnetically safe space that promotes health.

These meters have not been UL tested and have been measured at levels much higher than safety levels in other industrialized countries. For the same ethical reasons that PSE has chosen to allow customers an opt out on the individual level, I strongly urge you to allow this on the commercial level.

Please confirm that you have received this and let me know if there is another person I need to speak to in order to voice these concerns

Thank you for your time.

Sincerely,
Zofia
