Notice of requested changes to F

On February 15, 2024, PSE filed a general rate case with the Wash a multiyear adjustment to electric and natural gas rates. The UTC l than PSE's request. The UTC is examining the proposed rates; th

PSE has requested the following

Electric Service

- 2025 – An overall 6.74% increase in rates generating an additional \$192.2 million in revenue. A typical residential customer using 800 kilowatt-hours would see an overall average 7.19% increase, or \$7.84 per month.
- 2026 – An overall 9.30% increase in rates generating an additional \$285.2 million in revenue. A typical residential customer using 800 kilowatt-hours would see an overall average 9.58% increase, or \$11.20 per month.

Natural Gas Service

- 2025 – An overall 18.96% increase in rates generating an additional \$196 million in revenue. A typical residential customer using 64 therms would see an overall average 17.29% increase, or \$13.96 per month.
- 2026 – An overall 2.07% increase in rates generating an additional \$25.3 million in revenue. A typical residential customer using 64 therms would see an overall average 1.59% increase, or \$1.51 per month.

PSE requests rate adjustments for the following reasons

- To continue to provide safe and reliable energy service through upgrades or modernization projects to existing facilities
- To deploy an advanced distribution management system to support customers' growing use of electric vehicles and distributed energy resources, such as rooftop solar, to reduce the need for large infrastructure projects
- To invest in pipeline reliability investments to enhance the safe operation of the natural gas delivery system and allow it to meet customer demands at times of peak need
- To introduce its Beaver Creek wind farm and provide 248 megawatts of clean energy to about 83,000 homes
- To fund wildfire and mitigation response that includes enhanced vegetation management and infrastructure upgrades, weather stations, AI cameras, advanced safety settings on power lines, and communications and community engagement
- To recover increased operating costs
- To set rates for a multiyear rate plan that reflect upcoming capital investments and operating costs over the two-year period

Hopefully the UTC doesn't agree. You all do this year after year with excuse

I don't need an increase in my utility bill. I keep my heat for a 3 bedroom plus family room down at 62° and no air conditioning. Right now 17 July 4:20 my house temp is 74, but I'm outside working. My bill is 77.97. But with budget payment plan more. So what is your problem ???

You just want more money to spend and see un knowledgeable people didn't know on what just like a po
