**Subject:** Rate increase

[EXTERNAL]

I pay over 220\$ per month for electricity and did not qualify unless I spent 75,000 on solar out of my own pocket for special incentives to save on electricity. All my appliances are HE and run longer and save less money for me. But use less electricity somehow. It's a scam.

Rates on everything are soaring on everything.

This rate hike is disgusting.

Please reconsider.

Sincerely

Michelle McDermott
