The Customer must provide the Company information from which the Company can determine the level of watt usage to be consumed, such as the manufacturers' equipment specifications or data sheets that document the nameplate rating as Power in Watts (W), and the number of devices to be installed. If the manufacturers' documentation or documented Power in Watts (W) is not available, the Customer has the responsibility of providing the information necessary to establish the nameplate rating in a manner satisfactory to the Company.
6. **INVENTORY FOR UNMETERED SERVICE:** The Customer shall notify the Company of all removals of Customer-owned devices or fixtures, or of any changes in the total nameplate rating of all components of the devices or fixtures, on a timely basis. Notifications regarding removals or changes to existing equipment shall include, (a) the total connected load and supporting manufacturers' documentation, (b) the approximate street address of the location of the equipment, and (c) if available, the PSE pole number.

PURCHASE RIDER (Continued)**

7. **TERMINATION BY CUSTOMER:** Customers who choose to discontinue their service under this Schedule will be charged for the net cost of the remaining Renewable Energy that was to be delivered to the Customer under the remaining term of the Service Agreement. This amount will be based on: 1) the remaining term of the Service Agreement, 2) the amount of estimated annual Renewable Energy needs of each of the discontinued Customer' locations as listed in Section 5 of the Service Agreement, 3) the estimated output of the Resource, 4) the contracted energy rates agreed to in Section 7 of the Service Agreement, and 5) a credit for PSE's then-current avoided costs (filed consistent with WAC 480-107-055). Termination of service under this Schedule will follow receipt and processing of the termination request by the Company.

8. **MONTHLY RATES:** In addition to charges under the Customer's existing Electric Service schedule, Schedule 139 monthly rates include: 1) a credit for the energy-related power cost component of the Energy Charge of the Customer's Electric Service schedule, and 2) a charge for the Renewable Energy. Charges will commence with the Customer's normal billing cycle for that specific account(s) under which the Customer is already taking Electric service.

- a. Energy Charge Credit Effective January 11, 2023: (\$0.047826) per kWh (C) (R)
- Energy Charge Credit Effective January 1, 2024: (\$0.048783) per kWh (N) (N)
- b. Resource Option Energy Charge: Listed in Section 9. (D)

Charges under this Schedule will be in addition to all the other charges under the Customer's existing Electric Service schedule. The Energy Charge Credit will be updated with each general rate case, power cost only rate case, or other power-related filings.

**SCHEDULE 141A
ENERGY CHARGE CREDIT RECOVERY ADJUSTMENT**

(N)

APPLICABILITY: This schedule is applicable to the electric energy delivered to any Customer except one, a) who has entered into a service agreement and taken service under the optional electric Schedule 139 Voluntary Long Term Renewable Energy Purchase Rider on or before the effective date of the original sheets of this schedule, or b) who is served under Schedules 448, 449, 458, or 459, or c) who is served under a special contract.

PURPOSE: This schedule implements a surcharge to recover certain costs incurred under the electric Schedule 139 Voluntary Long Term Renewable Energy Purchase Rider. The surcharge in this schedule recovers the costs of the Schedule 139 Energy Charge Credit associated with the energy-related power cost component of the Energy Charge of a Customer's Electric Service schedule. The surcharge in this schedule will be updated with each filing that revises the Schedule 139 Energy Charge Credit.

TRUE-UP: The Company will submit an annual true-up filing on or prior to the last day of November for rates effective on January 1 of the following year. The initial rates will be set as authorized under Docket UE-220066. Each annual true-up filing will set rates effective January 1 through December 31. The true-up will compare the amounts credited in Schedule 139 through the Energy Charge Credit, to the amounts collected through this schedule during the current year.

**SCHEDULE 141COL
COLSTRIP ADJUSTMENT RIDER**

(N)

APPLICABILITY: This Colstrip Adjustment Rider rate shall be applicable to the electric energy delivered to Customers under any schedule contained in this tariff except those Customers served on Schedule Nos. 448, 449, 458, and 459. This Colstrip Adjustment Rider rate shall be applicable to the electric energy delivered to Customers under any special contract unless specifically excluded by such special contract or Commission Order.

PURPOSE: This schedule implements surcharges and/or credits to collect or pass back the costs incurred or benefits realized associated with Colstrip Power Plant Units 1 & 2 and 3 & 4 as authorized in UE-220066. Beginning in 2026, only decommissioning and remediation related costs will be included in this Schedule in compliance with the Clean Energy Transformation Act.

COST RECOVERY PROCEDURE(S):

- a. This tariff is set to recover costs associated with Colstrip Units 1 & 2 and 3 & 4 as outlined in the Purpose section, but excluding variable power costs as detailed in UE-220066. The costs outlined in the Purpose section will be recovered through an energy component rate, or a per unit component rate, in this Schedule. For billing purposes the Schedule 141COL rates will be included with the general rate billing.
- b. Over the full time period this tariff schedule is in effect, it will serve to collect the total amount of prudently incurred Colstrip costs that are not funded by other sources using an annual true-up described in the True-Up section, to address variances during the remediation period as defined in item d. of this subsection.
- c. The Company will submit annual filings on or prior to September 30 for rates effective January 1 of the following year. Each annual filing will be for rates to be effective from January 1 through December 31. The rates will be based on operating costs and rate base items either on a forecast or historical basis as allowed in UE-220066.

COST RECOVERY PROCEDURE: (Continued)

- d. This rate schedule will continue until all remediation activities required by state or federal law have been completed, including but not limited to, those required by Montana Department of Environmental Quality and/or US Environmental Protection Agency (“the remediation period”) and the cost of which have been recovered. This rate schedule is designed to recover the prudently incurred expenditures in excess of other funding sources such as U. S. Treasury Grants and Production Tax Credits (“PTCs”). At the end of the remediation period, the rate will reset to either collect or refund amounts necessary to achieve this recovery until the residual balance is below plus or minus \$100,000, at which point the remaining balance will be transferred to an appropriate existing schedule, the proposal for final disposition of which will be included in that year’s annual filing.

TRUE-UP: Each year, the Company estimates the amount of costs to be included in the Colstrip Adjustment Rider rates as well as provides for a true-up of amounts from the prior rate period.

Amounts to include in each year’s true-up are:

- a. A true-up equal to the actual operating expenses and return on rate base paid or incurred during the rate period minus the amounts set in rates for that rate period;
- b. A true-up will be included for the difference between what was expected to be collected when rates were set the previous year versus the amount actually collected that is due to variances in load; and
- c. As part of the annual filing, the Company will provide reports of the actual amounts for operating expenses and rate base items that are included in the true-up calculation for a prudency review. The reports will also present future cost estimates, the change from prior year’s estimates for the expected remaining decommissioning and remediation, the resulting rate impact and a detail of the utilization of U.S. Treasury Grants or PTCs.

APPLICABILITY: This rate adjustment shall be applied to the rate(s) shown on each schedule for electric service for all Customers during a month when this schedule is effective. This rate shall be applicable to the electric service delivered to Customers under any special contract unless specifically excluded by such special contract or Commission Order.

**SCHEDULE 142
REVENUE DECOUPLING ADJUSTMENT MECHANISM**

1. **APPLICABILITY:** This rate schedule is applicable to all Customers of the Company that receive service under Schedules 7, 7A, 8, 10, 11, 12, 24, 25, 26, 29, 31, 35, 43, and Special Contracts. Rates in this schedule will be applied to all bills of applicable Customers with Energy usage during a month when this schedule is effective. (N) (D)
2. **PURPOSE:** The purpose of this schedule is to establish balancing accounts and implement a rate adjustment mechanism that decouples the Company's revenues recovered from applicable Customers that are intended to recover delivery and production costs from sales of electricity.
3. **DEFINITION OF RATE GROUPS:**
 - a. Rate Group 1: Customers served under Schedule 7.
 - b. Rate Group 2: Customers served under Schedules 8 and 24.
 - c. Rate Group 3: Customers served under Schedules 7A, 11, 25, 29, 35 and 43.
 - d. Rate Group 4: Customers served under Special Contracts.
 - e. Rate Group 5: Customers served under Schedules 12 and 26.
 - f. Rate Group 6: Customers served under Schedules 10 and 31.
4. **DECOUPLING MECHANISM:**
 1. Delivery Revenue Decoupling Calculation:
 - a. The Delivery Revenue Decoupling Adjustment reconciles on a monthly basis, separately for Rate Groups 1, 2, 3 and 4, differences between (i) the monthly Actual Delivery Revenue resulting from applying the following Delivery Revenue Per Unit Rates to their Energy sales, and (ii) the Allowed Delivery Revenue that would be collected by applying the Monthly Allowed Delivery Revenue Per Customer (see 4.1.d. below) by the active number of Customers in each group for each month.

	Effective	Effective	(N) (N)
