

Re: docket # TS042184

I strongly oppose the creation of a foot-ferry at the Harper Dock. Introducing a ferry in this area would not only destroy the culture of the community, but would negatively affect an underwater environment that is unique to the Harper area.

Certainly, a foot ferry is needed to economically and efficiently transport individuals who work in Seattle or for those of us who travel to Seattle for other reasons. The logical option is to use the existing ferry terminal in Southworth. I understand that there are obstacles to adding foot ferry service at the Southworth Ferry dock. Those obstacles surely can be overcome, especially with local support which I believe will be easily won once plans are abandoned for a Harper Ferry dock.

Please feel free to contact me with any questions or concerns regarding to my objection.

Sincerely,

Cassandra Firman
