**RE: Wrapped Steel Service Assessment Program 2014 Risk Model Results  
(Docket PG-041624)**

Dear Mr. Lykken,

Attached are the results of the 2014 risk model run for PSE's Wrapped Steel Service Assessment Program (WSSAP). This information is provided in accordance with the requirements of the settlement agreement contained in docket PG-041624.

Overall there is a decrease in the number of this vintage and type (pre-1972 wrapped and cathodically protected steel) since the model was run in 2013. This decrease is due to services being mitigated through WSSAP, bare steel replacement, and other operation and maintenance activities. A total of 24 services have been identified for priority replacement and will be included in the 2015 replacement plan. There are 390 services that are in the Scheduled Replacement category. The majority of these services will be planned for replacement in 2015 and 2016. The remaining services are either Increased Leak Survey or Standard Mitigation and will be operated and maintained in accordance with the settlement agreement requirements based on their mitigation category.

PSE appreciates the opportunity to continue to work with Staff on this program. Should you have any additional questions, please call me at (425) 462-3923.

Sincerely,

Stephanie Silva  
Gas Compliance Program Manager, Compliance Programs
