2. WAC 480-123-130(1)(b) - Use of Support

The funds received by the Company from the universal communications services program in calendar year 2018 represent monies that the Company formerly received through the Washington Exchange Carrier Association (WECA) pooling process and the reduction of support under the Federal Communications Commission's (FCC's) Connect America Fund InterCarrier Compensation (CAF ICC) program. As such, the funds from the universal communications services program contributed to defrayal of the ongoing operation and maintenance expenses of the Company. The funds from the universal communications services program are contributing to the Company's ongoing provision of high-quality basic telecommunications service to customers residing in the area the Company serves.

In December 2018, the Company received \$125,649 from the universal communications services program for the fiscal year ending June 30, 2019.

During the first six months of 2019, major projects include \$550,000 of capital investment in A-CAM projects to bring faster broadband to more locations. In addition, the Company has opened \$2,000 of projects to deal with routine capex including copper bonding, DSL card additions and drops. The funds received from the universal communications services program can be viewed as contributing to the Company's ability to perform these projects plus cover normal operating expenses. In the second half of 2019 the Company plans to continue the deployment of the projects mentioned earlier in this paragraph.

3. WAC 480-123-130(1)(c) - Unfilled Consumer Requests for New Basic Telecommunications Service*

None

* Service requests that are ongoing, but still within normal processing times are not counted as unfulfilled.

4. WAC 480-123-130(1)(e) - FCC Form 477

This form was previously filed on or about March 1, 2019 under Docket UT-190003.

5. WAC 480-123-130(1)(f) - Report on Operational Efficiencies/Business Plan Modifications

The Company is part of a major holding company which results in efficiencies and economies of scale that are not available to most Rural LECs and there are on-going efforts to find more ways to cut costs while improving broadband service and continuing to provide high-quality basic telecommunications services. The funds received from the universal communications services program can be viewed as assisting in the Company's efforts to obtain operational efficiencies.
