See important notes about intercensal model-based poverty estimates.

<sup>1</sup>The 2003 rural-urban continuum codes classify metropolitan counties (codes 1 through 3) by size of the Metropolitan Statistical Area (MSA), and nonmetropolitan counties (codes 4 through 9) by degree of urbanization and proximity to metro areas. See rural-urban continuum codes for precise definitions of each code.

53075 Whitman County	1,005	762 to 1,247	14.3	10.9 to 17.8
53077 Yakima County	17,207	13,207 to 21,206	25.1	19.2 to 30.9

2000 State-Level Estimation Details | 2000 County-Level Estimation Details | Back to top

Final release date for these estimates: October 2003

Select:

Beginning with the estimates for 2005, data from the American Community Survey were used in the estimation procedure; all prior years used data from the Annual Social and Economic Supplements of the Current Population Survey.

There is uncertainty associated with all estimates in this program. Where possible, we quantify this uncertainty through confidence intervals (please see a basic explanation of confidence intervals). For detail on the sources of uncertainty for state and county estimates, please see [Quantifying Uncertainty for State and County Estimates](#). For a discussion of estimating the relative magnitude of this uncertainty in SAIPE school districts estimates, please see [Quantifying Relative Error in School District Estimates](#). Before attempting to compare estimates, please see the [General Cautions](#) page.
