I understand that this IRP sets out a 20 year plan, yet has only minimal commitment to conservation and renewables, while continuing reliance on fossil fuels. And it does not commit to a date for shutting down the existing coal facilities.

Surely, you are aware of the disastrous effect of fossil fuel consumption on our planet. There is no time to waste. We need to commit to a clear date for transitioning to 100% renewable energy. Please don't let this opportunity pass us by.

Sincerely,
C. Gordon Quinlan
