PSE's plan (filed last November) for the future disregards and negatively impacts the public interest. The public has shown that it does not want the illegal LNG facility that is being constructed without a permit near Commencement Bay. The CEO of PSE has a serious conflict of interest with her public service as also the chair of a fossil fuel advocacy group. The board of directors should not be personally profiting off of the public utility in a way that is against the public interest. This is against the public interest because 1) the public has demonstrated that it DOES NOT WANT THE LNG facility and that IT DOES WANT to get coal-fired electricity off of this public grid 2) It has become scientifically clear that fossil-fuels and Fracking are detrimental to public and environmental health. PSE has demonstrated through its actions, that it has no respect for community health, it will take illegal actions when they are profitable, and ignore the sovereignty of indigenous tribes.

PSE's long term plan is so deaf to the public, that my household will remove ourselves from PSE's grid this year. To allow the wanton disregard for the rule of law by illegally constructing a Fracked-gas facility near Commencement Bay significantly undermines the authority of the this commission to protect the public interest. I can't even add a bathroom to my house without going through a significant permitting process, and it is SHOCKING that a public utility is doing this.

It is publicly perceived as a middle finger to the people and state regulators.
REJECT THIS MISGUIDED PLAN!!!!!!
