

**Attachment 1:** Metrics Updated in Second Supplemental Attachment A – Customer Insights

(Enumerated by Tab name, metric number, and metric description / update reason)

- DSM Update 0825
  - Metric 20
    - Number of customers participating in gas and electric energy efficiency programs (including low-income programs) who are from Highly Impacted Communities and Vulnerable Populations
    - Updated to reflect corrections in energy efficiency data analysis
  
- Advancing Equity by DER program Update 0825
  - §64.i.1.
    - For each DER program including Energy Efficiency: number of residential customers taking part in each of PSE’s DER program.
    - Updated to reflect corrections in energy efficiency data analysis
  - §64.i.2.
    - For each DER program including Energy Efficiency: number of known low-income customers taking part in each of PSE’s DER programs.
    - Updated to reflect corrections in energy efficiency data analysis
  - §64.i.3.
    - For each DER program including Energy Efficiency: number of known customers in highly impacted communities and vulnerable populations taking part in each of PSE’s DER programs.
    - Updated to reflect corrections in energy efficiency data analysis
  - §64.i.4.
    - For each DER program including Energy Efficiency: percentage of residential customers taking part in each of PSE’s DER programs.
    - Updated to reflect corrections in energy efficiency data analysis
  - §64.i.5.
    - For each DER program including Energy Efficiency: percentage of known low-income customers taking part in each of PSE’s DER programs.
    - Updated to reflect corrections in energy efficiency data analysis
  - §64.i.6.
    - For each DER program including Energy Efficiency: percentage of known customers in highly impacted communities and vulnerable populations taking part in each of PSE’s DER programs.
    - Updated to reflect corrections in energy efficiency data analysis
  - §64.i.7.
    - For each DER program including Energy Efficiency: average electric energy savings per home for residential customers.
    - Updated to reflect corrections in energy efficiency data analysis
  - §64.i.8.

- For each DER program including Energy Efficiency: average gas energy savings per home for residential customers.
    - Updated to reflect corrections in energy efficiency data analysis
  - §64.i.9.
    - For each DER program including Energy Efficiency: average electric energy savings per home for known low-income customers.
    - Updated to reflect corrections in energy efficiency data analysis
  - §64.i.10.
    - For each DER program including Energy Efficiency: average gas energy savings per home for known low-income customers.
    - Updated to reflect corrections in energy efficiency data analysis
  - §64.i.11.
    - For each DER program including Energy Efficiency: average electric energy savings per home for known highly impacted and vulnerable population customers.
    - Updated to reflect corrections in energy efficiency data analysis
  - §64.i.12.
    - For each DER program including Energy Efficiency: average gas energy savings per home for known highly impacted and vulnerable population customers.
    - Updated to reflect corrections in energy efficiency data analysis
- Affordability Update 0825
  - §63.b.1.
    - Average annual electric bill as a percentage of the average income of all electric energy-burdened customers.
    - Updated to reflect recently available 2022 energy burden data
  - §63.b.2.
    - Average annual gas bill as a percentage of the average income of all gas energy-burdened customers.
    - Updated to reflect recently available 2022 energy burden data
  - §63.i.1.
    - Average excess electric energy burden per household.
    - Updated to reflect recently available 2022 energy burden data
  - §63.i.2.
    - Average excess gas energy burden per household.
    - Updated to reflect recently available 2022 energy burden data
- Advancing Equity by Census Tract Update 0825
  - §64.n.1.
    - Percentage of gas households with a high-energy burden (>6%) for known low income by census tract.
    - Updated to reflect recently available 2022 energy burden data
  - §64.n.2.

- Percentage of electric households with a high-energy burden (>6%) for known low income by census tract.
- Updated to reflect recently available 2022 energy burden data
- §64.n.3.
  - Percentage of gas households with a high-energy burden (>6%) for highly impacted communities by census tract.
  - Updated to reflect recently available 2022 energy burden data
- §64.n.4.
  - Percentage of electric households with a high-energy burden (>6%) for highly impacted communities by census tract.
  - Updated to reflect recently available 2022 energy burden data
- §64.n.5.
  - Percentage of gas households with a high-energy burden (>6%) for vulnerable populations by census tract.
  - Updated to reflect recently available 2022 energy burden data
- §64.n.6.
  - Percentage of electric households with a high-energy burden (>6%) for vulnerable populations by census tract.
  - Updated to reflect recently available 2022 energy burden data
