WASHINGTON UTILITIES AND TRANSPORTATION COMMISSION

WASHINGTON UTILITIES AND TRANSPORTATION COMMISSION,

Complainant,

Docket UE-240004 Docket UG-240005 (consolidated)

v.

PUGET SOUND ENERGY,

Respondent.

In the Matter of the Petition of

PUGET SOUND ENERGY

For an Accounting Order Authorizing deferred accounting treatment of purchased power agreement expenses **pursuant to RCW 80.28.410**

Docket UE-230810 (consolidated)

PUGET SOUND ENERGY'S REQUEST FOR A CLARIFICATION **CONFERENCE OF ORDER 11 PURSUANT TO WAC 480-07-840**

I. INTRODUCTION

1. Pursuant to WAC 480-07-840, Puget Sound Energy ("PSE") formalizes in this filing its request for a clarification conference. PSE's request was sent by email to the administrative law judge and counsel of record on Tuesday, March 18, 2025. PSE understands the clarification conference will be held on Wednesday, March 19, 2025, at 11:30 a.m. PSE's counsel and relevant witnesses/subject matter experts will be available at the conference.

Perkins Coie LLP

10885 N.E. Fourth Street, Suite 700 Bellevue, WA 98004-5579 Phone: (425) 635-1400 Fax: (425) 635-2400

2. As stated in the email request, PSE has reviewed Order 11 (Order on Petitions for Reconsideration) in the above referenced dockets and is working to prepare the tariff schedules to be filed as compliance filings pursuant to paragraph 142 of Order 11. However, PSE needs clarification on the below issues relating to inclusion of the Targeted Electrification Pilot Phase 2 ("TEP Phase 2") in rates and requests a clarification conference pursuant to WAC 480-07-840. Specifically, the issues for which PSE requests clarification are set forth below.

II. ISSUES FOR WHICH PSE REQUESTS CLARIFICATION

- 3. Paragraph 55: PSE seeks guidance on allocating the \$22.3 million authorized for TEP Phase 2, which is to be added to the base rates approved on January 28, 2025. Specifically, PSE seeks clarification on how to allocate the \$22.3 million between electric and gas services and across customer classes. The Commission's inclusion of gas-only customers in this program may require revising the original allocation methodology. Any PSE gas-only customer electrification costs allocated to PSE electric ratepayers will increase the cost burden to PSE electric customers and provide no benefit to PSE's electric system or ratepayers; rather, all benefits will accrue to customers of other electric utilities that serve PSE gas-only territories at the expense of PSE's electric ratepayers. It may be necessary to reallocate costs to better reflect where financial responsibility should lie. For reference, the original methodology for both service split and customer class allocation was detailed in Christopher Mickelson's direct testimony (CTM-1T at 63:6-64:4).
- 4. Paragraphs 70-71: The Commission agreed with AWEC's request to exclude Schedules 87T, 449, and 459, energy intensive trade exposed customers ("EITE") customers and special contracts from the cost recovery of TEP Phase 2. While exclusion of Schedule 87T (gas) and

Perkins Coie LLP 10885 N.E. Fourth Street, Suite 700 Bellevue, WA 98004 5579

Bellevue, WA 98004-5579 Phone: (425) 635-1400 Fax: (425) 635-2400 Schedules 449 and 459 (electric) from TEP Phase 2 is straightforward, PSE needs clarity on the

exclusion of EITE customers and special contracts from TEP Phase 2. Notably, the EITE

designation only exists in the PSE gas tariff, specifically within Schedule 111, and currently has

no equivalent definition or usage in any electric tariff schedules. No electric customers have

identified themselves as EITE customers to PSE. As such, PSE seeks clarification on the specific

customers to be excluded pursuant to the Commission's order. Does the reference to exclude

EITE customers mean EITE gas only customers? Does the reference to special contracts mean

that all gas and electric special contract customers should be excluded?

<u>Paragraphs 70-71</u>: PSE faces implementation challenges in carrying out the order to exclude

certain customers from TEP Phase 2. While excluding entire customer classes is

straightforward, exempting individual EITE customers within classes from specific base rate

components is not feasible with PSE's current billing system. If EITE exemptions remain, PSE

recommends a separate adjustment mechanism to clearly define cost allocation and enable proper

exemption flagging within the billing system and application of costs. PSE proposes, and

requests clarification that it may implement an adjustment schedule to manage customer

exclusions, which would mirror base rates and have comparable flow-through impacts. PSE

suggests creating a tariff schedule mechanism to provide a way to control charge applicability,

similar to PSE's CCA approach to EITE in Schedule 111. This tariff schedule would not be a

tracker, nor would it allow a true-up mechanism.

5.

III. CONCLUSION

6. PSE respectfully requests the Commission clarify the above listed issues in the clarification

conference scheduled for Wednesday, March 19, 2025, at 11:30 a.m.
