This substitute filing proposes revised rates for Schedules 87 and 87T following discussions with Commission Staff and Nucor. After Kevin Higgins from Nucor identified that the Company's rate design methodology didn't exactly match their testimony referenced in Order 11/09 ("the Order"), PSE reviewed the calculations with Nucor and confirmed the need for revision. While these changes will require minor adjustments to the rate design for both Schedules 87 and 87T, they will not affect the overall revenue requirement. This revision ensures proper alignment with the methodology authorized in the Order.

This substitute filing also revises the effective dates of the tariff sheets in this filing to April 17, 2025. This extension of the effective date allows for the full five business days' review and response to this compliance filing, pursuant to WAC 480-07-880(4); and thus, immediately following the five-day review period which concludes on April 16, 2025, the tariff sheets included with this filing will go into effect on April 17, 2025. Proposed tariff changes will be posted on PSE's website in compliance with WAC 480-90-193.

In compliance with WAC 480-07-880(3), PSE will be providing the revised supporting electronic work paper to parties to the case, the Administrative Law Division, and the Commission's policy staff, on the same date this compliance filing is made. The work paper demonstrates the derivation of the revised rates proposed by the enclosed tariff sheets.
