Description	<p>If Washington Water is with holding purchase of Rosario Utilities awaiting rate increase - WHY?</p> <p>After purchase will they come back and ask for another increase the following year, since Rosario had asked for the increase. I think the WUTC should deny this increase, until after the Utility has been purchased. Then the WW can review the books & then come and ask for the rate increase. So we do not get d double hit.</p> <p>What makes us think that a rate increase should be granted based on Rosario's Financials especially when they acknowledge a lack of an ability to run a profitable company? After all the last rate increase was most certainly based on similar projections for costs & profitability - and they failed at running an efficient/profitable utility. So what make us think they can do it with this rate increase?????</p> <p>Will the new plant & higher rates finally accommodate the entire build out for all residents & Resort expansion?</p> <p>Our proposed rates penalize the people who conserve & use less buy increasing their rates - mean while commercial & abuser rates are not as impacted??</p> <p>Why not agree to an "all-in" rate based per gallon which includes operating expenses, growth & profit. This assures that what any party uses they pay a fair & equitable part of the water.</p> <p>Useless payless Use more pay more</p>
