The City of Sedro-Woolley is in favor of the EV charging solutions provided by PSE's to expand the Public charging program to help meet the charging needs of EV drivers living, working, and visiting businesses in our community, while also helping the greater community to meet our own clean future goals. We have very few EV charging stations here in Sedro-Woolley, and the need and demand is growing great with citizens choosing electric or traditional ICE vehicles for their next vehicle.

The EV charging solutions provided by PSE's expanded Public charging program will help meet the charging needs of EV drivers living, working, and visiting businesses in our community, while also helping the greater community to meet our own clean future goals.

We support diverse charging installation siting in business districts, residential neighborhoods, parks and community center, and believe it's important to ensure equitable access to transportation electrification and its benefits for historically underserved communities.

We appreciate the opportunity to support PSE's proposed filings and look forward to working with them to accelerate the adoption of transportation electrification in Washington.
