**RE: Wrapped Steel Service Assessment Program 2017 Risk Model Results (Dockets PG-041624)**

Dear Mr. Mayo,

Attached are the results of the 2017 risk model run for PSE's Wrapped Steel Service Assessment Program (WSSAP). This information is provided in accordance with the requirements of the settlement agreement contained in docket PG-041624.

Overall we have a decrease in the number of this vintage and type (pre-1972 wrapped and cathodically protected steel) since the model was run in 2016. This decrease is due to services being mitigated through WSSAP and other operation and maintenance activities. A total of 10 services have been identified for priority replacement and will be included in the 2018 replacement plan. There are 67 services that are in the Scheduled Replacement category. The majority of these services will be planned for replacement in 2018. The remaining services are either Increased Leak Survey or Standard Mitigation and will be operated and maintained in accordance with the settlement agreement requirements based on their mitigation category.

PSE appreciates the opportunity to continue to work with Staff on this program. Should you have any additional questions, please call me at (425) 462-3207.

Sincerely,

Lee Maxwell  
Sr. Regulatory Compliance Analyst
