What is a virtual phone number?

Answer

With Qwest® OneFlex® you have the option of choosing up to five additional phone numbers (virtual numbers) that will ring to your phone. Calls placed to a virtual phone number will ring the same phone as calls placed to your primary phone number. A virtual phone number can be beneficial if you have colleagues, friends or family living outside your local calling area. You could request a virtual number within their area and the people who live in that local calling area can call you for a price of a local phone call.
