# HUNDREDS OF BEES ARE DROPPING DEAD AROUND 5G CELL PHONE TOWERS IN CALIFORNIA AS CONTROVERSY MOUNTS AROUND NEW MOBILE TECHNOLOGY

The super-fast 5G broadband has sparked controversy since rolling out this year, with health experts claiming it could have serious side effects on humans. And there are now claims online that bees could also be affected after a video went viral. The clip – taken in Sierra Madre, California – shows the lifeless bodies of the bees lying on the ground. 5G cell phone towers and signals may not live up to the deadly hype we read about online, but neither should you take it lightly either.

by Geoffrey Grider

NOW THE END BEGINS

## Bizarre footage showing hundreds of bees dead on the floor surrounding what appeared to be two 5G cell phone towers in California has gone viral.

**There is a lot** of conspiracy theory being generated about the nascent [5G cell phone technology](#) that has come online now in California and soon to the rest of the country. Some of it is hype and nothing more, but as is the case with the vast majority of conspiracy theory, there is a lot of truth to it as well.

**As a kid** growing up in the 1970's, I can well remember the [cigarette ads in magazines](#) touting the [virtues and benefits](#) of smoking cigarettes. The tobacco companies denied for years that there was any link between smoking and cancer, and the US government backed them up because it was big business and everyone was making obscene amounts of money. But cigarettes and smoking does indeed cause cancer, all packs contain those warnings. On a personal note, both my parents died of stage 4 lung cancer caused by years of smoking the cigarettes doctors told them were OK. Now apply this same logic to cell phones, wifi and 5G cell phone towers.

**Our mobile devices** operate through microwave radiation, and [that can be deadly](#). You should *NEVER* talk more than a few minutes on any mobile device with the device pressed against your ear. And guess what? Bluetooth wireless earbuds also use microwave radiation to transmit the signal, and you should never use those either.

**A personal friend of mine**, Doris, told me the story of what happened to her husband and brother. The two of them were great friends, and would talk to each other on their rides into work on separate trains in the morning and again in the evening coming home. Doris' husband held the phone on the left side of his head, and her brother held his on the right side. After a few years of that, Doris' husband was diagnosed with a brain tumor on the left side of his head and died. Her brother was diagnosed with a brain tumor on the right side of his head, is still alive, but the tumor is inoperable. You will risk the same fate with either a cell phone or wireless earbuds on the sides of your head.

**5G cell phone towers** and signals may not live up to the deadly hype we read about online, but neither should you take it lightly either. Now, about those dead bees...

### Hundreds of bees drop dead around 5G cell phone towers in California

**FROM THE DAILY STAR UK:** The superfast broadband has sparked controversy since rolling out this year, with health experts claiming it could have serious side effects on humans. And there are now claims online that bees could also be affected after a video went viral. The clip – taken in Sierra Madre, California – shows the lifeless bodies of the bees lying on the ground.

But others questioned what was seen in the clip. Some pointed out the bees could just be drone bees – which die after mating. Others claimed the poles could not be holding 5G broadband, with one saying: “5G has only been installed in major cities, dude. It's not in Sierra Madre and it probably never will be.”

*IT IS NOT THE FIRST TIME BEES HAVE BEEN FILMED DYING ON THE FLOOR UNDER MYSTERIOUS CIRCUMSTANCES.*

**After a powerful** 7.1-magnitude earthquake struck California last month, [thousands of the creatures](#) were filmed covering the streets.

While the real reason for the sight is hard to explain, scientists have often noted how animals and insects can act strangely in the lead-up to an earthquake.

One study in Northern Taiwan that monitored insect populations over a period when a 7.3 and 6.8 earthquake hit, noted 'large declines' in the number of individual insects and also individual species. [READ MORE](#)

Bees dying under 5G poles

# Now The End Begins is your front line defense against the rising tide of darkness in the last days before the Rapture of the Church

**HOW TO DONATE:** [Click here to view our GoFundMe page](#)

**When you contribute to this fundraising effort**, you are helping us to do what the Lord called us to do. The money you send in goes primarily to the overall daily operations of this site. When people ask for Bibles, we send them out at *no* charge. When people write in and say how much they would like gospel tracts but cannot afford them, we send them a box at no cost to them for either the tracts or the shipping, no matter where they are in the world. Even all the way to South Africa. We even restarted our weekly radio Bible study on Sunday nights again,

thanks to your generous donations. All this is possible because YOU pray for us, YOU support us, and YOU give so we can continue growing.

**But whatever you do, don't do nothing.** Time is short and we need your help right now. If every one of the [12,832 people on our daily mailing list](#) gave \$4.50, we would reach our goal immediately. If every one of our [151,781 followers on Facebook](#) gave \$1.00 each, we would reach 300% of our goal. The same goes for our [14,000 followers on Twitter](#). But sadly, many will not give, so we need the ones who can and who will give to be generous. As generous as possible.

“Looking for that blessed hope, and the glorious appearing of the great God and our Saviour Jesus Christ;” [Titus 2:13 \(KJV\)](#)

“Thank you very much!” – **Geoffrey, editor-in-chief, NTEB**
