AWEC Response to UTC Staff Data Request 7

October 27, 2023

STAFF DATA REQUEST NO. 7 TO AWEC:

With reference to Exh. BGM-1CT at 36, please provide support for witness Mullins' "estimate that approximately 71% of Washington's short position can be attributed to the [Jim Bridger] outage."

RESPONSE TO STAFF DATA REQUEST NO 7:

Please see the workpaper titled "230172-AWEC-Mullins-Exh-BGM-8-09-14-2023(C).xlsx", tab "Net position balancing." Note that the referenced value should have been 76%. It was calculated by taking short position identified on rows 5 in the months of January through March and dividing by the sum of the negative values on that row.
